Science Scientific Instruments And Travel:

Science, Scientific Instruments and Travel Bourget, 2003 **Instruments, Travel and Science** Marie Noëlle Bourguet, Christian Licoppe, H. Otto Sibum, 2003-08-29 We are now accustomed to conceive of science as an instrumental activity producing numbers measurements and graphs by means of sophisticated devices This book investigates the historical process that gave rise to this instrumental culture The contributors trace the displacement of instruments across the globe the spread of practices or precision and the circulation and appropriation of skills and knowledge Through comparative and contextual approaches the volume confronts the tension between the local and the global examining the process of the universalization of science Bringing together case studies ranging from the seventeenth to the twentieth centuries contributors discuss French German and British initiatives as well as the knowledge and techniques of travellers in countries such as India Africa South East Asia and the Americas Students and researchers interested in the history of science in both Western and non Western cultures will find this book a valuable and thought provoking read *Travels of Learning* Ana Simões, A. Carneiro, M.P. Diogo, 2013-04-17 The idea behind this book grew out of a research project launched by the international group STEP Science and Technology in the European Peripheries established in 1999 by historians of science from Spain Portugal Belgium Greece Turkey Italy Russia Sweden and Denmark The aim has been to re examine the historical and we might also add the geographical character of science and technology and their institutions in regions and societies within Europe usually outside mainstream historical analysis The intended activities of the group have been framed by the following issues reconsidering the centre periphery model which has been the dominant model in studies on the transfer of scientific knowledge bringing to the fore the concept of scientific appropriation and attempting to study the construction of various local discourses systematically examining the relationship between science politics and the rhetoric of modernisation in societies in the European periphery joining forces to find out more about scientific travels using networks to further understand the dynamics and role of scholars on societies in the periphery of Europe intensifying efforts to catalogue and make available to the international community the archival material in the peripheral countries <http://www.cc.uoa.gr/step> on page 2 As a result of these programmatic guidelines a meeting was held in Lisbon in September 2000 in which the topic of scientific travels was used as a particularly good unifying theme on which to base a discussion of case studies involving the European peripheries **Geography, Technology and Instruments of Exploration** Fraser MacDonald, Charles W.J. Withers, 2016-04-22 Focusing on aspects of the functioning of technology and by looking at instruments and at instrumental performance this book addresses the epistemological questions arising from examining the technological bases to geographical exploration and knowledge claims Questions of geography and exploration and technology are addressed in historical and contemporary context and in different geographical locations and intellectual cultures The collection brings together scholars in the history of geographical exploration historians of science historians of technology and importantly

experts with curatorial responsibilities for and museological expertise in major instrument collections Ranging in their focus from studies of astronomical practice to seismography meteorological instruments and rockets from radar to the hand held barometer the chapters of this book examine the ways in which instruments and questions of technology too often overlooked hitherto offer insight into the connections between geography and exploration **Science on the Roof of the World**

Lachlan Fleetwood,2022-05-12 When how and why did the Himalaya become the highest mountains in the world In 1800 Chimborazo in South America was believed to be the world s highest mountain only succeeded by Mount Everest in 1856 Science on the Roof of the World tells the story of this shift and the scientific imaginative and political remaking needed to fit the Himalaya into a new global scientific and environmental order Lachlan Fleetwood traces untold stories of scientific measurement and collecting indigenous labour and expertise and frontier making to provide the first comprehensive account of the East India Company s imperial entanglements with the Himalaya To make the Himalaya knowable and globally comparable he demonstrates that it was necessary to erase both dependence on indigenous networks and scientific uncertainties offering an innovative way of understanding science s global history and showing how geographical features like mountains can serve as scales for new histories of empire **Powering Science** National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio,2018-01-29 NASA s Science Mission Directorate SMD currently operates over five dozen missions with approximately two dozen additional missions in development These missions span the scientific fields associated with SMD s four divisions Astrophysics Earth Science Heliophysics and Planetary Sciences Because a single mission can consist of multiple spacecraft NASA SMD is responsible for nearly 100 operational spacecraft The most high profile of these are the large strategic missions often referred to as flagships Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget technology and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs It considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly balanced program containing a range of mission classes **Travel Writing** Carl Thompson,2011-05-16 Concise and practical Travel Writing is the ideal introduction for those new to the subject as well as a crucial overview of the terminology history and debates within the field

Handbook of British Travel Writing Barbara Schaff,2020-09-07 This handbook offers a systematic exploration of current key topics in travel writing studies It addresses the history impact and unique discursive variety of British travel writing by covering some of the most celebrated and canonical authors of the genre as well as lesser known ones in more

than thirty close reading chapters Combining theoretically informed astute literary criticism of single texts with the analysis of the circumstances of their production and reception these chapters offer excellent possibilities for understanding the complexity and cultural relevance of British travel writing

How Scientific Instruments Have Changed Hands

,2016-09-12 This collection of essays discusses the marketing of scientific and medical instruments from the eighteenth century to the First World War The evidence presented here is derived from sources as diverse as contemporary trade literature through newspaper advertisements to rarely surviving inventories and from the instruments themselves The picture may not yet be complete but it has been acknowledged that it is more complex than sketched out twenty five or even fifty years ago Here is a collection of case studies from the United Kingdom the Americas and Europe showing instruments moving from maker to market place and to some extent what happened next Contributors are Alexi Baker Paolo Brenni Laura Ch zero Gloria Clifton Peggy Aldrich Kidwell Richard L Kremer A D Morrison Low Joshua Nall Sara J Schechner and Liba

Taub **Travels into Print** Innes M. Keighren, Charles W. J. Withers, Bill Bell, 2015-05-11 In eighteenth and nineteenth century Britain books of travel and exploration were much more than simply the printed experiences of intrepid authors They were works of both artistry and industry products of the complex and often contested relationships between authors and editors publishers and printers These books captivated the reading public and played a vital role in creating new geographical truths In an age of global wonder and of expanding empires there was no publisher more renowned for its travel books than the House of John Murray Drawing on detailed examination of the John Murray Archive of manuscripts images and the firm s correspondence with its many authors a list that included such illustrious explorers and scientists as Charles Darwin and Charles Lyell and literary giants like Jane Austen Lord Byron and Sir Walter Scott *Travels into Print* considers how journeys of exploration became published accounts and how travelers sought to demonstrate the faithfulness of their written testimony and to secure their personal credibility This fascinating study in historical geography and book history takes modern readers on a journey into the nature of exploration the production of authority in published travel narratives and the creation of geographical authorship a journey bound together by the unifying force of a world leading publisher
