Science Ideology And World View Essays In The History Of Evolutionary Ideas

George E. Webb

Science Ideology And World View Essays In The History Of Evolutionary Ideas:

Science, Ideology, and World View John C. Greene, 1981-01-01 History, Humanity and Evolution James Richard Moore, 2002-10-03 History Humanity and Evolution brings together thirteen original essays by prominent scholars in the history of evolutionary thought The volume is intended both to represent the best of today's research in the field and also to celebrate the work of the distinguished historian John C Greene whose historical writings have had a unique influence on this volume's contributors as well as the field as a whole Using contemporary sources as diverse as medicine literature and natural history tableaux and drawing on the resources of publishing history feminist scholarship and the histories of politics sociology and philosophy the contributors offer new perspectives not only on familiar figures such as Erasmus and Charles Darwin Lamarck Chambers Huxley and Haeckel but also on many lesser known participants in the evolutionary debates The volume contains a fascinating introductory conversation with John C Greene and an afterword by him that responds to the contributors essays **Evolution** Peter J. Bowler, 2003-07 The comprehensive and authoritative source on the development and impact on one of the most controversial of scientific theories **From Darwinian Metaphysics Towards Understanding the Evolution of Evolutionary Mechanisms** Momme von Sydow, 2012 Although Charles Darwin predicted that his theory would give zest to metaphysics even he would be astonished at the variety of paths his theory has in fact taken This holds with regard to both gene Darwinism a purified Darwinian approach biologizing the social sciences and process Darwinism found in the disciplines of psychology philosophy of science and economics Although Darwinism is often linked to highly confirmed biological theories some of its interpretations seem to profit from tautological claims as well where scientific reputation cloaks ideological usage This book discusses central tenets of Darwinism historically as well as systematically for example the history of different Darwinian paradigms the units of selection debate and the philosophical problem of induction as basis of metaphysical Darwinism Crucially the book addresses the Darwinian claim that evolution is governed by an immutable and unrelentingly cruel law of natural selection Paradoxically Darwins theory is a static non evolutionary theory of evolution The current book sketches the historical background and provides suggestions that may help to replace this approach by the idea of an evolution of evolutionary mechanisms see Escher's Drawing Hands on the cover This view even suggests a tendency to overcome the blindness of the knowledge acquisition of primordial Darwinian processes and allows for some freedom from external environments This book first develops a radically Darwinian approach then criticises this approach from within Even Darwinism has a tendency to transcend itself Although the book addresses several empirical issues it does not challenge particular findings Instead it builds on many insights of Darwinism and provides a proposal for interpreting known empirical evidence in a different light It should help pave the way for further developing an understanding of nature that transcends Darwinian metaphysics Publisher's description *The Evolution Controversy in America* George E. Webb, 2021-05-11 A comprehensive intellectual history of America's century old debate

over teaching evolution in public schools For well over a century the United States has witnessed a prolonged debate over the teaching of organic evolution in the nation s public schools The controversy that began with the publication of Darwin s *Origin of the Species* had by the 1920s expanded to include theologians politicians and educators The Scopes trial of 1925 provided the growing antievolution movement with significant publicity and led to a decline in the teaching of evolution In *The Evolution Crisis in America* George E Webb details how efforts to improve science education in the wake of Sputnik resurrected antievolution sentiment and led to the emergence of creation science as the most recent expression of that sentiment Creationists continue to demand balanced treatment of theories of creation and evolution in public schools even though their efforts have been declared unconstitutional in a series of federal court cases Their battles have been much more successful at the grassroots level garnering support from local politicians and educators Webb attributes the success of creationists primarily to the lack of scientific literacy among the American public

Cosmos & Culture: Cultural Evolution in a Cosmic Context Steven J. Dick, Mark L. Lupisella, National Aeronautics and Space Administration, 2012-01-27 NOTE NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE Significantly reduced list price During the last 50 years coincident with the Space Age cosmic evolution has been recognized as the master narrative of the universe history writ large Cosmic evolution includes physical biological and cultural evolution and of these the latter is by far the most rapid In this volume authors with diverse backgrounds in science history anthropology and more consider culture in the context of the cosmos How does our knowledge of cosmic evolution affect terrestrial culture Conversely how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos Are life mind and culture of fundamental significance to the grand story of the cosmos that has generated its own self understanding through science rational reasoning and mathematics Might this lead to cultural evolution on a large enough scale to allow the universe to both create and steer itself toward its own destiny Related products NASA s *First 50 Years Historical Perspectives NASA 50 Anniversary Proceedings* can be found here <https://bookstore.gpo.gov/products/sku/033-000-01336-1> *Bringing the Future Within Reach Celebrating 75 Years of the NASA John H Glenn Research Center 1941-2016* can be found here <https://bookstore.gpo.gov/products/sku/033-000-01377-9> Other products produced by National Aeronautics and Space Administration NASA can be found here <https://bookstore.gpo.gov/agency/550>

Reflecting on Darwin Eckart Voigts, Barbara Schaff, 2016-04-08 Taking up the historical evolution of Darwin and his theories and the cultural responses they have inspired *Reflecting on Darwin* poses the following questions How are the apparatuses in the mid nineteenth century and at the turn of the twenty first century interconnected with bio scientific paradigms in art literature culture and science How are naturalism determinism and Darwinism the eugenics of the nineteenth century and the genetic coding of the twentieth century positioned embodied and staged in various media configurations and media genres and How have particular media apparatuses formed displaced or stabilized the various concepts of humankind in the framework of evolutionary theory Ranging from the early circulation of

Darwin's ideas to the present this interdisciplinary collection pays particular attention to Darwin's postmillennial reception Beginning with an overview of the historical development of contemporary ecological and ethical fears Reflecting on Darwin then turns to Darwin's influence on contemporary media neo Victorian literature and culture science fiction literature and film and contemporary theory In examining the plurality of ways in which Darwin has been rewritten and reappropriated this unique volume both mirrors and inspects the complexity of recent debates in Victorian and neo Victorian studies

Rethinking Modernity G. Bhambra, 2007-04-11 Arguing for the idea of connected histories Bhambra presents a fundamental reconstruction of the idea of modernity in contemporary sociology She criticizes the abstraction of European modernity from its colonial context and the way non Western others are disregarded It aims to establish a dialogue in which others can speak and be heard

Bionomics Michael Rothschild, 2004 Calling for a fundamental rethinking of economics this book argues that a market economy is best understood as a living evolving ecosystem

Jewish Tradition and the Challenge of Darwinism Geoffrey Cantor, Marc Swetlitz, 2008-09-15 Darwin's theory of evolution transformed the life sciences and made profound claims about human origins and the human condition topics often viewed as the prerogative of religion As a result evolution has provoked a wide variety of religious responses ranging from angry rejection to enthusiastic acceptance While Christian responses to evolution have been studied extensively little scholarly attention has been paid to Jewish reactions Jewish Tradition and the Challenge of Darwinism is the first extended meditation on the Jewish engagement with this crucial and controversial theory The contributors to Jewish Tradition and the Challenge of Darwinism from several academic disciplines and two branches of the rabbinate present case studies showing how Jewish discussions of evolution have been shaped by the intersections of faith science philosophy and ideology in specific historical contexts Furthermore they examine how evolutionary theory has been deployed when characterizing Jews as a race both by Zionists and by anti Semites Jewish Tradition and the Challenge of Darwinism addresses historical and contemporary as well as progressive and Orthodox responses to evolution in America Europe and Israel ultimately extending the history of Darwinism into new religious domains
