## **Science Incarnate Historical Embodiments Of Natural Knowledge:**

**Science Incarnate** Christopher Lawrence, Steven Shapin, 1998-04-11 Does truth have anything to do with the belly What difference does it make to the pursuit of knowledge whether Einstein rode a bicycle Russell was randy or Darwin was flatulent Focusing on the 17th century to the present SCIENCE INCARNATE explores how intellectuals sought to establish the value and authority of their ideas through public displays of their private ways of life 54 photos **Femininity, Mathematics and Science, 1880-1914** C. Jones, 2009-10-15 Through the prism of gender this text explores the contrasting cultures and practice of mathematics and science and asks how they impacted on women Claire Jones assesses nineteenth century ideas about women s intellect femininity and masculinity and assesses how these attitudes shaped women s experiences as students and practitioners **Gender, Embodiment, and the History of the Scholarly Persona** Kirsti Niskanen, Michael J. Barany, 2021-02-19 This book investigates the historical construction of scholarly personae by integrating a spectrum of recent perspectives from the history and cultural studies of knowledge and institutions Focusing on gender and embodiment the contributors analyse the situated performance of scholarly identity and its social and intellectual contexts and consequences Disciplinary cultures scholarly practices personal habits and a range of social economic and political circumstances shape the people and formations of modern scholarship Featuring a foreword by Ludmilla Jordanova Gender Embodiment and the History of the Scholarly Persona Incarnations and Contestations is of interest to historians sociologists media and culture scholars and all those with a stake in the personal dimensions of scholarship An international group of scholars present original examinations of travel globalisation exchange training evaluation self representation institution building norm setting virtue defining myth making and other gendered and embodied modes and mechanisms of scholarly persona work These accounts nuance and challenge existing understandings of the relationship between knowledge and identity **Recreating Newton** Rebekah Higgitt, 2016-09-12 Higgitt examines Isaac Newton s changing legacy during the nineteenth century She focuses on 1820 1870 a period that saw the creation of the specialized and secularized role of the scientist At the same time researchers gained better access to Newton s archives These were used both by those who wished to undermine the traditional idealised depiction of scientific genius and those who felt obliged to defend Newtonian hagiography Higgitt shows how debates about Newton s character stimulated historical scholarship and led to the development of a new expertise in the history of science **Natural Things in Early Modern Worlds** Mackenzie Cooley, Anna Toledano, Duygu Yildirim, 2023-05-09 The essays and original visualizations collected in Natural Things in Early Modern Worlds explore the relationships among natural things ranging from pollen in a gust of wind to a carnivorous pitcher plant to a shell like skinned armadillo and the humans enthralled with them Episodes from 1500 to the early 1900s reveal connected histories across early modern worlds as natural things traveled across the Indian Ocean the Ottoman Empire Pacific islands Southeast Asia the Spanish Empire and Western Europe In distant worlds that were constantly changing with

expanding networks of trade colonial aspirations and the rise of empiricism natural things obtained new meanings and became alienated from their origins Tracing the processes of their displacement each chapter starts with a piece of original artwork that relies on digital collage to pull image sources out of place and to represent meanings that natural things lost and remade Accessible and elegant *Natural Things* is the first study of its kind to combine original visualizations with the history of science Museum goers scholars scientists and students will find new histories of nature and collecting within Its playful visuality will capture the imagination of non academic and academic readers alike while reminding us of the alienating capacity of the modern life sciences

*Evidence in the Age of the New Sciences* James A.T. Lancaster, Richard Raiswell, 2018-10-24 The motto of the Royal Society Nullius in verba was intended to highlight the members rejection of received knowledge and the new place they afforded direct empirical evidence in their quest for genuine useful knowledge about the world But while many studies have raised questions about the construction reception and authentication of knowledge *Evidence in the Age of the New Sciences* is the first to examine the problem of evidence at this pivotal moment in European intellectual history What constituted evidence and for whom Where might it be found How should it be collected and organized What is the relationship between evidence and proof These are crucial questions for what constitutes evidence determines how people interrogate the world and the kind of arguments they make about it In this important new collection Lancaster and Raiswell have assembled twelve studies that capture aspects of the debate over evidence in a variety of intellectual contexts From law and theology to geography medicine and experimental philosophy the chapters highlight the great diversity of approaches to evidence gathering that existed side by side in the sixteenth and seventeenth centuries In this way the volume makes an important addition to the literature on early science and knowledge formation and will be of particular interest to scholars and advanced students in these fields

*Nature and the Godly Empire* Sujit Sivasundaram, 2005-11-17 A study of the relations between nineteenth century science and Christianity **Charles Darwin**, 2007-04-23 Definitive concise and very interesting From William Shakespeare to Winston Churchill the Very Interesting People series provides authoritative bite sized biographies of Britain s most fascinating historical figures people whose influence and importance have stood the test of time Each book in the series is based upon the biographical entry from the world famous Oxford Dictionary of National Biography

**Ecofeminist Approaches to Early Modernity** J. Munroe, R. Laroche, 2011-11-16 Challenges the notion of how early modern women may or may not have spoken for or even with nature By focusing on various forms of dialogue these essays shift our interest away from speaking and toward listening to illuminate ways that early modern Englishwomen interacted with their natural surroundings
