Science Fiction Roots And Branches Contemporary Critical Approaches:

Science Fiction Roots And Branches Rhys Garnett, R J Ellis, 1990-07-06 **Science Fiction Roots and Branches** Rhys Garnett, R. J. Ellis, 1990 These eleven critical essays on late Victorian and modern science fiction focus primarily on the critical analyses of specific works in the light of current critical theory and debates about the social function and relevance of science fiction Crossing Borders Bernhard Kettmann, Georg Marko, 1999 **Discovering Dune** Dominic J. Nardi, N. Trevor Brierly, 2022-08-01 Frank Herbert's *Dune* is one of the most well known science fiction novels of all time and it is often revered alongside time honored classics like *The Lord of the Rings* Unlike Tolkien's work the *Dune* series has received remarkably little academic attention This collection includes fourteen new essays from various academic disciplines including philosophy political science disability studies Islamic theology environmental studies and Byzantine history that examine all six of Herbert's *Dune* books As a compendium it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries Also included in this collection are an introduction by Tim O'Reilly who authored one of the first critical appraisals of Herbert's writings in 1981 and a comprehensive bibliography of essential primary and secondary sources Learning from Other Worlds Patrick Parrinder, 2001 A definite look at the state of science fiction studies today that surveys the field from Hugo Gernsback to the present *Language, Science and Popular Fiction in the Victorian Fin-de-Siècle* Christine Ferguson, 2017-03-02 Christine Ferguson's timely study is the first comprehensive examination of the importance of language in forming a crucial nexus among popular fiction biology and philology at the Victorian fin de siècle Focusing on a variety of literary and non literary texts the book maps out the dialogue between the Victorian life and social sciences most involved in the study of language and the literary genre frequently indicted for causing linguistic corruption and debasement popular fiction Ferguson demonstrates how Darwinian biological philological and anthropological accounts of primitive and animal language were co-opted into wider cultural debates about the apparent brutality of popular fiction and shows how popular novelists such as Marie Corelli Grant Allen H G Wells H Rider Haggard and Bram Stoker used their fantastic narratives to radically reformulate the relationships among language thought and progress that underwrote much of the contemporary prejudice against mass literary taste In its alignment of scientific cultural and popular discourses of human language *Language Science and Popular Fiction in the Victorian Fin de Siècle* stands as a corrective to assessments of best selling fiction's intellectual ideological and aesthetic simplicity **Scraps Of The Untainted Sky** Thomas Moylan, 2018-03-05 Dystopian narrative is a product of the social ferment of the twentieth century A hundred years of war famine disease state terror genocide ecocide and the depletion of humanity through the buying and selling of everyday life provided fertile ground for this fictive underside of the utopian imagination From the classical works by E M Forster Yevgeny Zamyatin Aldous Huxley George Orwell and Margaret Atwood through the new maps of hell in postwar science fiction and most recently in the dystopian turn of the 1980s and 1990s this narrative machine has produced challenging cognitive maps

of the given historical situation by way of imaginary societies which are even worse than those that lie outside their authors and readers doors In *Scraps of the Untainted Sky* Tom Moylan offers a thorough investigation of the history and aesthetics of dystopia To situate his study Moylan sets out the methodological paradigm that developed within the interdisciplinary fields of science fiction studies and utopian studies as they grow out of the oppositional political culture of the 1960 and 1970s the context that produced the project of cultural studies itself He then presents a thorough account of the textual structure and formal operations of the dystopian text From there he focuses on the new science fictional dystopias that emerged in the context of the economic political and cultural convulsions of the 1980s and 1990s and he examines in detail three of these new critical dystopias Kim Stanley Robinson's *The Gold Coast* Octavia Butler's *The Parable of the Sower* and Marge Piercy's *She and It* With its detailed documented and yet accessible presentation *Scraps of the Untainted Sky* will be of interest to established scholars as well as students and general readers who are seeking an in depth introduction to this important area of cultural production

The Government of Disability in Dystopian Children's Texts Dylan Holdsworth, 2024-03-11 This book takes up the task of mapping discursive shifts in the representation of disability in dystopian youth texts across four historical periods where major social cultural and political shifts were occurring in the lives of many disabled people By focusing on dystopian texts which the author argues act as sites for challenging or reinforcing dominant belief systems and ways of being this study explores the potential of literature film and television to act as a catalyst of change in the representation of disability In addition this work discusses the texts and technologies that continue to perpetuate questionable and often competing discourses on the subject

Reading Popular Physics Elizabeth Leane, 2007 Elizabeth Leane's *Reading Popular Physics* is a valuable contribution to our understanding of the nature and implications of physics popularizations Focusing particularly on five bestselling books *A Brief History of Time* *The First Three Minutes* *Chaos* *Complexity* and *The Dancing Wu Li Masters* Leane analyzes the textual strategies by which popularizers of science influence the public Her book offers readers a fresh perspective on this highly visible and influential genre

The New Utopian Politics of Ursula K. Le Guin's *The Dispossessed* Laurence Davis, Peter Stillman, 2005-11-22 *The Dispossessed* has been described by political thinker Andre Gorz as The most striking description I know of the seductions and snares of self managed communist or in other words anarchist society To date however the radical social cultural and political ramifications of Le Guin's multiple award winning novel remain woefully under explored Editors Laurence Davis and Peter Stillman right this state of affairs in the first ever collection of original essays devoted to Le Guin's novel Among the topics covered in this wide ranging international and interdisciplinary collection are the anarchist ecological post consumerist temporal revolutionary and open ended utopian politics of *The Dispossessed* The book concludes with an essay by Le Guin written specially for this volume in which she reassesses the novel in light of the development of her own thinking over the past 30 years
