With the publication of ChatGPT in December 2022, a new era of artificial dialogue systems and chatbots has emerged. Many established thinkers and figures have published their stance on the development of this technology, not rarely combined with stark language about its transformative potential and potential risks. New terminologies have found entrance to public and philosophical discourse; new regulatory frameworks have been introduced from small to large scale, and an entire economy has shifted. Many apps have sprung into existence using ChatGPT and other LLMs as a basis for their services; large corporations take the risks of releasing unfinished language models to undercut the competition. In the meantime, many more stakeholders have entered the economic, regulatory, and social discourses on how to deal with this emerging technology. Taking the latest developments in the field into consideration, this completely revised and updated second edition now includes new chapters on the tech ethics of Large Language Models and LLMs as relational technology. The author considers the consequences of chatbots on human relationships, providing analysis on robot rights, human-centered design, and the social tension between robophobes and robophiles. **The Science/Fiction of Sex** Annie Potts, 2014-02-25

What can we learn from exploring the differences in male and female orgasmic experience? Is the penis an entity with a mind of its own? These issues and others, such as the popular portrayals of male sexuality as active and outwardly focused and female sexuality as passive and internally located, are discussed in The Science/Fiction of Sex. Contemporary feminist and poststructuralist theories of sex and gender are explored alongside an investigation of how people make sense of such concepts as heterosexuality, orgasm, sexual dysfunction, femininity, and masculinity, and safer sex practice. Potts asks men and women about their actual experiences of heterosex. This interview material, combined with excerpts from sexological and medical texts and features from film and television, draws attention to the ways in which western cultural constructs influence our ideas and experiences of the body, sex, and gender. Potts also uses deconstructive theory as a textual tool, concentrating on how binary oppositions such as inside

outside and mind body impact on our understandings of heterosex and affect the power relations between women and men She also examines how the radical postmodern theories of the body and sexuality proposed by Irigaray Lyotard and Deleuze and Guattari disrupt such dualistic modes of understanding and experiencing sexualized bodies The Science Fiction of Sex will be of interest to those studying women and psychology as well as gender studies cultural studies feminist studies sociology philosophy public health and education **What to Do about Erectile Dysfunction** Francesca Coltrera,2009
