Rasmussen, 2013

School districts face enormous challenges with recent reductions in fiscal resources due to cuts in California's state budget and an average tenure for a school superintendent of only 3 years. School boards are challenged to find a leader who can address the needs of the school district during these difficult times. As numerous school superintendents are retiring and a new generation of educators is applying for key positions in educational leadership, it is important to better understand the perceptions of school board presidents who have experience in selecting a school superintendent. This study explored the perceptions of the superintendent selection process of five participating school board presidents. The participants in this study shared their perceptions of the superintendent search process and selection criteria, perceptions on the most important leadership characteristics desired in a superintendent, and perceptions in the standards used to measure leadership in the candidates selected as superintendent. The findings revealed several components of the selection process that will serve school boards in evaluating the best strategy for them in conducting the superintendent search. When school boards embark on the process of selecting a superintendent, their actions become very public and ultimately reflect on how they view community involvement and input into ongoing district leadership. As a result, a well-defined plan of action will reflect well on the school board, build community trust, and set the stage for a positive transition to new leadership at the superintendent level. The assertion that selecting a superintendent may very well be the school board's most important duty of action, it is imperative that such a process be articulated and integrated within the scope of district need and community involvement.

Jsl Vol 3-N3 JOURNAL OF SCHOOL LEADERSHIP, 1993-05-01. The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice, teach courses on school leadership and policy, use as a quality reference in writing articles about school leadership and improvement.
