Greenberg, Sander L. Koole, Tom Pyszczynski, 2013-12-17 Social and personality psychologists traditionally have focused their attention on the most basic building blocks of human thought and behavior while existential psychologists pursued broader more abstract questions regarding the nature of existence and the meaning of life This volume bridges this longstanding divide by demonstrating how rigorous experimental methods can be applied to understanding key existential concerns including death uncertainty identity meaning morality isolation determinism and freedom Bringing together leading scholars and investigators the Handbook presents the influential theories and research findings that collectively are helping to define the emerging field of experimental existential psychology

Genes on the Couch Paul Gilbert, Kent G. Bailey, 2014-07-10 Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy

anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin s theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration Genes on the Couch brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance cooperation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasingly important but diverse area Genes on the Couch will be of interest to psychotherapists psychiatrists and a wide range of mental health professionals

Moral Character Christian B. Miller, 2013-05-09 Christian Miller

presents a new account of moral character Most of our friends colleagues and even family members are not virtuous people They do not have virtues such as compassion honesty or courage But at the same time they are not vicious people either They do not have vices such as cruelty dishonesty or cowardice Instead most people today have characters which do not qualify as either virtuous or vicious They have many positive moral features but also many negative ones too Our characters are decidedly mixed and are much more complex than we might have thought On the one hand many of us would kill an innocent person in a matter of minutes under pressure from an authority figure as part of a psychology study Or we would pretend to not see someone collapse from an apparent heart attack across the street Or we would make a wide circle around someone's dropped papers rather than stop to help pick them up Yet it is also true that many of us would help another person when we are by ourselves and hear sounds of a non ambiguous emergency in the next room Or we would come to the aid of a friend when feeling empathy for her need and do so for altruistic rather than egoistic reasons In Moral Character An Empirical Theory Miller outlines a new picture of our moral character which involves what are called Mixed Character Traits This picture can help make sense of how most of us are less than virtuous people but also morally better than the vicious

Proeve, Steven Tudor, 2016-04-08 Remorse is a powerful important and yet academically neglected emotion This book one of the very few extended examinations of remorse draws on psychology law and philosophy to present a unique interdisciplinary study of this intriguing emotion The psychological chapters examine the fundamental nature of remorse its interpersonal effects and its relationship with regret guilt and shame A practical focus is also provided in an examination of the place of remorse in psychotherapeutic interventions with criminal offenders The book s jurisprudential chapters explore the problem of how offender remorse is proved in court and the contentious issues concerning the effect that remorse and its absence should have on sentencing criminal offenders The legal and psychological perspectives are then interwoven in a discussion of the role of remorse in restorative justice In *Remorse Psychological and Jurisprudential Perspectives* Proeve and Tudor bring together insights of neighbouring disciplines to advance our understanding of remorse It will be of interest to theoreticians in psychology law and philosophy and will be of benefit to practising psychologists and lawyers **Developing the Virtues**

Julia Annas, Darcia Narvaez, Nancy E. Snow, 2016-08-18 Ethicists and psychologists have become increasingly interested in the development of virtue in recent years approaching the topic from the perspectives of virtue ethics and developmental psychology respectively Such interest in virtue development has spread beyond academia as teachers and parents have increasingly striven to cultivate virtue as part of education and child rearing Looking at these parallel trends in the study and practice of virtue development the essays in this volume explore such questions as How can philosophical work on virtue development inform psychological work on it and vice versa How should we understand virtue as a dimension of human personality What is the developmental foundation of virtue What are the evolutionary aspects of virtue and its development How is virtue fostered How is virtue exemplified in behavior and action How is our conception of virtue influenced by context and by developmental and social experiences What are the tensions impediments and prospects for an integrative field of virtue study Rather than centering on each discipline the essays in this volume are organized around themes and engage each other in a broader dialogue The volume begins with an introductory essay from the editors that explains the full range of philosophical and empirical issues that have surrounded the notion of virtue in recent years **Seeing Chekhov** Michael C. Finke, 2018-07-05 Chekhov s keen powers of observation have been remarked by both memoirists who knew him well and scholars who approach him only through the written record and across the distance of many decades To apprehend Chekhov means seeing how Chekhov sees and the author s remarkable vision is understood as deriving from his occupational or professional training and identity But we have failed to register let alone understand just what a central concern for Chekhov himself and how deeply problematic were precisely issues of seeing and being seen from the Introduction Michael C Finke explodes a century of critical truisms concerning Chekhov s objective eye and what being a physician gave him as a writer in a book that foregrounds the deeply subjective and self reflexive aspects of his fiction and drama In exploring previously unrecognized seams between the author s life and his verbal art Finke profoundly alters and deepens our understanding of

Chekhov's personality and behaviors provides startling new interpretations of a broad array of Chekhov's texts and fleshes out Chekhov's simultaneous pride in his identity as a physician and devastating critique of turn of the century medical practices and ideologies. Seeing Chekhov is essential reading for students of Russian literature, devotees of the short story and modern drama, and anyone interested in the intersection of literature, psychology, and medicine.
