Science Ethical Values:

Science and Ethical Values Bentley Glass, 1981-12-10 **Science Education and Ethical Values** Bert Musschenga, A. W. Musschenga, David L. Gosling, 1985 Values in Climate Policy David Morrow, 2019-10-28 Children born today in the Maldives may someday have to abandon their homeland Rising seas caused by climate change could swallow most of their tiny island nation within their lifetime Their fate symbolizes the double inequity at the heart of climate change those who have contributed the least to climate change will suffer the most from it All is not lost however. The scale and impact of climate change depends on the policies that people choose How quickly will we eliminate our greenhouse gas emissions How will we do it Who will pay for it What will we protect through adaptation How will we weigh the fortunes of future generations and the natural world against our own Answers to questions like these reflect a constellation of value judgments that deserve close scrutiny In addition to providing essential background on the science economics and politics of climate change this book explores the values at stake in climate policy with the aim of shrinking the gap between climate Axiology: Science of Value Archie J. Bahm, 2021-11-01 This book expounds the basic principles ethics and climate policy of Axiology as a major field of philosophical inquiry Those principles can be discovered and demonstrated by scientific method In treating scientific inquiry the book throws light on what values are and how they are known It explores questions of Good and Bad Ends and Means and Appearance and Reality as applied to values Axiology argues the author provides the basis for ethics as the science of oughtness the power that a greater good has over a lesser good in compelling our choices The book concludes with a survey of efforts to establish Axiology as a science HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -Volume III Pablo Lorenzano, Hans-Jörg Rheinberger, Eduardo Ortiz and Carlos Delfino Galles, 2010-09-27 History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on History and Philosophy of Science and Technology in four volumes covers several topics such as Introduction to the Philosophy of Science The Nature and Structure of Scientific Theories Natural Science A Short History of Molecular Biology The Structure of the Darwinian Argument In The Origin of Species History of Measurement Theory Episodes of XX Century Cosmology A Historical Approach Philosophy of Economics Social Sciences Historical And Philosophical Overview of Methods And Goals Introduction to Ethics of Science and Technology The Ethics of Science and Technology The Control of Nature and the Origins of The Dichotomy Between Fact And Value Science and Empires The Geo Epistemic Location of Knowledge Science and Religion Scientific Knowledge and Religious Knowledge Significant Epistemological Reference Points Thing Called Philosophy of Technology Transitions from Function Oriented To Effect Oriented Technologies Some Thought on the Nature of Modern Technology Technical Agency and Sources of Technological Pessimism These four volumes are aimed at a broad spectrum of audiences University and College Students

Educators and Research Personnel Science and Ethics Evandro Agazzi, Fabio Minazzi, 2008 Philosophy of science used to be identified with the logical and methodological analysis of scientific theories and any allusion to values was considered as a deplorable intromission in a philosophical investigation that should remain strictly epistemological As a reaction against this view an opposite sociological approach downplayed the usual virtues of scientific knowledge such as logical rigor and empirical adequacy as artificial imageries that cover the actual nature of science that is a social product submitted to all the kinds of social conditionings and compromises A more balanced view is badly needed today when technoscience is permeating all aspects of our civilization and wise persons understand that we cannot survive without using science and technology but at the same time we need to steer their development in view of the real benefit of humankind We must investigate how science technology and values are legitimately interconnected and in particular how the discourses of ethics politics and religion can enter a fruitful dialogue with science The essays presented in this volume offer a valuable contribution to this interdisciplinary study Handbook of the Philosophical Foundations of Business Ethics Christoph Luetge, 2012-10-09 The Handbook of Business Ethics Philosophical Foundations is a standard interdisciplinary reference handbook in the field of business ethics Articles by notable philosophers and economists examine fundamental concepts theories and questions of business ethics Are morality and self interest compatible What is meant by a just price What did the Scholastic philosophers think about business The handbook will cover the entire philosophical basis of business ethics Articles range from historical positions such as Aristotelianism Kantianism and Marxism to systematic issues like justice religious issues rights and globalisation or gender The book is intended as a reference work for academics students esp graduate and professionals Ethics: The Science of Oughtness Archie J. Bahm, 2021-09-20 This book makes a forceful case for the scientific aspirations of ethics and for the necessity of ethics to our humanity It is written as a challenge to those who are reluctant to recognize that science can deal decisively with questions in ethical theory It throws new light on group responsibilities apparent oughtness and the responsibility we have for expanding our awareness of responsibilities Values at Sea Dorinda G. Dallmeyer, 2003 The human impact on vast areas of the oceans remains relatively unregulated Sometimes in fact the only controls over our exploitation of marine resources lie in our environmental consciousness While the field of environmental ethics has explored rights and duties for land use stewardship and policy relatively little attention has been given to comparable issues of marine environments Values at Sea makes an important step toward moving environmental ethics discussions into a broader framework Gathered here are fifteen papers by an interdisciplinary group of scholars including ethicists marine scientists anthropologists economists geographers lawyers and activists From the Great Lakes to the Pacific Islands from the open sea to coastal areas the papers cover a broad array of ethical issues and policy matters related to such topics as the valuation of marine life indigenous peoples knowledge and environmental stewardship endemic and exotic species aquaculture oil spills and species protection The Experiences and Challenges of Science and Ethics

,2003-01-01 In April 2002 the U S National Academies hosted an interacademy workshop involving participants from the United States and Iran on the topic of Science and Ethics The explicit purposes of the workshop were a to engage important members of the American and Iranian scientific communities in meaningful discussions of the topic of science and ethics and particularly differences in the approaches in the west and in Islamic countries in general and Iran in particular b to encourage greater participation by Iranian scientists in international scientific discussions by exposing them to seasoned veterans in international meetings and c to identify specific topics and approaches that could be carried out by the Academies in the two countries to contribute to international understanding of the importance of considering the ethical dimensions of scientific research and related activities This report includes documents prepared by four breakout groups and a statement on priority areas for future interacademy cooperation developed at the final plenary session Also included are background papers prepared by some participants prior to the workshop that were not previously published
