Science Since Babylon Enlarged Edition:

Science Since Babylon Derek John de Solla Price, 1975 Professor Price has enlarged his widely known and influential study of science and the humanities to include much new material extraordinarily broad in its range from ancient automata talismans and symbols to the differences of modern science and technology Science since Babylon is now more fascinating and useful than ever to anyone concerned with the humanistic understanding of science Originating in a series of five public lectures delivered under the auspices of the history department at Yale University in 1959 this book is an investigation of the circumstances and consequences of certain vital decisions relating to scientific crises which have the world to its present state of scientific and technological development Not just another book on History of Science it is a plea an exemplification for a whole new range of studies to take its place in the territory between the humanities and the sciences The chapter on Diseases of Science has received much public attention as an analysis of the present structure and probable future of the organization of science The author documents his study with accounts of his own researches in his specific fields of interest relating them to the crises which he believes to be of paramount importance *Science in Medieval Islam* Howard R.

Turner, 2010-07-28 A well organized and interesting overview of science in the Muslim world in the seventh through seventeenth centuries with over 100 illustrations The Middle East Journal During the Golden Age of Islam in the seventh through seventeenth centuries A D Muslim philosophers and poets artists and scientists princes and laborers created a unique culture that has influenced societies on every continent This book offers a fully illustrated highly accessible introduction to an important aspect of that culture the scientific achievements of medieval Islam Howard Turner who curated the subject for a major traveling exhibition opens with a historical overview of the spread of Islamic civilization from the Arabian peninsula eastward to India and westward across northern Africa into Spain He describes how a passion for knowledge led the Muslims during their centuries of empire building to assimilate and expand the scientific knowledge of older cultures including those of Greece India and China He explores medieval Islamic accomplishments in cosmology mathematics astronomy astrology geography medicine natural sciences alchemy and optics He also indicates the ways in which Muslim scientific achievement influenced the advance of science in the Western world from the Renaissance to the modern era This survey of historic Muslim scientific achievements offers students and other readers a window into one of the world's great cultures one which is experiencing a remarkable resurgence as a religious political and social force in our own time Peerless Science Daryl E. Chubin, Edward J. Hackett, Edward J.. Hackett, 1990-01-01 This book examines the

structure and operation of peer review as a family of quality control mechanisms and looks at the burdens placed on the various forms of peer review Assuming that peer review is central to the functioning of U S science policy Chubin and Hackett explore the symbolic and practical value of peer review in the making implementing and analysis of this policy

Creative Marginality Mattei Dogan, 2019-06-03 Tracing the nine formal social science disciplines political science

sociology economics history anthropology philosophy geography psychology and linguistics through their cycles of growth specialization fragmentation and hybridization Dogan and Pahre reject the notion of catch all interdisciplinary research They set out to demon

Industrial Revolutions Cort MacLean Johns, 2021-05-23 With reference to artefactual archaeological evidence and surviving manuscript documentation of the Hydraulis I find that a new dialectical discussion might better analyze and address the underlying understanding of the Steam Engines longitudinal provenance and therefore requires a redefinition the origins of Industrial Revolutions themselves from Ctesibius to the exploration of Mars

Growth Triumphant Richard A. Easterlin, 2009-11-10 Taking a longer view than most literature on economic development Richard A Easterlin stresses the enormous contrast between the collective experience of the last half century in both developed and developing countries and what has gone before An economic historian and demographer the author writes in the tradition of the new economic history drawing on economic theory and quantitative evidence to interpret the historical experience of economic theory and population growth He reaches beyond the usual disciplinary limits to draw as appropriate on sociology political science psychology anthropology and the history of science The book will be of interest not only to social scientists but to all readers concerned with where we have been and where we are going Easterlin is both an economic historian and a demographer and it is the combination of these two disciplines and the fine balance between theory and experience that make this well written refreshingly optimistic book excellent reading Population and Development Review In this masterful synthesis Richard Easterlin draws on the disciplines of economic history demography sociology political science psychology and the history of science to present an integrated explanation of the origins of modern economic growth and of the mortality revolution His book should be easily accessible to non specialists and will give them a sense of why economic history can inform our understanding of the future Dora L Costa Massachusetts Institute of Technology EH Net and H Net Growth Triumphant is simply a fascinating book Easterlin has woven together a history of economic growth economic development human mortality and morbidity the connections each has with the others and the implications of this nexus of forces on the future This book deserves a wide audience Choice In what must surely be the most fair minded well balanced and scrupulously reasoned and researched book on the sensational subjects implied in its title the Industrial Revolution the mortality and fertility revolutions and the prospects for future happiness for the human race Professor Easterlin has set in place the capstone of his research career Journal of Economic History Richard A Easterlin is Professor of Economics University of Southern California

Data in Astronomy Carlos Jaschek, 1989-03-16 Originally published in 1989 this book provides a comprehensive account of how to handle astronomical data Descriptions of data acquisition handling and interpretation are included The advice starts with chapters on observatories and observations followed by discussions on the archiving of data and its presentation in the literature

Change and Progress in Modern Science Joseph C. Pitt, 2012-12-06 The papers presented here derive from the 4th International Conference on History and Philosophy of Science held in

Blacksburg Virginia U S A November 2 6 1982 The Conference was sponsored by the International Union of History and Philosophy of Science and Virginia Polytechnic Institute and State University Virginia Tech Particular thanks go to L Jonathan Cohen Secretary of the Union as well as to Dean Henry Bauer of the College of Arts Sciences Wilfred Jewkes and the Center for Programs in the Humanities Arthur Donovan and the Center for the Study of Science in Society and the Department of Philosophy and Religion at Virginia Tech Not only did they come through with the necessary funds but they were all always ready with a helping hand when things got confusing Two additional groups of individuals require a special note of thanks First considerable appreciation is due the members of the Joint Commission of the International Union of History and Philosophy of Science Maurice Crosland Risto Hilpinen and Vladimir Kirsanov They were more than generous in their advice and cooperation The Local Organizing Committee Kenneth Alpern Roger Ariew Arthur Donovan Larry Laudan Ann La Berge Duncan Porter Eleonore Stump and Dennis Welch not only demonstrated efficiency and insured a pleasant stay for all participants but also went out of their way on numerous occasions to make everyone feel at home

The Idea of Social Structure Lewis A. Coser, 2017-07-12 Written and compiled by friends and former students The Idea of Social Structure honors Robert K Merton considered one of the premier sociologists of the twentieth century Along with Talcott Parsons and Marion J Levy Merton was emphatic in his use of the term social structure however different they were in defining and refining the term The chapters in this volume address many of Merton's diverse sociological theories and in turn his theories impact upon a very large sociological territory The volume includes major statements on the context of working with Merton by Lewis A Coser Paul F Lazarsfeld Robert A Nisbet and Seymour Martin Lipset as well as memorable statements covering Merton's interests in the sociology of knowledge and science planning communities medical education relative deprivation everyday life political roles and communication media This is a powerful sourcebook for understanding the work of Merton and of his intellectual successors Nisbet called the decade of the 1930s among the most vital and creative periods in American history It was certainly a period of intense struggle political military and ideological But the formation of modern sociology was without question one of the crowning achievements in the scientific evolution of the century The volume is sharply focused on Merton's work and deeply appreciative of the nature of his contribution It is a landmark effort in the study of sociology as history

Mathematics in Society and History S. Restivo, 2013-12-01 This is the first book by a sociologist devoted exclusively to a general sociology of mathematics The author provides examples of different ways of thinking about mathematics sociologically The survey of mathematical traditions covers ancient China the Arabic Islamic world India and Europe Following the leads of classical social theorists such as Emile Durkheim Restivo develops the idea that mathematical concepts and ideas are collective representations and that it is mathematical communities that create mathematics not individual mathematicians The implications of the sociology of mathematics and especially of pure mathematics for a sociology of mind are also explored In general the author's objective is to explore conjecture suggest and

stimulate in order to introduce the sociological perspective on mathematics and to broaden and deepen the still narrow shallow path that today carries the sociology of mathematics This book will interest specialists in the philosophy history and sociology of mathematics persons interested in mathematics education students of science and society and people interested in current developments in the social and cultural analysis of science and mathematics

Science Since Babylon Enlarged Edition Book Review: Unveiling the Magic of Language

In a digital era where connections and knowledge reign supreme, the enchanting power of language has be more apparent than ever.
