The Human Body Clare Hibbert, 2018-12-15 Readers learn all about their bodies from head to toe. Students will find out about the complex systems that allow our bodies to walk, talk, and think. The brain, heart, lungs, stomach, bones, and reproductive system are all covered in this comprehensive anatomical book, but that is not all. Readers will also study how our bodies work to protect us under threat, illness, and injury, and how we're able to heal and recover when we get sick or injured.

Matter and Materials Clare Hibbert, 2018-12-15 Not only does science matter, but there is also matter in science. This book introduces students to the concept of matter, both solid and liquid, as it exists in the world around them. As readers learn about volume and mass, matter's two key ingredients, they'll explore the world of atoms, electrons, and protons. Full of all of chemistry's key principles, this book encourages readers to observe the world on a microscopic level.

Earth and Space Clare Hibbert, 2018-12-15 Readers journey into outer space where they'll learn about the moon, stars, solar system, and all that exists beyond Earth. Upon their arrival back to Earth, students will read about the various things that make up our planet. They'll get a chance to look inside the Earth, studying the differences between the contrasting parts of the planet, such as its crust and water. Finally, readers will return to the outside world where they will observe and learn about the world around them. From water to deserts to volcanoes, this book leaves no place on Earth or space unseen.
