Analysing Buildings from Context to Detail in Time Hielkje Zijlstra,2009 Technology provided the author of this book with the inspiration to develop a more comprehensive research method to assess buildings Analysing Buildings from Context to Detail in time ABCD Research Method Technology at academic level should be considered in the analysis of a building In this book the focus is on construction engineering the study of the requirements associated with constructing buildings Providing information on practice is a key element in construction engineering which is a learning process Changes are made during the life of a building and they might be made differently if the history and technical aspects of the building were studied in greater detail Both maintenance and changes require us to understand the building concerned *Historic Preservation* ,1992 Architectural Record ,1994 New Uses for Obsolete Buildings Jo Allen Gause,Bruce M. Hoch,John D. Macomber,Jonathan F. P. Rose,1996 *Architecture* ,1997 *Progressive Architecture* ,1990 *Design Book Review* ,1991 *Concerning Buildings* Stephen Marks,1996 Concerning Buildings has been prepared in honour of Sir Bernard Feilden CBE a leading and outstanding practitioner in the field of the conservation and repair of historic buildings for forty years or more having originally studied architecture as a mature student at the Architectural Association after the Second World War he was born in 1919 The book was not however intended to be about him except for a warm tribute written by Professor Patrick Nuttgens and a full bibliography of his works compiled by Keith Parker its purpose rather is to cover a co ordinated and wide range of conservation issues theoretical and practical and to be regarded as a reference work for our position and our achievements in the art of conservation today The book contains a wealth of interest and a mine of information for all who are concerned about the present state and approaches to the conservation of buildings in all parts of the world It will be especially useful to those who teach those who want to learn those who own and manage old buildings and those whose job it is to look after them **American Vernacular Architecture 1870 To 1960** Herbert Gottfried,Jan Jennings,2009-07-07 A comprehensive examination of American vernacular buildings *A Building History of Northern New England* James L. Garvin,2002-05 The first and only full scale technical and stylistic analysis of 200 years of architectural evolution in northern New England *The Construction Specifier* ,1990 Restoring Old Buildings for Contemporary Uses William C. Shopsisin,1989 **Historic Indoor Microclimate of the Heritage Buildings** Marco Pretelli,Kristian Fabbri,2017-10-24 Offering readers essential insights into the relationship between ancient buildings their original and

current indoor microclimates this book details how the generally virtuous relationship between buildings and their typical microclimate changed due to the introduction of new heating ventilation and air conditioning HVAC systems in historic buildings The new approach to the study of their Historic Indoor Microclimate HIM put forward in this book is an essential component to monitoring and evaluating building and artefact conservation Highlighting the advantages of adopting an indoor microclimatic approach to the preservation of existing historic materials by studying the original conditions of the buildings the book proposes a new methodology linking the preservation restoration of the historic indoor microclimate with diachronic analysis for the optimal preservation of historic buildings Further it discusses a number of frequently overlooked topics such as the simple and well coordinated opening and closing of windows an example extracted from a real case study In turn the authors elaborate the concept of an Historic Indoor Microclimate HIM based on Original Indoor Microclimate OIM which proves useful in identifying the optimal conditions for preserving the materials that make up historic buildings The book s main goal is to draw attention to the advantages of an indoor microclimatic approach to the preservation of existing historic materials manufacture by studying the original conditions of the buildings The introduction of new systems in historic buildings not only has a direct traumatic effect on the actual building and its components but also radically changes one of its vital immaterial elements the Indoor Microclimate Architects restorers and engineers will find that the book addresses the monitoring of the indoor microclimate in selected historic buildings that have managed to retain their original state due to the absence of new HVAC systems and reflects on the advantages of a renewed attention to these aspects
