Misemer, 2010 Many critical shifts in concepts of time and society's consciousness of modernity were derived from the railway and World Standard Time in the nineteenth century These innovations restructured the way people viewed the world and dealt with public and private time The forward projectile motion along a linear track mimicked the passage of public chronological time Conversely the train also invoked a private nostalgic view of time as the traveler was yanked from his/her traditional view of the space time continuum via the train's velocity Travelers observed the landscape disappear in their backward glance from the window although the landscape and interior compartment's space remained stagnant This optical illusion caused passengers to perceive the world in new ways Thus the train unveils a conflictive blend of nostalgia and progress in the River Plate as these countries move forward but look back Research in Social Movements, Conflicts and Change Patrick G. **Shifting Practices** Giovan Francesco Lanzara,2016-03-18 How disruptions and discontinuities caused by the introduction of new technologies often reveal aspects of practice not previously observed What happens in an established practice or work setting when a novel artifact or tool for doing work changes the familiar work routines Any unexpected event or change or technological innovation creates a discontinuity organizations and individuals must reframe taken for granted assumptions and practices and reposition themselves To study innovation as a phenomenon then we must search for situations of discontinuity and rupture and explore them in depth In Shifting Practices Giovan Francesco Lanzara does just that and discovers that disruptions and discontinuities caused by the introduction of new technologies often reveal aspects of practice not previously observed After discussing methodological and research issues Lanzara presents two in depth studies focusing on processes of

design and innovation in two different practice settings music education and criminal justice In the first he works with the music department of a major American university to develop Music LOGO a computer system that allows students to explore musical structures with simple composition like exercises and experiments In the second he works with the Italian court system in the design and use of video technology for criminal trials In both cases drawing on anecdotes and examples as well as theory and analysis he traces the new systems from design through implementation and adoption Finally Lanzara considers the researcher s role and the relationship encompassing empathy vulnerability and temporality between the reflective researcher and actors in the practice setting

**Urban Ministry** Ronald E. Peters,2011-07-01 A comprehensive introduction to the particular challenges and opportunities of congregational ministry in urban settings Urban ministry has long been a part of seminary curricula but a basic and definitive understanding of what students should know as they prepare for congregational ministry in the city has remained elusive Too often it is assumed that the theological resources developed for ministry in other settings are adequate for urban ministry but these resources fail to account for the unique challenges and opportunities of the urban setting Ronald Peters clarifies the nature of urban ministry as a theological discipline by showing how its core values of love justice community and reconciliation among others engage the issues of economics education family life public health ethnic relations and religious life in the urban environment Arguing that the city has always served as an arena of God s activity Peters articulates a theological rationale for urban ministry that is both hopeful and yet realistic affirming that God loves the city and its people and encouraging practitioners to do the same
