the book argues that in addition to redirecting the flow of Chinese history revolutionary movements operate in and on space in three main ways maintaining territorial sovereignty redefining social relations and governing an imaginary realm Arguing for reconsideration of revolution as a reorganization of space as much as time this book will appeal to students and scholars of Chinese culture society history and literature      *The Translatability of Revolution* Pu Wang,2020-10-20 The first comprehensive study of the lifework of Guo Moruo 1892 1978 in English this book explores the dynamics of translation revolution and historical imagination in twentieth century Chinese culture Guo was a romantic writer who eventually became Mao Zedong s last poetic interlocutor a Marxist historian who evolved into the inaugural president of China s Academy of Sciences and a leftist politician who devoted almost three decades to translating Goethe s Faust His career embedded in China s revolutionary century has generated more controversy than admiration Recent scholarship has scarcely treated his oeuvre as a whole much less touched upon his role as a translator Leaping between different genres of Guo s works and engaging many other writers texts *The Translatability of Revolution* confronts two issues of revolutionary cultural politics translation and historical interpretation Part 1 focuses on the translingual making of China s revolutionary culture especially Guo s translation of Faust as a development of Zeitgeist Part 2 deals with Guo s rewritings of antiquity in lyrical dramatic and historiographical paleographical forms including his vernacular translation of classical Chinese poetry Interrogating the relationship between translation and historical imagination within revolutionary cultural practice this book finds a transcoding of different historical conjunctures into now time saturated with possibilities and tensions      Socialist Cosmopolitanism Nicolai Volland,2017-03-28 *Socialist Cosmopolitanism* offers an innovative interpretation of literary works from the Mao era that reads Chinese socialist literature as world literature As Nicolai Volland demonstrates after 1949 China engaged with the world beyond its borders in a variety of ways and on many levels politically economically and culturally Far from rejecting the worldliness of earlier eras the young People s Republic developed its own cosmopolitanism Rather than a radical break with the past Chinese socialist literature should be seen as an integral and important chapter in China s long search to find a place within world literature *Socialist Cosmopolitanism* revisits a range of genres from poetry and land reform novels to science fiction and children s literature and shows how Chinese writers and readers alike saw their own literary production as part of a much larger literary universe This literary space reaching from Beijing to Berlin from Prague to Pyongyang from Warsaw to Moscow to Hanoi allowed authors and texts to travel reinventing the meaning of world literature Chinese socialist literature was not driven solely by politics but by an ambitious but ultimately doomed attempt to redraw the literary world map      **Conceptualising China through translation** James St. André,2023-11-07 This monograph provides an innovative methodology for investigating how China has been conceptualised historically by tracing the development of four key cultural terms filial piety face fengshui and guanxi between English and Chinese It addresses how specific ideas about what constitutes the uniqueness of Chinese culture influence the ways users of these concepts think

about China and themselves Adopting a combination of archival research and mining of electronic databases it documents how the translation process has been bound up in the production of new meaning In uncovering how both sides of the translation process stand to be transformed by it the study demonstrates the dialogic nature of translation and its potential contribution to cross cultural understanding It also aims to develop a foundation on which other area studies might build broader scholarship about global knowledge production and exchange
