

The Challenges of Public Administration, Good Governance and Service Delivery in the 21st Century

Essien D. Essien, University of Uyo, Uyo, Nigeria

ABSTRACT

Contemporary studies on public administration in Nigeria have revealed two dramatic findings. First, despite the moderate achievements in democratic governance and being rich in natural and human resources, there remain many politico-administrative challenges to be addressed in Nigeria. Second, ailing public administration has resulted in disturbing socio-economic indicators which are among the worst in the world. This paper examines the challenges of public administration for effective service delivery and good governance in Nigeria. The paper employs descriptive method of research and content analysis which is anchored on 'efficiency theory' to examine the subject matter. Findings reveal that, notwithstanding the dramatic administrative reforms, citizen's confidence in government service is near an historic low because of poor service delivery and exclusionary policies. The paper submits that the label of poor performance and absence of excellence in the public service has the tendency to undermine development and good governance in Nigeria.

INTRODUCTION

Despite the disturbing socio-economic indicators facing Africa today, there is an increasingly broadly-held conviction that efforts toward modernizing African States cannot succeed unless they are equipped with public administrations that are geared toward meeting the new challenges of economic and social development (Ajayi, 2008). This is why administrative actions and modalities of government operation continue to be the object of criticism both by users and by civil society. It lends credence to the fact that the organization, role and missions of public administrations must in fact be reviewed and adapted to the political, economic and social context of African States, which has changed considerably over the last decade (Anazodo, 2009). In that regard, public administrations in many countries in Africa such as Nigeria are today faced with

Hong Kong's Governance Under Chinese Sovereignty Brian C. H. Fong, 2014-09-04 As a hybrid regime Hong Kong has been governed by a state business alliance since the colonial era However since the handover in 1997 the transformation of Hong Kong's political and socio economic environment has eroded the conditions that supported a viable state business alliance This state business alliance which was once a solution for Hong Kong's governance has now become a political burden rather than a political asset to the post colonial Hong Kong state This book presents a critical re examination of the post 1997 governance crisis in Hong Kong under the Tung Chee hwa and Donald Tsang administrations It shows that the state business alliance has failed to function as an organizational machinery for supporting the post colonial state and has also served to generate new governance problems Drawing upon contemporary theories on hybrid regimes and state capacity this book looks beyond the existing opposition centered explanations of Hong Kong's governance crisis By establishing the causal relationship between the failure of the state business alliance and the governance crisis facing the post colonial state Brian C H Fong broadens our understanding of the governance problems and political confrontations in post colonial Hong Kong In turn he posits that although the state business alliance worked effectively for the colonial state in the past it is now a major problem for the post colonial state and suggests that Hong Kong needs a realignment of a new governing coalition Hong Kong's Governance under Chinese Sovereignty will enrich and broaden the existing literature on Hong Kong's public governance whilst casting new light on the territory's political developments As such it will be welcomed by students and scholars interested in Chinese politics Hong Kong politics and governance

Development and the State in the 21st Century Erica Frantz, Natasha M. Ezrow, Andrea Kendall-Taylor, 2015-10-26 Development and the State in the 21st Century provides a comprehensive analysis of the state's role in contemporary development. The book examines the challenges that states face in the developing world from lasting poverty and political instability to disease and natural disasters and explores the ways in which states can build capacity to surmount these challenges. It takes seriously the role that state institutions can play in development while also looking at what institutional reform entails and why this reform is critical for policy recommendations to work. This analysis is set in the context of the evolution of both development practice and development theory. Chapters are organized around the key issues in the field and deploy a wide range of examples from different countries. A range of case studies throughout the text demonstrate the variety of problems development practitioners face and the key theoretical debates surrounding the subject. This text will be particularly useful to students of development and politics who wish to understand how governance and state building can improve countries' economic performance and end cycles of poverty.
