Federal Probation ,1961 **Moral Choices** Scott B. Rae,2009 Now in its third edition this foremost college ethics text helps students form a basis for practical ethical decision making in contemporary culture Substantial updates and revisions include a new chapter on ethics and economics online resources for instructors current case studies new material on bioethics and stem cell research and more Humanities National Endowment for the Humanities,1976 Liquid

Sociology Mark Davis,2016-05-13 Zygmunt Bauman s liquid sociology confronts the awesome task of reminding individual men and women that an alternative way of living together is within our eminent capabilities if only we start to think differently about our world The metaphor of liquidity which has become such a prominent feature of his writings since 2000 provides us with just such a new interpretation with a novel way of seeing Each chapter in this unique collection takes seriously Bauman s analysis of modernity as liquid throwing new light upon global social problems as well as opening up a space for assessing the nature of Bauman s contribution to sociology and for understanding what may be gained and lost by embracing an artistic sensibility within the social sciences With contributions from internationally renowned scholars this book will appeal to all those interested in Bauman s work especially within sociology social political and cultural theory and to anyone curious about the value of metaphor in interpreting the social world **Making Bodies, Making History** Leslie

A. Adelson,1993-01-01 In West German literature in the 1970s and 1980s bodies functioned not as victims of history nor as allegories for the nation but as sites of contested identities Focusing on conflicts about identity in present day Germany and on literary texts in which the body is an aesthetic construct Leslie A Adelson reformulates questions of embodiment and historical agency questions that continue to haunt culture studies in general and German studies and women s studies in particular This interdisciplinary study of history race gender and nationality offers rich readings of three contemporary prose texts that challenge the suppositions of prevalent literary theory Anne Duden s *bergang* TORKAN s *Tufan* Brief an einen islamischen Bruder and Jeanette Lander s *Ein Sommer in der Woche der Itke* K Adelson s discussion of heterogeneous identities in contemporary German culture boldly explores accountability and innovation in historical process **The Many and the One** Richard Madsen,Tracy B. Strong,2009-01-10 The war on terrorism say America s leaders is a war of Good versus Evil But in the minds of the perpetrators the September 11 attacks on New York and Washington were presumably

justified as ethically good acts against American evil Is such polarization leading to a violent clash of civilizations or can differences between ethical systems be reconciled through rational dialogue This book provides an extraordinary resource for thinking clearly about the diverse ways in which humans see good and evil In nine essays and responses leading thinkers ask how ethical pluralism can be understood by classical liberalism liberal egalitarianism critical theory feminism natural law Confucianism Islam Judaism and Christianity Each essay addresses five questions Is the ideal society ethically uniform or diverse Should the state protect ban or otherwise intervene in ethically based differences How should disagreements on the rights and duties of citizens be dealt with Should the state regulate life and death decisions such as euthanasia To what extent should conflicting views on sexual relationships be accommodated This book shows that contentious questions can be discussed with both incisiveness and civility The editors provide the introduction and Donald Moon the conclusion The contributors are Brian Barry Joseph Boyle Simone Chambers Joseph Chan Christine Di Stefano Dale F Eickelman Menachem Fisch William Galston John Haldane Chandran Kukathas David Little Muhammad Khalid Masud Carole Pateman William F Scheuerman Adam B Seligman James W Skillen James Tully and Lee H Yearley *Humanities* ,1970 *Ethics in Online AI-Based Systems* Santi Caballé,Joan Casas-Roma,Jordi Conesa,2024-04-10 Recent technological advancements have deeply transformed society and the way people interact with each other Instantaneous communication platforms have allowed connections with other people forming global communities and creating unprecedented opportunities in many sectors making access to online resources more ubiquitous by reducing limitations imposed by geographical distance and temporal constraints These technological developments bear ethically relevant consequences with their deployment and legislations often lag behind such advancements Because the appearance and deployment of these technologies happen much faster than legislative procedures the way these technologies affect social interactions have profound ethical effects before any legislative regulation can be built in order to prevent and mitigate those effects Ethics in Online AI Based Systems Risks and Opportunities in Current Technological Trends features a series of reflections from experts in different fields on potential ethically relevant outcomes that upcoming technological advances could bring about in our society Creating a space to explore the ethical relevance that technologies currently still under development could have constitutes an opportunity to better understand how these technologies could or should not be used in the future in order to maximize their ethically beneficial outcomes while avoiding potential detrimental effects Stimulating reflection and considerations with respect to the design deployment and use of technology will help guide current and future technological advancements from an ethically informed position in order to ensure that tomorrow such advancements could contribute towards solving current global and social challenges that we as a society have today This will not only be useful for researchers and professional engineers but also for educators policy makers and ethicists Investigates how intelligent technological advances might be used how they will affect social interactions and what ethical consequences they might have for society Identifies and reflects on questions

that need to be asked before the design deployment and application of upcoming technological advancements aiming to both prevent and mitigate potential risks as well as to identify potentially ethically beneficial opportunities Recognizes the huge potential for ethically relevant outcomes that technological advancements have and take proactive steps to anticipate that they be designed from an ethically informed position Provides reflections that highlight the importance of the relationship between technology their users and our society thus encouraging informed design and educational and legislative approaches that take this relationship into account
