**Manipulations** Regina Karl, 2025-03-31 To what extent does the production of art require the work of hands And reciprocally to what extent does an artwork enable a tactile understanding of the world At the beginning of the twentieth century the meaning of hands goes beyond the simple gestures they perform they become an agent holding at bay technological progress and its implications for artistic creation On the one side the hand can itself be conceived of as a machine often times it figures as a blueprint for technological tools and instruments On the other side hands appear to be outdone by the continuous rise of mechanization challenging the need for the bodily skills and abilities The ambiguity of the hand as simultaneously a primitive and proto technological instrument frames the theoretical intervention of this book which investigates the hand in European modernism not as a motif but as medium It looks at German and French case studies that address literature sculpture photography film and industrial design As it turns out the medium hand allows to retrace the cultural history of the early twentieth century as an expression of the intricacies and ambiguities that the age of mechanization exhibited in the work of art Assembling Art Barbara Beth Zabel, 2004 **Focus On: 100 Most Popular American Autobiographers** Wikipedia contributors, aka Marcel Duchamp Anne Collins Goodyear, James W. McManus, 2014-12-30 aka Marcel Duchamp is an anthology of recent essays by leading scholars on Marcel Duchamp arguably the most influential artist of the twentieth century With scholarship addressing the full range of Duchamp's career these papers examine how Duchamp's influence grew and impressed itself upon his contemporaries and subsequent generations of artists Duchamp provides an illuminating model of the dynamics of play in construction of artistic identity and legacy which includes both personal volition and contributions made by fellow artists critics and historians This volume is not only important for its contributions to Duchamp studies and the light it sheds on the larger impact of Duchamp's art and career on modern and contemporary art but also for what it reveals about how the history of art itself is shaped over time by shifting agendas evolving methodologies and new discoveries **Avant Garde Film** Alexander Graf, Dietrich Scheunemann, 2007 This volume on avant garde film has emerged as part of a wider reassessment of 20th century avant garde art literature and film carried out in the framework of a research project at the University of Edinburgh It paves the way for a fresh assessment of avant garde film and develops its theory as an integral part of a newly defined conception of the avant garde as a whole by closing the gap between theoretical approaches towards the avant garde as defined on the basis of art and literature on the one hand and avant garde cinema on the other It gathers contributions by the most esteemed scholars in the field of avant garde studies relating to the classical avant garde cinema of the 1920s to new trends emerging in the 1950s and 1960s and to the impact that innovative technologies have recently had on the further development of avant garde and experimental film The contributions reflect the broad range of different moving image media that make up what we refer to today simply as film at the same time as reconsidering the applicability of the label avant

garde to offer a comprehensive and updated framework that will prove invaluable to scholars of both Moving Image Studies and Art History disciplines
