Understanding Development Economics Adam Fforde,2014-01-03 Important parts of development practice especially in key institutions such as the World Bank are dominated by economists In contrast Development Studies is largely based upon multidisciplinary work in which anthropologists human geographers sociologists and others play important roles Hence a tension has arisen between the claims made by Development Economics to be a scientific measurable discipline prone to wide usage of mathematical modelling and the more discursive practice based approach favoured by Development Studies The aim of this book is to show how the two disciplines have interacted as well as how they differ This is crucial in forming an understanding of development work and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries This book introduces Development Economics to those coming from two different but linked perspectives economists and students of development who are not economists In both explaining and critiquing Development Economics the book is able to suggest the implications of these findings for Development Studies and more broadly for development policy and its outcomes

Context in Communication: A Cognitive View Gabriella Airenti,Marco Cruciani,Alessio Plebe,2017-04-03 Context is what contributes to interpret a communicative act beyond the spoken words It provides information essential to clarify the intentions of a speaker and thus to identify the actual meaning of an utterance A large amount of research in Pragmatics has shown how wide ranging and multifaceted this concept can be Context spans from the preceding words in a conversation to the general knowledge that the interlocutors supposedly share from the perceived environment to features and traits that the participants in a dialogue attribute to each other This last category is also very broad since it includes mental and emotional states together with culturally constructed knowledge such as the reciprocal identification of social roles and positions The assumption of a cognitive point of view brings to the foreground a number of new questions regarding how information about the context is organized in the mind and how this kind of knowledge is used in specific communicative situations A related very important question concerns the role played in this process by theory of mind abilities ToM both in typical and atypical populations In this Research Topic we bring together articles that address different aspects of context analysis from theoretical and empirical perspectives integrating knowledge and methods derived from Philosophy of language Linguistics Cognitive Science Cognitive Neuroscience Developmental and Clinical Psychology

Armor ,1959 *Design of Observational Studies* Paul R.

Rosenbaum,2020-07-13 This second edition of Design of Observational Studies is both an introduction to statistical inference in observational studies and a detailed discussion of the principles that guide the design of observational studies An observational study is an empiric investigation of effects caused by treatments when randomized experimentation is unethical or infeasible Observational studies are common in most fields that study the effects of treatments on people including medicine economics epidemiology education psychology political science and sociology The quality and strength of evidence provided by an observational study is determined largely by its design Design of Observational Studies is organized into five parts Chapters 2 3 and 5 of Part I cover concisely many of the ideas discussed in Rosenbaum s Observational Studies also published by Springer but in a less technical fashion Part II discusses the practical aspects of using propensity scores and other tools to create a matched comparison that balances many covariates and includes an updated chapter on matching in R In Part III the concept of design sensitivity is used to appraise the relative ability of competing designs to distinguish treatment effects from biases due to unmeasured covariates Part IV is new to this edition it discusses evidence factors and the computerized construction of more than one comparison group Part V discusses planning the analysis of an observational study with particular reference to Sir Ronald Fisher s striking advice for observational studies make your theories elaborate This new edition features updated exploration of causal influence with four new chapters a new R package DOS2 designed as a companion for the book and discussion of several of the latest matching packages for R In particular DOS2 allows readers to reproduce many analyses from Design of Observational Studies *The Construction of Commercial Contracts* JW

Carter,2013-01-04 This book adopts a principled approach to the law applied in the construction of commercial contracts This approach is presented as part of a coherent theory of the law of contract construction which makes a unique contribution to scholarship and understanding of the most important aspect of the practice of commercial lawyers The law is explained by reference to three stages in construction It distinguishes the preliminary stage in which context is established from the meaning and application stages of contract construction The approach provides insights both into the practical problems that lawyers face in particular in relation to admissibility of extrinsic evidence and the theoretical underpinnings of the subject The book also explains the relationship between intention and construction and discusses general and specific rules that determine the results of construction disputes Each chapter is introduced by statements of its objectives and the book includes simple definitions of key concepts as well as summaries of the complex principles which comprise the law of construction In illustrating construction principles and their application the exposition of the law draws on the author s knowledge of Australian contract law and the influence and role of the UNIDROIT principles CISG and the American Restatement Second Contracts **A Guide to the Coins of Great Britain & Ireland** William Stewart Thorburn,1895

English Teaching Forum ,1969 **Commerce Reports** ,1931 [Incremental Conceptualization for Language Production](#) Markus Guhe,2020-07-24 Incremental Conceptualization for Language Production discusses the simultaneous

actions involved in thinking and speaking as well as the piecemeal way in which individuals construct an internal representation of the external world and use this internal representation for speaking Author Markus Guhe presents the first computational model that captures these observations in a cognitively adequate fashion The volume is an innovative look at the mind s process of producing semantic representations that can be transformed into language The first section of the book illustrates four stages of conceptualization construction of a conceptual representation selection of content to be verbalized linearization of the selected content and generation of preverbal messages Guhe then analyzes incremental processing processing that takes place in a piecemeal fashion and offers a blueprint of incremental models while discussing the dimensions along which the processing principles and the blueprint varies Finally incremental processing and conceptualization merge to form the incremental conceptualiser model inC The effective use of inC is demonstrated through simulations carried out with the implementation of the model Intended for researchers in cognitive science particularly cognitive modeling of language this volume will also interest researchers in artificial intelligence computational linguistics psycholinguistics and linguistics and psychology
