Self Help Organizations And Professional Practice:

Understanding the Self-Help Organization Thomas J. Powell, 1994-08-17 This book offers useful insights into the current state of research and conceptual models in the field of self help. There are few books available with this specific focus. The reader may be surprised at the diversity of self help groups and how the paradigms for self help differ within the field. The book is suitable for academic libraries and self help professionals. Doody's Health Sciences Book Review Journal. Dr Powell's book illuminates important theoretical, methodological and substantive issues, thereby enriching and informing self help research at a critical time in its development and significance. Keith Humphreys, Ph.D., Center for Health Care Evaluation, Department of Veterans Affairs, Stanford University School of Medicine. This book marks a major advance in methodological and conceptual sophistication in self help group research, which will ultimately benefit society as well as researchers. Leon H. Levy, Ph.D., Professor and Chair, University of Maryland, Baltimore County. While the term self help is sometimes used to refer to a low cost solitary activity, more often it refers to an organized social activity that in the United States alone involves 7.5 million people. Alcoholics Anonymous by itself enrolls huge numbers of people and has an enormous impact on the professional treatment system for alcoholics. In the mental health field, a vigorous consumer and family movement, including groups such as the National Alliance for the Mentally Ill and the National Depressive and Manic Depressive Association, involves hundreds of thousands of members and has caught the attention of the professional system. Understanding the Self-Help Organization provides detailed, comprehensive coverage of this phenomenon. This comprehensive volume focuses attention on three critical areas: public policy and self help participation, particularly by minorities; in self help and explanatory frameworks. Powell concludes this extraordinary volume with six chapters of important findings and case studies within self help activities. Timely and provocative, Understanding the Self-Help Organization is essential reading for researchers, professionals, scholars, and students in the fields of counseling, psychology, organization studies, psychology, and social work. **Self-Help**

Organizations of People with Disabilities in Asia Joseph Kin Fun Kwok, Raymond K.H. Chan, W. T. Chan, 2002-06-30 This is a comparative analysis of the micro and macro characteristics of self help organizations of people with disabilities (SHOPs) in seven selected countries and territories in Asia, namely China Mainland, Hong Kong, Japan, the Philippines, Taiwan, Thailand, and Vietnam. Since the 1980s, SHOPs have prospered in this region and were given a major role in the United Nations forum and the International Year of Disabled Persons in 1981. The analysis shows the differences among the SHOPs in terms of the complexity of their structure, government's affirmative policy, legislation, and leadership qualities. These differences are due to the complex interplay among factors at local, national, and international levels. SHOPs in this region present a rather homogenous perception in their organization, leadership, social inclusion, and globalization, despite the marked differences in their societies. SHOPs tend to be democratic and consensual in nature and led by elected members with assistance from paid professional and clerical support. The self help organizations are positively regarded in these countries. *The Michigan*

Handbook of Community Psychology Julian Rappaport, Edward Seidman, 2012-12-06 As a field progresses people write about their own work in journals chapters and books but periodically the work needs to be collected and organized It needs to be brought together in a format that can both introduce new members to the field and reacquaint continuing members with the work of their colleagues Such a collection also affords an opportunity for the growing number of people with particular expertise to provide a reference for others whose work is related but differs in focus This is the first *Handbook of Community Psychology* It contains contributions from 106 different authors in addition to our editorial introductions Its thirty eight chapters including two that are divided into multiple individually authored parts are concerned with conceptual frameworks empirically grounded constructs intervention strategies and tactics social systems design assessment and analysis cross cutting professional issues and contemporary intersections with community psychology Although interrelated each chapter stands on its own as a statement about a particular part of the field and the volume can serve as a reference for those who may want to explore an area about which they are not yet familiar To some extent community psychologists eschew the distinction between researcher and practitioner and regardless of one's primary work environment university small college practice setting government or grassroots organization there is something of interest for anyone who wants to explore the community psychology approach

Drug Courts James E. Lessenger, Glade F. Roper, 2008-07-17 I've done them all and I'm not talking about stage screen and television I stopped taking drugs in the 1970s and stopped smoking in the 1980s I ceased drinking in the 1990s when I needed a liver transplant and my doctors told me they wouldn't do it if I continued drinking So I stopped got the transplant and became a friend of Bill W Stopping was the best thing I ever did second to marrying Maj My substance abuse started like most people's in high school through peer pressure It progressed while I was on the stage and in the Air Force where alcohol was the drug of choice The problem continued as I worked in motion pictures where the day ended with drinks When I finally made it big in television I was drinking a case of champagne a day I tell myself that I did this because of my insecurities about being at the top but it also tasted good Looking back and having read some of the things in this book I realize that I have the addictive personality and the genetic predisposition to be a substance abuser All that was necessary was a situation in which I was near drugs and had peer pressure to get me going Psychosocial Oncology and Palliative Care in Hong
