## **Shark Attack:**

*Shark Attacks of New York* Patricia Heyer, Robert Heyer, 2021-08-02 New York's crowded beaches can come to halt with the shout of a single word shark. The shores of Long Island and Staten Island and the waters surrounding Manhattan have had more than thirty shark attacks recorded since the days of New Amsterdam. Legend has it that Antony Van Corlear, Peter Stuyvesant's trusted deputy, was killed by a shark crossing Spuyten Duyvil Creek while blowing his famed trumpet. In the summer of 1916, after a series of bloody encounters along the Jersey Shore, sharks terrorized beachgoers of Sheepshead Bay, frightening the entire region. Two incidents on Fire Island in 2018, within mere hours and miles of each other, involved a twelve-year-old and a thirteen-year-old, striking fear in the hearts of parents. Authors Patricia and Robert Heyer chart the history of New York's shark attacks.

**Shark Attacks of the Jersey Shore: A History** Patricia & Robert Heyer, 2020 Every summer, thousands flock to the Jersey Shore for its beaches and boardwalks, but lurking in the depths beyond is a historic threat to tranquility. Dozens of shark attacks and interactions have occurred throughout Jersey Shore history that reveal bravery, heartbreak, and the hubris of man. A boy paid a gruesome price for teasing a trapped shark in the first recorded attack in 1842. The three bloody attacks of 1960 left one man's limb amputated. The horrific summer of 1916 included seven attacks in a two-week span and crafted the caricature of the killer shark that remains in popular culture today. Authors Patricia and Robert Heyer dive into the history of when two apex predators, man and shark, cross paths on the shores of New Jersey.

**The Mammoth Book of Shark Attacks** Alex MacCormick, 2013-11-07 The biggest ever selection of first-hand accounts and news reports of shark attacks, both recent and historical, shows how sharks are masters of the ocean and how we enter their domain at our own risk. Think you're safe in the Med? Read about the Great Whites that thrive near holiday beaches. Think you're safe in large groups? Read about the sinking of the USS Indianapolis in 1945 when hundreds of sailors floated for days in shark-infested waters, being picked off one by one. Think you're safe at home? Read about the 69-year-old man taking his regular evening swim, jumping off his backyard dock straight into the mouth of a bull shark. Many more extraordinary and gruesome accounts, including the shark boat skipper who slit open the belly of a 360 kg tiger shark only to have a human head, pelvis, and arm come tumbling out, provide horrific and moving tales of shark encounters. The courage of survivors and those who have risked their lives to save shark attack victims is truly inspirational. Where can you find sharks? Features on different shark species with illustrations, fact boxes, and maps show where they lurk around the world. Also included are a selection of full-colour photographs and special sections on the life cycle of a shark, how to avoid a shark attack, and how to survive one.

[Shark Attacks](#) Alex MacCormick, 2025-06-25 More horrifying than Jaws because it's true. Since 1990, there have been 283 shark attacks worldwide, 40 of which were fatal. In the past 15 years, reports of shark attacks have substantially increased. Over half the attacks occur in water no deeper than five feet. Believe it or not, shark attacks are still a very real threat to humans. These unspeakably bloody encounters happen in shallow water in safe areas to people just

like you people who thought it could never happen to them HONG KONG 1995 A forty five year old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark she dies before reaching the hospital CALIFORNIA 1993 A man snorkeling with friends is swallowed headfirst halfway down his body luckily the shark spits him back out with only bite wounds AUSTRALIA 1993 A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen foot great white shark HAWAII 1991 Two vacationing friends out for a swim suddenly see a shark the size of a car swim by After one of the women begins thrashing in panic the shark attacks and kills her her body is later recovered with several limbs missing Read on for more blood chilling accounts of people who fell prey to SHARK ATTACKS

**Sharks in the Shallows** W. Clay Creswell, 2021-06-14 A detailed account of over one hundred shark related incidents on the coast of the Carolinas from a shark bite investigator Powerful and mysterious sharks inspire both fascination and fear Worldwide oceans are home to some five hundred species and of those fifty six are known to reside in or pass through the waters off the coast of both North and South Carolina At any given time waders swimmers and surfers enjoying these waters are frequently within just one hundred feet of a shark While it s unnerving to know that sharks often swim just below the surface in the shallows W Clay Creswell a shark bite investigator for the Shark Research Institute s Global Shark Attack File explains that attacks on humans are extremely rare In 2019 the International Shark Attack File confirmed sixty four unprovoked attacks on humans including three in North Carolina and one in South Carolina While acknowledging that they pose real dangers to humans Creswell believes the fear of sharks is greatly exaggerated During his sixteen year association with the Shark Research Institute he has investigated more than one hundred shark related incidents and has maintained a database of all shark human encounters along the Carolina coastlines back to 1817 Creswell uses this data to expose the truth and history of this often sensationalized topic Beyond the statistics related to attacks in the Carolina waters Sharks in the Shallows offers a history of shark human interactions and an introduction to the world of shark attacks Creswell details the conditions that increase a person s chances of an encounter profiles the three species most often involved in attacks and

reveals the months and time of day with the highest probability of an encounter With a better understanding of sharks responses to their environment and what motivates them to attack humans he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment **The Shark Attack Files** Jeff

Great White left its usual deep ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake and incredibly a farming community eleven miles inland, the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry press and politicians and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man and set out to prove it. Museum of Natural History ichthyologist John Treadwell Nichols faced with the challenge of stopping a mythic sea creature about which little was known and most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking pivotal moment in American history with startling immediacy. **Shark Attacks** Blake

Chapman, 2017-11-01. Humans spend more time in or on the water than ever before. We love the beach. But for many people, getting in the water provokes a moment's hesitation. Shark attacks are big news events, and although the risk of shark attack on humans is incredibly low, the fact remains that human lives are lost to sharks every year. *Shark Attacks* explores the tension between risk to humans and the need to conserve sharks and protect the important ecological roles they play in our marine environments. Marine biologist Blake Chapman presents scientific information about shark biology, movement patterns, and feeding behaviour. She discusses the role of fear in the way we think about sharks and the influence of the media on public perceptions. Moving first-hand accounts describe the deep and polarising psychological impacts of shark attacks from a range of perspectives. This book is an education in thinking through these emotive events and will help readers to navigate the controversial issues around mitigating shark attacks while conserving the sharks themselves. What Were the Shark Attacks of 1916? Nico Medina, Who HQ, 2024-04-09. The panic-filled summer of 1916, when multiple deadly shark attacks shocked the nation, is chronicled in this gripping addition to the New York Times Best Selling What Was series. On July 1, 1916, witnesses watched in horror as twenty-eight-year-old Charles Vansant was attacked and killed by a shark in shallow water off Beach Haven, New Jersey, the first recorded shark attack in American history. Scientists claimed a shark could not be responsible, but more deadly attacks soon followed along the Jersey Shore and up the freshwater Matawan Creek, setting off a nationwide panic that led the White House to declare a War on Sharks. In this illustrated book, which features 16 pages of black and white photographs, readers will learn about the likely culprit or culprits in the attacks, the

great white shark and the bull shark and how the bloody summer of 1916 would change how people viewed sharks forever
