Todd L. Pittinsky

Science Technology And Society New Directions:

Science, Technology and Society Andrew Webster, 1992-01-17 How can the sociology of science relate to issues of science policy And how can both attend to new institutional and cultural shifts in the character of science itself These two questions lie at the heart of this new introduction to the sociology of science and technology Balancing an analysis of contemporary debates in the field with an exploration of science policy questions the book provides a fresh approach to today's key issues

Science, Technology, and Society Sal P. Restivo, 2005 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture *Science Technology and Society B* contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index

Science, Technology and Society Wenceslao J. González, 2005 The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past It is a social turn which affects philosophy of science as well as philosophy of technology It includes a new vision of the aims processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant This turn highlights science and technology as social undertakings rather than intellectual contents According to this new vision there are several important changes as to what should be studied the objects of research how it should be studied the method and what the consequences for those studies are The new focus of attention can be seen in many changes and among them are several of special interest a from what science and technology are in themselves mainly epistemic contents to how science and technology are made largely social constructions b from the language and structure of basic science to the characteristics of applied science and the applications of science c from technology as a feature through which human beings control their natural surroundings a step beyond technics due to the contribution of science to technology as a social practice and an instrument of power and d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values cultural political economic of science and technology Wenceslao J Gonzalez is professor of logic and philosophy of science at the University of A Coruña Spain He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University He has been a visiting researcher at the Universities of St Andrews Münster and London London School of Economics as well as Visiting fellow at the Center for Philosophy of Science University of Pittsburgh He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologna and Canterbury New Zealand He has edited 20 volumes and published 70 papers He is the editor of the monographic issues on Philosophy and Methodology of

Economics 1998 and Lakatos's Philosophy Today 2001 His writings include Economic Prediction and Human Activity An Analysis of Prediction in Economics from Action Theory 1994 On the Theoretical Basis of Prediction in Economics 1996 Rationality in Economics and Scientific Predictions A Critical Reconstruction of Bounded Rationality and its Role in Economic Predictions 1997 Lakatos's Approach on Prediction and Novel Facts 2001 Rationality in Experimental Economics An Analysis of R. Selten's Approach 2003 From Erklären/Verstehen to Prediction Understanding The Methodological Framework in Economics 2003 and The Many Faces of Popper's Methodological Approach to Prediction 2004

Science, Technology, and Society Todd L. Pittinsky, 2019-11-21 This book gathers interdisciplinary and multi disciplinary perspectives on the effects that today's advances in science and technology have on issues ranging from government policy making to how we see the differences between men and women The chapters investigate how invention and innovation really take place how science differs from competing forms of knowledge and how science and technology could contribute more to the greater good of humanity For instance should there be legal restrictions on immoral inventions A key theme that runs throughout the book concerns who is taken into account at each stage and who is affected The amount of influence users have on technology development and how non users are factored in are evaluated as the impact of scientific and technological progression on society is investigated including politics economy family life and ethics

Science, Technology & Society, 1992 *Science, Technology, Policy and International Law* Justo Corti Varela, Paolo Davide Farah, 2024-10-02 This book presents innovative insights into the intersections between science technology and society and particularly their regulation by the law Departing from the idea that law and science have similar methods and objectives the book deals with problems and solutions that source from these interactions concerns on how to integrate scientific evidence into trials how to best regulate new technologies or whether technological innovations could improve democratic legitimacy create new regulatory tools or even new spaces of regulation and what is the impact on the society The edited collection by building on a functionalist and comparatist approach offers answers to how to best integrate law science and technology in policy making and reviews the current attempts made at the transnational and international levels Case studies ranging from emerging technologies via environmental protection to statistics are complemented by a solid theoretical framework all of which seek to provide readers with tools for critical thinking in the reassessment of the relationship among theory practice political goals and international regulation

Health, Technology and Society Andrew Webster, 2017-09-16 Examines a range of current innovative health technologies exploring how far they change the boundaries between the body health technology relationship and assessing the contribution a critical social science can make towards our understanding of this shift
