Selective Mutism in Children Tony Cline, 1994 There have been important developments in the study and treatment of selective mutism during the ten years since the first edition of this book was published Understanding of the subject has improved more dramatically than in any period since the phenomenon of children who talk readily in some situations but not in others was first recognised over a century ago The second edition of this practical book reports recent developments in medication and combined therapies New findings on the links between social anxiety biological and genetic factors and selective mutism are described At the same time the authors remain committed to understanding this pattern of behaviour in its full social context in family and community and to employing behavioural approaches to intervention alongside other methods This is the fullest and most authoritative book length account of selective mutism in print **Child**

Psychopathology Stephen R. Hooper, George W. Hynd, Richard E. Mattison, 2013-05-13 These two companion volumes

provide a comprehensive review and critical evaluation of the major DSM III and DSM III R child disorders Their major goal is to provide diagnostic and assessment guidelines that are based on scientific literature in specific clinical domains Each chapter contains a discussion of the historical background of a particular diagnosis definitional issues a critical but selective review of the literature addressing the diagnosis in question proposed changes in the diagnostic criteria based on the available literature and proposed assessment models and methods based on the designated criteria Given the scientific bases for many of these discussions of diagnostic criteria these two volumes will serve professionals and graduate students in a wide variety of fields clinical child psychology child psychiatry pediatrics pediatric and school psychology special education social work and other child mental health specialties Sertraline Treatment of Selective Mutism John S. Carlson,1997

Phobic and Anxiety Disorders in Children and Adolescents Thomas H. Ollendick,John S. March,2004-01-15 This comprehensive interdisciplinary guidebook is designed for the mental health practitioner seeking to utilize proven and effective interventions with children and adolescents suffering from significant anxiety and phobic disorders Each chapter is co authored by a clinical child psychologist and a child psychiatrist framing the volume s unique and balanced perspective In addition each chapter presents state of the art assessment and treatment strategies for a panoply of phobic and anxiety disorders including both psychosocial and pharmacological interventions Moreover the volume addresses important conceptual epidemiological and ethical issues in working with children and adolescents All in all this guide will help address the wide chasm between clinical research and clinical practice uniting the forces intrinsic to child psychiatry and clinical child psychology **Anxiety Disorders in Children and Adolescents** Tracy L. Morris,John S. March (MD.),2004-01-28

Now in a fully revised and updated second edition this landmark work brings together leading experts to comprehensively examine all aspects of childhood onset anxiety disorders The volume presents the major theoretical perspectives currently informing research and clinical practice reviews key issues in assessment and diagnosis and marshals the latest findings on each disorder and its treatment All chapters in the second edition have been extensively rewritten to reflect significant advances in theory and research including the results of controlled treatment studies Important new chapters have been added on behavioral genetics combined cognitive behavioral therapy and pharmacotherapy and prevention Additionally separate chapters now cover several disorders that were previously addressed in less depth generalized anxiety disorder specific phobias separation anxiety and panic **Mental Health Interventions with Preschool Children** Robert D.

Lyman,Toni L. Hembree-Kigin,2013-11-11 Preschool children have been largely neglected in the mental health treatment literature although research has established that many behavioral and emotional disorders in children result from events occurring during the preschool years or are first manifested during this period This has occurred for several reasons Traditional psychoanalytic thinking has considered preschoolers to be too psychologically immature for complete manifestations of psychopathology and the limited language abilities of young children have complicated assessment

procedures and made them less appropriate for treatment approaches that are largely verbal in nature. In addition, the developmental complexity of the preschool period has deterred many researchers from investigating clinical issues with this age group. Partly as a result of the lack of information on preschoolers in the literature, practitioners have historically been uncomfortable in conducting assessments and initiating treatment with young children. They have often adopted a wait and see attitude in which formal mental health diagnosis and treatment are not implemented until after the child's entry into school. Unfortunately, such a delay may mean wasting the time during which mental health interventions can be maximally effective. Recently, this attitude has changed, and practitioners now recognize the need for assessment and treatment of behavioral and emotional disorders early in life. What they require to assist them in the timely delivery of such services is information about assessment and treatment procedures specifically designed for preschoolers and with demonstrated efficacy with that age group.

Developing a Subtyping System for Selective Mutism Sharon Liza Cohan, 2007. The accumulated knowledge about selective mutism (SM) suggests that children who receive this diagnosis are a heterogeneous group; some are characterized by high levels of social anxiety, while others also exhibit behavioral and speech language problems. This study was designed to develop an empirically derived subtyping system for SM using parent report measures of social anxiety: Social Anxiety Scale for Children Revised (La Greca, Eyberg, Bishop, 2003). The sample consisted of 130 children recruited from a large SM advocacy group. Results from latent profile analysis comparing 2, 3, and 4 class models supported a 3 class solution, but a 4 class solution was also plausible. The 3 class model suggested the existence of an anxious/mildly oppositional subtype, an anxious/communication delayed subtype, and a primarily anxious subtype. Follow-up analyses for the 3 class model indicated no significant subtype differences in functional impairment (Child Anxiety Impact Scale, Parent Version; Langley, Bergman, McCracken, Bergman, Keller, Wood, Piacentini, Achenbach, 2001) and expressive/receptive language abilities (Vineland Adaptive Behavior Scales II; Sparrow, Cicchetti, Balla, 2005). Our results indicate that SM children are characterized by high levels of social anxiety, but they may also show speech language delays and low level behavior problems. Viewing SM as solely due to anxiety may cause researchers and clinicians to overlook important facets of the disorder.

Conducting School-Based Assessments of Child and Adolescent Behavior Edward Steven Shapiro, Thomas R. Kratochwill, 2002-07-25. This hands-on guide is designed to help school practitioners conduct effective multidimensional assessments of a wide range of emotional and behavioral difficulties. Each chapter focuses on a particular method, describes its applications in the school setting, and offers clear guidelines for implementation, illustrated with realistic case examples. Approaches discussed include direct observation, analogue assessment, child self-reports, teacher and parent interviewing, informant reports, and self-monitoring procedures. Recommendations for working with culturally and linguistically diverse children and adolescents are also provided. The theoretical and empirical underpinnings of the assessment strategies demonstrated here are thoroughly reviewed in the companion volume, *Behavioral Assessment in Schools*, Second Edition.

**Designing
Preschool Interventions** David W. Barnett, Susan H. Bell, Karen T. Carey, 2002-08-01 This practical text delineates the basic steps of developing effective interventions for learning and behavior difficulties in children aged two to five The authors set forth an ecological framework that stresses identifying problem situations rather than classifying individual children as disabled or at risk The core components of naturalistic intervention design are covered in depth including teacher and parent interviewing classroom observation and functional assessment team based problem solving strong accountability methods and legal and ethical safeguards Solidly grounded in empirical research the book presents examples of successful interventions for fostering social competence and language skills and improving interactions with parents teachers and peers
