Self Management And The Crisis Of Socialism:

Self-management and the Crisis of Socialism Michael Wayne Howard, 2000 While some conclude from the revolutions of 1989 that socialism is dead interest in socialism continues because of persisting problems of contemporary capitalism In this exciting text Michael W Howard offers critiques of liberal communitarian postmodern and some Marxist perspectives in order to develop a left liberal defense of a model of self managed market socialism that includes a basic income for all Specific applications of his view include analyses of its implications for the global marketplace the changing nature of workplaces and media restructuring and ownership This work is sure to be of interest to social scientists public policy makers and economists as well as to feminists ecologists and others concerned with how market socialism is relevant to their social issues

Culture, Society, Economy Don Robotham, 2005-03-23 Robotham offers here a clear headed expos of the limits of classical liberalism in the face of world production today His theme is both urgent and iconoclastic There is an unusual clarity about the exposition and a drive that comes from passionate engagement combined with long experience reading and reflection Keith Hart Goldsmiths College London In Culture Society and Economy Don Robotham examines the failure of recent social theory to grasp the problems of globalization and the emergence of corporate monopoly capital and sets out his own argument for a radical solution He argues that the neglect of economics by both cultural studies and social theory has weakened the ability to develop viable alternatives to present day capitalist globalization With deep awareness of and reference to current events and contemporary trends the author presents a detailed critique of cultural studies in particular Stuart Hall and Paul Gilroy Giddens theory of risk society Scott Lash and John Urry s economies of signs and space Manuel Castells theory of network society The final chapters make a unique argument that the solution to the problems of globalization lies in more globalization rather than adopting an anti globalization or localization position Don Robotham proposes more effective centralized institutions for governing the world economy in other words world government

Economic Justice and Democracy Robin Hahnel, 2013-05-13 In Economic Justice and Democracy Robin Hahnel puts aside most economic theories from the left and the right from central planning to unbridled corporate enterprise as undemocratic and instead outlines a plan for restructuring the relationship between markets and governments according to effects rather than contributions This idea is simple provocative and turns most arguments on their heads those most affected by a decision get to make it It s uncomplicated unquestionably American in its freedom reinforcement and essentially what anti globalization protestors are asking for Companies would be more accountable to their consumers polluters to nearby homeowners would be factory closers to factory town inhabitants Sometimes what s good for General Motors is bad for America which is why we have regulations in the first place Though participatory economics as Robert Heilbroner termed has been discussed more outside America than in it Hahnel has followed discussions elsewhere and also presents many of the arguments for and against this system and ways to put it in place

The State, Identity and Violence R. Brian

Ferguson,2003-09-02 In this book a collection of experts investigate the varied forces from global systems to local beliefs that lead to civil violence chaos and perhaps a new political order The State Identity and Violence explores acts of mass violence occurring within national borders and examines the links such acts have to personal identities and how they challenge the character or very existence of the state Building upon the anthropological premises of holism and cross cultural comparison this volume shows how violent challenges to existing states should be conceptualized as layered problems with multiple kinds of causes It not only goes beyond the ancient hatreds explanation but shows the inadequacy of the concept of ethnic violence and of theories which treat interests and identities as separate sometimes opposed variables **Envisioning the Good Life**
