Selective Nontreatment Of Handicapped Newborns:

Selective Nontreatment of Handicapped Newborns Robert F. Weir, 1984 Who decides and on what basis how to treat a child with severe birth defects Any decisions made on such cases are painful and complex and have far reaching consequences for society at large Addressing the medical legal and ethical aspects of the issue Robert Weir presents the first serious survey of the major arguments regarding selective non treatment which have been advanced by physicians attorneys and the judicial system Selective Nontreatment of Handicapped Newborns, 1985 Selective Nontreatment of Handicapped Newborns Susan A. Sullivan, 1987 Prenatal Testing and Disability Rights Erik Parens, Adrienne Asch,2000-09-28 As prenatal tests proliferate the medical and broader communities perceive that such testing is a logical extension of good prenatal care it helps parents have healthy babies But prenatal tests have been criticized by the disability rights community which contends that advances in science should be directed at improving their lives not preventing them Used primarily to decide to abort a fetus that would have been born with mental or physical impairments prenatal tests arguably reinforce discrimination against and misconceptions about people with disabilities In these essays people on both sides of the issue engage in an honest and occasionally painful debate about prenatal testing and selective abortion The contributors include both people who live with and people who theorize about disabilities scholars from the social sciences and humanities medical geneticists genetic counselors physicians and lawyers Although the essayists don t arrive at a consensus over the disability community s objections to prenatal testing and its consequences they do offer recommendations Institutional Ethics Committees Anne Fox Kiger, 1989 for ameliorating some of the problems associated with the practice

To Treat Or Not to Treat Richard C. Sparks, 1988 A thorough survey of the ethical literature regarding the treatment or nontreatment of handicapped newborns Infant Mortality, Morbidity, and Childhood Handicapping Conditions Elizabeth L. Making All the Difference Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents refusal to authorize it. How does the law apply to a neighborhood that objects to a group home for developmentally disabled people Does equality mean treating everyone the same even if such treatment affects some people adversely Does a state requirement of employee maternity leave serve or violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system s ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By

illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference <u>Global Bioethics</u> Van Rensselaer Potter,2012-01-01 Van Rensselaer Potter created and defined the term bioethics in 1970 to describe a new philosophy that sought to integrate biology ecology medicine and human values Bioethics is often linked to environmental ethics and stands in sharp contrast to biomedical ethics Because of this confusion and appropriation of the term in medicine Potter chose to use the term Global Bioethics in 1988 Potter's definition of bioethics from Global Bioethics is Biology combined with diverse humanistic knowledge forging a science that sets a system of medical and environmental priorities for acceptable survival
