Shaping The College Experience Outside The Classroom:

Shaping the College Experience Outside the Classroom James J. Scannell, Kathleen Simpson, 1996 Past generations of American students have met the expenses of going to college by pursuing summer jobs and working around twenty hours a week during the academic year however such employment is not now so readily available and with the cost of college tuition increasing alternative means of funding need to be sought In an attempt to solve the problem a number of universities following the original examples of Cornell devised programs focusing on the creation of useful and career related employment opportunities in order to help students pay for a significant portion of their college expenses This book records the outcome of these programs evaluating firstly what they accomplished through relating the experiences of a number of participants and going on to offer suggestions on setting them up Of interest to all working in higher education and especially careers planners and developers it aims to provide a set of ideas and projects for use with students

Using Typological Approaches to Understand College Student Experiences and Outcomes Shouping Hu, Shaoqing Li, 2011-12-20 Facing a new round of criticisms on the quality of undergraduate education in American colleges and universities higher education administrators are eager to find or create effective programs and practices that can enrich student experiences and enhance outcomes In order to do that those who work at colleges and universities need to have a better understanding of their students Institutional researchers with access to a wealth of student data have the analytical expertise to supply information that can guide institutional policy and practice Typological frameworks particularly can be used to generate such information and this volume presents rich examples of typological approaches to the study of college students Typological research can reveal patterns in students characteristics attitudes and behaviors and how those patterns are related to desirable outcomes such as learning and persistence or to the nature meaning and utility of student faculty interactions outside the classroom Such information can help campus leaders and other concerned groups gain a deeper understanding of their students design

better targeted and intentional interventions to optimize student experiences and maximize student learning and personal development outcomes This is a special supplemental issue of New Directions for Institutional Research Always timely and comprehensive this series provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management **Race, Class, and Affirmative Action** Sigal Alon,2015-11-17 No issue in American higher education is more contentious than that of race based affirmative action In light of the ongoing debate around the topic and recent Supreme Court rulings affirmative action policy may be facing further changes As an alternative to race based affirmative action some analysts suggest affirmative action policies based on class In Race Class and Affirmative Action sociologist Sigal Alon studies the race based affirmative action policies in the United States and the class based affirmative action policies in Israel Alon evaluates how these different policies foster campus diversity and socioeconomic mobility by comparing the Israeli policy with a simulated model of race based affirmative action and the U S policy with a simulated model of class based affirmative action Alon finds that affirmative action at elite institutions in both countries is a key vehicle of mobility for disenfranchised students whether they are racial and ethnic minorities or socioeconomically disadvantaged Affirmative action improves their academic success and graduation rates and leads to better labor market outcomes The beneficiaries of affirmative action in both countries thrive at elite colleges and in selective fields of study As Alon demonstrates they would not be better off attending less selective colleges instead Alon finds that Israel s class based affirmative action programs have provided much needed entry slots at the elite universities to students from the geographic periphery from high poverty high schools and from poor families However this approach has not generated as much ethnic diversity as a race based policy would By contrast affirmative action policies in the United States have fostered racial and ethnic diversity at a level that cannot be matched with class based policies Yet class based policies would do a better job at boosting the socioeconomic diversity at these bastions of privilege The findings from both countries suggest that neither race based nor class based models by themselves can generate broad diversity According to Alon the best route for promoting both racial and socioeconomic diversity is to embed the consideration of race within class based affirmative action Such a hybrid model would maximize the mobility benefits for both socioeconomically disadvantaged and minority students Race Class and Affirmative Action moves past political talking points to offer an innovative evidence based perspective on the merits and feasibility of different designs of affirmative action

same for schoolteachers and professors why are they seen as members of quite separate professions Would the nation s schools be better served if teachers shared more of the authority that professors have long enjoyed Will a slow revolution be completed that enables schoolteachers to take charge of their practice to shoulder more responsibility for hiring mentoring promoting and if necessary firing their peers This book explores these questions by analyzing the essential acts of teaching in a way that will help all teachers become more thoughtful practitioners It presents portraits of teachers most of them women struggling to take control of their practice in a system dominated by an administrative elite mostly male The educational system Gerald Grant and Christine Murray argue will be saved not by better managers but by better teachers And the only way to secure them is by attracting talented recruits developing their skills and instituting better means of assessing teachers performance Grant and Murray describe the evolution of the teaching profession over the last hundred years and then focus in depth on recent experiments that gave teachers the power to shape their schools and mentor young educators The authors conclude by analyzing three equally possible scenarios depicting the role of teachers in 2020
