Looking At Cities:

Looking at Cities Allan B. Jacobs, 1985 Allan Jacobs has written a city planning book for everyone with a passion for urban environments His message conveyed in word and vivid image is that the people who make changes in cities base their decisions upon what they see and that their visions and actions which affect the lives of millions have too often been faulty This book is about how to look at and understand urban environments In order to plan sensitively the city and regional planner must walk in look at wonder about and simply enjoy cities Careful observation is a crucial tool for the kind of analysis and questioning necessary to achieve good planning Through observation the city planner and urban activist can learn when an area was built for whom it was built who lives there now how it has changed and how it might be improved for present and future inhabitants Jacobs shows us how to read cities by identifying and discussing the many visual clues and their various meanings in different environments Case studies of American and European cities San Jose San Francisco Cincinnati Bologna Rome and over two hundred striking photographs drawings and maps by the author present ways to read the environment that will prove indispensable for urban planners and will delight all city watchers **Why Cities Look the**

Way They Do Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original **Why Cities Look the Way They Do** will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention Cities and Photography Jane Tormey, 2013-01-17

Cities and Photography Jane Tormey, 2013-01-17 Photographs display attitudes agency and vision in the way cities are documented and imagined **Cities and Photography** explores the relationship between people and the city visualized in photographs It provides a visually focused examination of the city and urbanism for a range of different disciplines across the social sciences and humanities photography and fine art This text offers different perspectives from which to view social political and cultural ideas about the city and urbanism through both verbal discussion and photographic representation It provides introductions to theoretical conceptions of the city that are useful to photographers addressing urban issues as well as discussing themes that have preoccupied photographers and informed cultural issues central to a discussion of city This text interprets the city as a spatial network

that we inhabit on different conceptual psychological and physical levels and gives emphasis to how people operate within relate to and activate the city via construction habitation and disruption Cities and Photography aims to demonstrate the potential of photography as a contributor to commentary and analytical frameworks what does photography as a medium provide for a vision of city and what can photographs tell us about cities histories attitudes and ideas This introductory text is richly illustrated with case studies and over 50 photographs summarizing complex theory and analysis with application to specific examples Emphasis is given to international contemporary photographic projects to provide provide focus for the discussion of theoretical conceptions of the city through the analysis of photographic interpretation and commentary This text will be of great appeal to those interested in Photography Urban Studies and Human Geography *Eco2 Cities* Hiroaki Suzuki, Arish Dastur, Sebastian Moffatt, Nanae Yabuki, Hinako Maruyama, 2010-05-07 This book is a point of departure for cities that would like to reap the many benefits of ecological and economic sustainability It provides an analytical and operational framework that offers strategic guidance to cities on sustainable and integrated urban development *The Roadmap for Sustainable Business and Net Zero Carbon Emission* Henry K. H. Wang, 2023-05-01 What does sustainable business and net zero carbon emission mean for businesses globally How should companies globally transform into sustainable businesses with net zero carbon emissions This book unpacks the institutional organisational and management challenges in pursuing sustainable business and carbon neutrality for businesses In this book Henry K H Wang an internationally recognised Climate and Business expert provides real life cases across different countries and business sectors He outlines potential policy implications and strategy options for companies to consider in their transitions to sustainable business practices He also explores important new global developments in smart cities green transport and carbon solutions and how the adoption of sustainable finance and green investments can accelerate businesses transformation This book will appeal to anyone interested to learn more about the successful planning and execution of sustainable business and net zero carbon neutrality transformations *Reports and Plans, Washington Region* United States. National Capital Park and Planning Commission, 1930 *Urban Land Rent* Anne Haila, 2015-12-14 In *Urban Land Rent* Anne Haila uses Singapore as a case study to develop an original theory of urban land rent with important implications for urban studies and urban theory Provides a comprehensive analysis of land rent theory and the modern city Examines the question of land from a variety of perspectives as a resource ideologies interventions in the land market actors in the land market the global scope of land markets and investments in land Details the Asian development state model historical and contemporary land regimes public housing models and the development industry for Singapore and several other cities Incorporates discussion of the modern real estate market with reference to real estate investment trusts sovereign wealth funds investing in real estate and the fusion between sophisticated financial instruments and real estate *The Venice Variations* Sophia Psarra, 2018-04-30 From the myth of Arcadia through to the twenty first century ideas about sustainability

how we imagine better urban environments remain persistently relevant and raise recurring questions How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery and by which mechanisms do they foster imagination and innovation While past utopias were conceived in terms of an ideal geometry contemporary exemplary models of urban design seek technological solutions of optimal organisation The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication Its urban creativity though came to represent the quintessential combination of place and institutions of its time Through a discussion of Venice and two other works owing their inspiration to this city Italo Calvino's *Invisible Cities* and Le Corbusier's *Venice Hospital* Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic algorithm that is a structure with a small number of rules capable of producing a large number of variations The rapidly escalating processes of urban development around our big cities share many of the motivations for survival shelter and trade that brought Venice into existence Rather than seeing these places as problems to be solved we need to understand how urban complexity can evolve as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the model city that endured a thousand years This book frees Venice from stereotypical representations revealing its generative capacity to inform potential other Venices for the future
