Darwin the Writer George Levine, 2011-06-30 Charles Darwin s *On the Origin of Species* arguably the most important book written in English in the nineteenth century transformed the way we looked at the world It is usually assumed that this is because the idea of evolution was so staggeringly powerful Prize winning author George Levine suggests that much of its influence was due in fact to its artistry to the way it was written Alive with metaphor vivid descriptions twists hesitations personal exclamations and humour the prose is imbued with the sorts of tensions ambivalences and feelings characteristic of great literature Although it is certainly a work of science the *Origin* is equally a work of literature at home in the company of celebrated Victorian novels such as *Middlemarch* and *Bleak House* books that give us a unique yet recognisable sense of what the world is really like while not being literally true Darwin s enormous cultural success Levine contends depended as much on the construction of his argument and the nature of his language as it did on the power of his ideas and his evidence By challenging the dominant reading of his work this impassioned and energetic book gives us a Darwin who is comic rather than tragic ebullient rather than austere and who takes delight in the wild and fluid entanglement of things
