Science For The Non Scientist:

Science for the Non-scientist Alva Rae Patton, 1962 A little textbook written for non science majors with no previous courses in science or mathematics also for the general reader without scientific background Order and Disorder Myron Kaufman, 2010 **Life Sciences for the Non-scientist** Viqar Zaman, 2005 Illustrating how art philosophy and mythology juxtapose yet complement scientific thought and evolution the inclusion of poems and quotes at the end of each chapter serve to make this book truly unique Offers a rich blend of historical background on important scientific discoveries ancient mythologies and recent phenomena such as SARS Includes over 50 illustrations with many in color Provides detailed explanations of technical terminology *Order And Disorder: Science Essentials For The Non-scientist* Myron Kaufman, 2011-02-10 Order and Disorder is a non mathematical introduction to the most important ideas in science for university students not majoring in a scientific area The objective is to prepare non science students for making both life and political decisions involving science and helping them to understand the advances in sciences as covered and reported in the mass media The book is highly comprehensive in physics and chemistry and provides the essential background to discuss and gain a better appreciation of selected topics in biological and neurological sciences as well as astronomy and geology The topics are integrated with the recurring theme of order and disorder the organization achieved in the face of the never ending drive towards disorganization The book also lends an insight into some considerations of the philosophy of science as well as the applications of science to health and a variety of other professions The reading experience is enhanced by the provision of illuminating examples supplementary reading and a summary of each chapter New terminologies that appear here for the first time are set off in bold italics and annotated in the glossary Where basic principles are introduced and explained these are highlighted prominently in bold for ease of reference Stimulating discussion questions are presented at the end of each chapter giving readers some food for thought a **Lifting the Scientific Veil** Paul Sukys, 1999 Lifting the Scientific Veil has been written to afford the nonscience student the same meaningful opportunity to explore germane scientific topics as is generally given the science student to learn about the humanities and social sciences Since nonscientists are generally responsible for making laws financing research or at the very least for voting it is essential that they understand the significant impact that science has on everyday life The book is designed to introduce nonscientists in an informative and comprehensible manner to four of the most significant scientific theories of the twentieth century the big bang quantum physics relativity and evolution After each theory is explained informally the book shows how that theory and related technology impact upon one's personal life Legal and political aspects of these theories are explored as well as philosophical and theological implications Science, Public Policy and the Scientist Administrator National Institutes of Health (U.S.). Committee on Staff-Training-Extramural Programs, 1972 **Science, Public Policy and the Scientist Administrator** National Institutes of Health (U.S.), 1971 *Science but Not Scientists* Vernon L. Grose, 2006-10-18 The

historic Science Textbook Struggle a worldwide battle about the origin of the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the crossfire between educators news media textbook publishers religious notables and world renowned scientists including nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All discussion about origins was transformed by admission that stories about them are based solely on personal views of individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of belief over fact in science never be repeated Wernher von Braun father of Americas space program writes in the Foreword Vernon Grose in tracing out in Science But Not Scientists his personal involvement in the vortex of these two forces illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary by heeding this clarion call *Bulletin of the Atomic Scientists* ,1981-04
