Van House, Barbara P. Battenfield, 2003-10-10 Viewing digital libraries as sociotechnical systems networks of people and technology interacting with society The contributors to this volume view digital libraries DLs from a social as well as technological perspective They see DLs as sociotechnical systems

networks of technology information artifacts and people and practices interacting with the larger world of work and society As Bruce Schatz observes in his foreword for a digital library to be useful the users the documents and the information system must be in harmony The contributors begin by asking how we evaluate DLs how we can understand them in order to build better DLs but they move beyond these basic concerns to explore how DLs make a difference in people s lives and their social worlds and what studying DLs might tell us about information knowledge and social and cognitive processes The chapters using both empirical and analytical methods examine the social impact of DLs and also the web of social and material relations in which DLs are embedded these far ranging social worlds include such disparate groups as community activists environmental researchers middle school children and computer system designers Topics Documents and society the real boundaries of a library without walls the ecologies of digital libraries usability and evaluation information and institutional change transparency as a product of the convergence of social practices and information artifacts and collaborative knowledge construction in digital libraries

People and Computers XIX - The Bigger Picture Tom McEwan,Jan Gulliksen,David Benyon,2007-12-20 As a new medium for questionnaire delivery the

Internet has the potential to revolutionize the survey process Online Web based questionnaires provide several advantages over traditional survey methods in terms of cost speed appearance flexibility functionality and usability Bandilla et al 2003 Dillman 2000 Kwak they can incorporate links and it is possible to encode difficult skip patterns making such patterns virtually invisible to respondents Despite this and the emergence of numerous tools to support online questionnaire creation current electronic survey design typically replicates the look and feel of pap based questionnaires thus failing to harness the full power of the electronic survey medium A recent environmental scan of online questionnaire design tools found that little if any support is incorporated within these tools to guide questionnaire design according to best practice Lumsden Morgan 2005 This paper briefly introduces a comprehensive set of guidelines for the design of online questionnaires It then focuses on an informal observational study that has been conducted as an initial assessment of the value of the set of guidelines as a practical reference guide during online questionnaire design

2 Background Online questionnaires are often criticized in

terms of their vulnerability to the four standard survey error types namely coverage non response sampling and measurement errors
