Hall,Eduardo G. Pereira,Heike Trischmann,2020-08-10 In the process of resolving disputes it is not uncommon for parties to justify actions otherwise in breach of their obligations by invoking the need to protect some aspect of the elusive concept of public order Until this thoroughly researched book the criteria and factors against which international dispute bodies assess such claims have remained unclear Now by providing an in depth comparative analysis of relevant jurisprudence under four distinct international dispute resolution systems trade investment human rights and international commercial arbitration the author of this invaluable book identifies common core benchmarks for the application of the public order exception To achieve the broadest possible scope for her analysis the author examines the public order exception s function role and application within the following international dispute resolution systems relevant World Trade Organization WTO agreements as enforced by the organization s Dispute Settlement Body and Appellate Body international investment agreements as enforced by competent Arbitral Tribunals and Annulment Committees under the International Center for Settlement of Investment Disputes provisions under the Inter American Convention of Human Rights and the European Convention of Human Rights as enforced by the Inter American Court of Human Rights and

the European Court of Human Rights respectively and the New York Convention as enforced by national tribunals across the world. Controversies, tensions and pitfalls inherent in invoking the public order exception are elucidated along with clear guidelines on how arguments may be crafted in order to enhance prospects of success. Throughout tables and graphs systematize key aspects of the relevant jurisprudence under each of the dispute resolution systems analysed. As an immediate practical resource for lawyers on any side of a dispute who wish to invoke or strengthen a public order exception claim, the book's systematic analysis will be welcomed by lawyers active in WTO disputes, international investment arbitration, human rights law or enforcement of foreign arbitral awards. Academics and policymakers will find a signal contribution to the ongoing debate on the existence, legal basis, content and functions of the transnational public order.

Proceedings of the 11th International Conference of Ar.Tec. (Scientific Society of Architectural Engineering) Rossella Corrao, Tiziana Campisi, Simona Colajanni, Manfredi Saeli, Calogero Vinci, 2024-10-26. This book gathers the proceedings of the 11th International Conference of Ar.Tec. Scientific Society of Architectural Engineering Colloqui AT e which was held in Palermo, Italy, on June 12-15, 2024, and brought together scholars in the fields of construction and conservation, history, building construction and performance, building design and technologies, digital transition and design of 40 buildings, digital twins for the management of historical building heritage, building human environment relationships and mitigation of vulnerabilities for the preservation of the built environment. The contributions demonstrate that architectural engineering enables the construction of sustainable, resilient, adaptive and high performance buildings and as such is instrumental in fighting against climate change.

Task Force on Natural Resources and the Environment, 2000. *Selected Water Resources Abstracts*, 1988. **Hazardous Waste Disposal** John P. Lehman, 2013-11-11. Putting together these Proceedings has afforded me the opportunity to re-read the papers which were presented last October here in Washington. In retrospect, the 1981 NATO CCMS Symposium on Hazardous Waste Disposal maintains the impression of excellence expressed by the participants at the actual event. The scope of the subject matter and quality of its presentation indicate that we did attain the Symposium's objective: a comprehensive review of the international status of hazardous waste disposal. It is my hope that in your own evaluation of these proceedings you will share my conviction that the Symposium conceived three years ago, approved by the NATO CCMS Pilot Study experts in Oslo in October 1980 and taking place a year later, was indeed worthwhile and that this record of its proceedings will be useful for many years to come.
