Mono no Aware and Gender as Affect in Japanese Aesthetics and American Pragmatism Johnathan Flowers, 2023-03-20 *Mono no Aware and Gender as Affect in Japanese Aesthetics and American Pragmatism* places the naturalistic pragmatism of John Dewey in conversation with Motoori Norinaga's *mono no aware* a Japanese aesthetic theory of experience to examine gender as a felt experience of an aware or an affective quality of persons By treating gender as an affect Johnathan Charles Flowers argues that the experience of gendering and being gendered is a result of the affective perception of the organization of the body in line with cultural aesthetics embodied in Deweyan habit or Japanese *kata* broadly understood as culturally mediated transactions with the world On this view how the felt sense of identity aligns with the affective organization of society determines the nature of the possible social transactions between individuals As such this book intervenes in questions of personhood broadly and identity specifically by treating personhood itself as an affective sense In doing so this book demonstrates how questions of personhood and identity are themselves affective judgments By treating gender and other identities as aware this book advocates an expanded recognition of the how to be in the world through cultivating new ways of perceiving the affective organization of persons

From Indra's Net to Internet Daniel Veidlinger, 2018-08-31 In this sweeping and ambitious intellectual history Daniel Veidlinger traces the affinity between Buddhist ideas and communications media back to the efflorescence of Buddhism in the Axial Age of the mid first millennium BCE He uses both communications theory and the idea of convergent evolution to show how Buddhism arose in the largely urban milieu of Axial Age northeastern India and spread rapidly along the transportation and trading nodes of the Silk Road where it appealed to merchants and traders from a variety of backgrounds Throughout he compares early phases of

Buddhism with contemporary developments in which rapid changes in patterns of social interaction were also experienced and brought about by large scale urbanization and growth in communication and transportation In both cases such changes supported the expansive consciousness needed to allow Buddhism to germinate Veidlinger argues that Buddhist ideas tend to fare well in certain media environments through a careful analysis of communications used in these contexts he finds persuasive parallels with modern advances in communications technology that amplify the conditions and effects found along ancient trade routes From Indra s Net to Internet incorporates historical research as well as data collected using computer based analysis of user generated web content to demonstrate that robust communication networks which allow for relatively easy contact among a variety of people support a de centered understanding of the self greater compassion for others an appreciation of interdependence a universal outlook and a reduction in emphasis on the efficacy of ritual all of which lie at the heart of the Buddha s teachings The book s interdisciplinary approach should appeal to those interested in not only Buddhism media studies and history but also computer science cognitive science and cultural evolution Handbook of Child Psychology, Theoretical Models of Human Development William Damon, Richard M. Carter, 2012-02-01 In Encounter with Enlightenment Robert E Carter puts forth the East and specifically Japan as a source of possible solutions to the world s social economic and environmental problems Not only is the book a sustained scholarly analysis of both the religious and philosophical roots of Japan s distinctive ethical approach to life but it also provides the Western reader with a context for understanding Eastern values values that although familiar to the West tend to be deemphasized Encounter with Enlightenment begins a horizontal fusion between East and West and establishes a common ground for mutual understanding and for working toward an ethical approach that could resolve some of the earth s difficulties **Feminist Encounters with Confucius** Mathew Foust, Sor-Hoon Tan, 2016-10-11 This work builds on earlier works which defend Confucianism against charges of sexism and present interpretations of Confucianism compatible with Feminism but contributors go beyond the much discussed care ethics and common arguments of how ren humaneness can ground an egalitarian humanism that include gender equality Besides ethics and political philosophy topics this volume includes discussions in other philosophical areas such as epistemology metaphysics and applied philosophy Through the

encounter of Feminism and Confucius's perspectives each contributor generates novel answers to the questions addressed. In some cases authors raise new questions about the chosen topic inadequacies in how it has been addressed in previous Confucian or Feminist discourse and or challenges for either or both Confucianism and Feminism

Culture and Subjective Well-Being Edward Diener, Eunkook M. Suh, 2003-01-24 The question of what constitutes the good life has been pondered for millennia Yet only in the last decades has the study of well being become a scientific endeavor This book is based on the idea that we can empirically study quality of life and make cross society comparisons of subjective well being SWB A potential problem in studying SWB across societies is that of cultural relativism if societies have different values the members of those societies will use different criteria in evaluating the success of their society By examining however such aspects of SWB as whether people believe they are living correctly whether they enjoy their lives and whether others important to them believe they are living well SWB can represent the degree to which people in a society are achieving the values they hold dear The contributors analyze SWB in relation to money age gender democracy and other factors Among the interesting findings is that although wealthy nations are on average happier than poor ones people do not get happier as a wealthy nation grows wealthier
