Wolf, 2014-03-14 Mark J P Wolf s study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical

analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared

Writing Genre Fiction H. Thomas Milhorn, Howard T. Milhorn, 2006-03 Several years ago after many years of writing nonfiction I decided to write a novel a medical thriller in the mold of Robin Cook Michael Crichton and Michael Palmer The problem was that although I knew how to write and had received a number of awards for nonfiction works I didn't know the how to write fiction So before putting fingers to keyboard I did a thorough search of the literature which included reading numerous books and hundreds of website articles What I discovered was that there simply wasn't one good source from which to learn the craft of writing genre fiction Writing Genre Fiction A Guide to the Craft is the book I was looking for when I set out on my quest to learn how to write fiction It is an attempt to share what I learned from my research It covers the six key elements of genre fiction the various genres and subgenres a large number of genre fiction writing techniques plot subplots and parallel plots structure scene and sequel characterization dialogue emotions and body language It also covers additional information about copyrighting and plagiarism where to get ideas manuscript formatting and revision and query letters and synopses In addition an appendix covers a large number of grammar tips
