Shark! H C Stuart Professor Emeritus Robert Reid, PhD, Robert Reid, 2011-03-04 SHARK The cry that strikes fear into the hearts of beach lovers around the world It carries a chill of terror that death is nearby and waiting Or injuries so shocking that the mind recoils from the thought This book chronicles shark attacks both on Australia's fatal shores and overseas It also records miraculous escapes some so bizarre they defy belief and some that display extraordinary courage in the face of extreme peril Robert Reid interviews famous shark hunters and other adventurers who speak for the first time about their dangerous encounters with these fearsome predators Reid investigates the phenomenon of the so called rogue sharks those that stalk and kill humans in numbers in the same place at the same time These are gripping stories that will both fascinate and frighten stories that will take the reader into the realm of these strange but terrible creatures They have ruled the oceans with ruthless efficiency for more than 400 million years They are the silent killers of the deep

The Secret Life of Sharks A. Peter Klimley, 2008-06-17 Marine biologist Pete Klimley swims with the sharks He was one of the first scientists to free dive among sharks and he has spent nearly thirty years studying shark behavior sometimes swimming in schools of several hundred sharks From his firsthand observations he has learned that sharks are not the vicious man eaters that we imagine but fascinating animals with complex behaviors Most people who think of sharks at all think immediately of great white sharks But there are more than four hundred species of shark Dr Klimley has studied several species most notably the great white and the hammerhead He describes the great white as the athlete among sharks and the hammerhead as the Ph D of the shark world In The Secret Life of Sharks Dr Klimley reveals the significant discoveries he made about hammerhead navigation and great white eating habits By studying hammerheads gathered around underwater seamounts Dr Klimley learned that hammerheads rely on sophisticated tracking of ocean floor magnetism to navigate His long term study of great white sharks off the California coast demonstrated that these huge sharks prefer to eat seals and sea lions because of the energy contained in their fatty bodies They are selective eaters not the man eaters we expect and they sometimes go weeks between meals But Dr Klimley did observe a ritualized behavior that great whites practice in order to avoid deadly disputes

over prey that one shark has captured and another wants Although we have learned a great deal about shark behavior says Dr Klimley there is much that we do not know Unfortunately we are destroying these magnificent creatures of the deep through overfishing and degradation of the oceans Already some populations of sharks have declined steeply Vividly written by one of the foremost authorities on sharks The Secret Life of Sharks is a fascinating account of some of the world s most magnificent animals
