Selfish Generations:

Selfish Generations? David Thomson, 2015-12-23 Our present welfare state has little good reason to survive much longer and we will have to find a new basis for its continued existence So writes David Thomson as he offers an unflinching perspective on how different generations have fared under the social welfare policies of governments since the 1930s *Selfish Generations* is a critical and unsentimental analysis of a key political issue and the questions it raises about support for the young and old and about health education and housing policy are exactly those facing politicians and social welfare policy developers today

The Changing Contract across Generations Vern L. Bengtson,W. Andrew Achenbaum,2024-11-01 Generational conflict has attracted considerable attention in the media and within academic circles during the past decade At the center of this collection of papers analyzing various facets of that conflict lie complex issues of generational equity issues that will remain important for the framing of public policy during the 1990s What do the young and the middle aged owe the elderly In discharging that debt to what extent are they able to provide for their own old age in a climate of changing notions of welfare What light do the longer perspectives of history shed on these issues What role do kinship gender and economic status play The papers commissioned by Bengtson and Achenbaum are intended to give greater analytic rigor to current debates The volume is interdisciplinary not only by theoretical intent but by the practical imperatives of gerontology More than a dozen sociologists economists historians demographers and policy analysts discuss the meanings and ambiguities that are inherent in terms such as generation equity compact contract and conflict in order to assess how relations between the age groups seem to vary from one sociohistorical context to the next This distinguished

group of contributors raises comparative issues throughout assessing variations in generational ties by gender race class and geographic location Several project the extent to which recent changes in the political economy public philosophy and demographic structure of most modern societies presage greater conflicts or greater consensus in family members relationships and social ties

[Making Social Spending Work](#) Peter H. Lindert, 2021-04-08 Reveals the relationship between social spending and economic growth and which countries have got it right and wrong

[The Origins of Morality](#) Dennis Krebs, 2011-08 Why do people behave in moral ways in some circumstances but not in others In order to account fully for morality Dennis Krebs departs from traditional approaches to morality that suggest that children acquire morals through socialization cultural indoctrination and moral reasoning He suggests that such approaches can be subsumed refined and revised gainfully within an evolutionary framework Relying on evolutionary theory Krebs offers an account of how notions of morality originated in the human species He updates Darwin's early ideas about how dispositions to obey authority to control antisocial urges and to behave in altruistic and cooperative ways originated and evolved then goes on to update Darwin's account of how humans acquired a moral sense Krebs explains why the theory of evolution does not dictate that all animals are selfish and immoral by nature On the contrary he argues that moral behaviors and moral judgments evolved to serve certain functions Krebs examines theory and research on the evolution of primitive forms of prosocial conduct displayed by humans and other animals then discusses the evolution of uniquely human prosocial behaviors He describes how a sense of morality originated during the course of human evolution through strategic social interactions among members of small groups and how it was expanded and refined in modern societies explaining how this sense gives rise to culturally universal and culturally relative moral norms Krebs argues that although humans' unique cognitive abilities endow them with the capacity to engage in sophisticated forms of moral reasoning people rarely live up to their potential in their everyday lives Four conceptions of what it means to be a moral person are identified with the conclusion that people are naturally inclined to meet the standards of each conception under certain conditions The key to making the world a more moral place lies in creating environments in which good guys finish first and cheaters fail to prosper

The Evolution of Public Pension Schemes Harrie Verbon, 2012-12-06 1 1 An introduction to the problem This book deals with the development of public pension schemes The operation of public pension schemes has drawn a great deal of attention recently due to ageing of the population which has become apparent since the 1970s This would probably have been less of a problem if these schemes had been financed by a Capital Reserve abbreviated from now on as CR system As is well known in a pure CR system individuals or generations save for their own retirement The average rate of return on the premiums paid in this system equals the real rate of interest and in principle changes in the rate of population growth do not affect the premium rate or the benefit rate of the system Most public pension schemes however are financed by a Pay As You Go abbreviated from now on as PAYG system In this system current pension payments are financed by current premium payments In contrast to the CR

system intergenerational transfers occur in this system If the number of retired people increases relative to the number of workers the premium rate will increase under PAYG In itself this increase does not have to imply any concern for the premium paying population What counts is whether the rate of return under a PAYG system will fall too far below the rate of return the CR system is offering *The New Citizenship of the Family* Henry Cavanna,2017-11-22 This title was first published in 2000 This volume offers international comparative perspectives and critical analyses of the interconnections between family behaviour and its political regulation the new economics of the family and the role of the family in building citizenship **The Fabric of Welfare** Margaret Tennant,2007 Throughout history the welfare of the people has been a contested area Is it the responsibility of the state The churches The extended family Organised charities or informal community groups The Fabric of Welfare is about the many points of contact between voluntary welfare and government social services and the complex pattern woven by these different threads The country s welfare history is shaped by its colonial past with the predominantly British influences transmitted by an immigrant society in the nineteenth century by its Maori population with a strong communal ethos by the shaping forces of the welfare state by two world wars and economic depression and by both free market policies and rapid social change in recent years In tracing the interdependence of state and voluntary provision of welfare from 1840 to 2005 Margaret Tennant offers new perspectives on New Zealand social history This is a rigorous analysis but it is also a history illuminated by people The text is illustrated with stories about the people who were moved to save to reform to care to support and the people who needed that essential sustenance From the nun who sees a distraught woman about to throw her child into the sea and sets out to care for foundlings to city missionaries community minded public servants businessmen philanthropists and the entrepreneurial organisers of floral fetes and telethons these accounts tell us much about the history of welfare in all its interconnections **Micro-Community-Based Participatory Research Health Science Projects, to Problem-solve and Build Leadership skills in Children at risk of ACES in extreme Urban Poverty** Robert A. The Ancestress Hypothesis Kathryn Coe, 2003 In our society it has long been believed that art serves very little social purpose Evolutionary anthropologists however are examining a potential role for art in human evolution Kathryn Coe looks to the visual arts of traditional societies for clues Because they are passed down from previous generations traditional art forms such as body decoration funeral ornaments and ancestral paintings offer ways to promote social relationships among kin and codescendants of a common ancestor Mothers used art forms to anchor themselves and their kin to the father and his kin and to promote the survival and reproductive success of kin and descendants Individuals who abided by this strategy accompanied by its strict codes of cooperation left more descendants than did individuals who did not Over time given this reproductive success large numbers of individuals would be identified as codescendants of a common ancestor and would cooperate as if they were close kin These cooperative codescendants were more likely to survive and leave descendants With each new generation these clans propagated not only their genes but also their behavioral strategy the replication or presence of art The book concludes by examining the changing characteristics of visual art including a higher value on creativity competition and cost when traditional constraints on social behavior disappear
