Shanidar Ralph S. Solecki, 1972 Shanidar, the First Flower People Ralph S. Solecki, 1971 The exploration of Shanidar Cave in Iraq has resulted in one of the most significant archaeological finds of recent years the first archaeological traces of human nature And Ralph Solecki's firsthand account superbly communicates the excitement the continual surprises the labor ingenuity and technical subtlety that attended the discovery Book jacket *The Palaeolithic Origins of Human Burial* Paul Pettitt, 2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus *Homo* early *Homo sapiens* the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions *The Palaeolithic Origins of Human Burial* offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished **The Origins of Modern Humans** Fred H. biologically grounded it is not biologically determined **Life's Solution** Simon Conway Morris, 2003-09-04 The assassin's bullet misses the Archduke's carriage moves forward and a catastrophic war is avoided So too with the history of life Re-run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly Eyes brains tools even culture all are very much on the cards So if these are all evolutionary inevitabilities where are our counterparts across the galaxy The tape of life can only run on a suitable planet and it seems that such Earth-like planets may be much rarer than hoped Inevitable humans yes but in a lonely Universe

From Atlantis to the Sphinx Colin Wilson, 2004-07-01 In this compelling book Colin Wilson argues that thousands of years before ancient Egypt and Greece held sway there was a great civilization whose ships traveled the world from China to Antarctica Their advanced knowledge of science mathematics and astronomy was

passed on to descendants who escaped to Egypt and South America From Atlantis to the Sphinx bases this assertion on a true fact that archaeologists and geologists are at odds over the age of the Sphinx Archaeologists claim that the Sphinx dates to classical dynastic Egypt around 2 400 b c But some geologists claim that it could have been built as early as 7 000 to 10 500 b c The geologists claim is based on the curious fact that the erosion of the Sphinx is more characteristic of water erosion than that of wind and sand Starting from the assumption that there was an advanced civilization in existence much earlier than previously thought Wilson goes on to claim that it could very well be Atlantis not a literal island that sank but more of a great civilization that either declined naturally or experienced a great catastrophe passing on only a fraction of its knowledge to other peoples From Atlantis to the Sphinx delves into what might have been a completely different knowledge system from that of modern man one as alien to us as that of the Martians The book sets out to reconstruct that ancient knowledge in a fascinating exploration of the remote depths of history a ground breaking attempt to understand how these long forgotten peoples thought felt and communicated with the universe

How Compassion Made Us Human Penelope Spikins, 2015-05-07 An intriguing look at how our capacity to care about and connect with others has contributed to our evolutionary success as a species Our ability to care about the wellbeing of others whether they are close family or strangers can appear to be unimportant in today's competitive societies But in this volume archaeologist Penny Spikins argues that compassion lies at the heart of what makes us human She takes us on a journey from the earliest Stone Age societies two million years ago to the lives of Neanderthals in Ice Age Europe using archaeological evidence to illustrate the central role that emotional connections had in human evolution Simple acts of kindness left to us from millions of years ago provide evidence for how social emotions and morality evolved and how our capacity to reach out beyond ourselves into the lives of others allowed us to work together for a common good and form the basis for human success

The Origins of Human Society Peter Bogucki, 2000-01-04 The Origins of Human Society traces the development of human culture from its origins over 2 million years ago to the emergence of literate civilization In addition to a global coverage of prehistoric life the book pays specific attention to the origins and dispersal of anatomically modern humans the development of symbolic expression the transition from mobile foraging bands to sedentary households early agriculture and its consequences the emergence of social differentiation and hereditary ranking and the prehistoric roots of ancient states and empires The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the

accessibility of its volumes is matched by the style of presentation and production **The Healing Hand** Guido Majno, 1975

This journey to the beginnings of the physician's art brings to life the civilizations of the ancient world Egypt of the Pharaohs Greece at the time of Hippocrates Rome under the Caesars the India of Ashoka and China as Mencius knew it Probing the documents and artifacts of the ancient world with a scientist's mind and a detective's eye Guido Majno pieces together the difficulties people faced in the effort to survive their injuries as well as the odd chilling or inspiring ways in which they rose to the challenge In asking whether the early healers might have benefited their patients or only hastened their trip to the grave Dr Majno uncovered surprising answers by testing ancient prescriptions in a modern laboratory Illustrated with hundreds of photographs many in full color and climaxed ten years of work *The Healing Hand* is a spectacular recreation of man's attempts to conquer pain and disease
