Parliament. House of Commons, 1845 **British Medical Journal**, 1886 **The World's First Railway System** Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography British Road Book ...: The northern counties, comp. and ed. by R.T.
