New Contributions To Transportation Analysis In Europe:

New Contributions to Transportation Analysis in Europe Michel Beuthe, Peter Nijkamp, 1999 *New Contributions to Transportation Analysis in Europe* Michel Beuthe, Peter Nijkamp, 1999 *New Contributions to Transportation Analysis in Europe* Michel Beuthe, Peter Nijkamp, 2018-10-11 First published in 1999 this volume responded to the drastic fluctuations in policy changes within the European Union and explored the potential for the various transportation framework programmes financed by the European Commission The contributors offer an array of recent advances in transportation with a particular focus on Europe Areas explored include sustainability multimodal transport policy freight transport services transport telematics regionalism transalpine freight transport just in time production and the integration of strategic infrastructure networks in Europe Policy Analysis of Transport Networks Marina Van Geenhuizen, Piet Rietveld, 2016-04-22 Interdisciplinary contributors from across Europe and the USA join together in this book to provide a timely overview of the latest theories and policies related to transport networks They cover topical issues such as environmental benefits of substitution of aviation by high speed trains incident management impacts of aviation deregulation and time savings in freight transport The book also breaks new ground on the development of new methods of cost benefit analysis and other approaches in policy analysis *European Transport Policy and Sustainable Mobility* Jonas Akerman, David Banister, Karl Dreborg, Peter Nijkamp, Ruggero Schleicher-Tappeser, Dominic Stead, Peter Steen, 2000-10-26 It is now widely accepted that transport is becoming increasingly unsustainable and that strong policy intervention is required to reduce both the growth in transport demand and the environmental costs of transport This book challenges conventional approaches to transport by moving away from trend based analysis towards the use of scenarios to identify alternative sustainable transport futures It both summaries the development of EU transport policy and presents a critique The policy context is widened to include the global changes taking place in economics society and technology It develops new methodologies for policy making for the next 25 years **International Symposium on Theory and Practice in Transport Economics Key Issues for Transport beyond 2000 15th International Symposium on Theory and Practice in Transport Economics, Tessaloniki, Greece, 7th - 9th June 2000** European Conference of Ministers of Transport, 2002-06-07 A clear dichotomy exists between an European economy centred on international trade and the environmental damage to which this focus gives rise There is a need for a novel approach based on a shift away from the goal of ever faster travel and **Globalized Freight Transport** T. R. Leinbach, 2007-01-01 The editors as well as the authors of these essays should be commended for bringing together and discussing within this volume many of the important issues facing globalized freight movements Robert Martin The Professional Geographer Leinbach and Capineri have produced an interesting and useful addition to the literature on this massive subject Anthony Beresfore International Journal of Maritime History Globalization is a fashionable issue But solid research on the conditions and implications for freight transport is badly missing This volume contains a

unique set of high quality contributions on freight transport in the age of globalization It offers a wealth of original insights to both the research and policy making community Peter Nijkamp VU University Amsterdam The Netherlands The worldwide movement of freight has emerged as one of the most critical and dynamic aspects of the transport sector The contributors to this study examine the current state of global freight transport with an emphasis on Europe and North America and their extra regional linkages These original contributions synthesize existing knowledge highlight new developments problems and possible solutions and underscore the need for further research The book s starting point is the fact that freight transport is the main element supporting global supply and commodity chains from the transformation of raw materials to market distribution and after market services However as the authors point out the rising costs associated with security and various other constraints as well as the complexity of getting goods delivered is adding to profit pressures faced by manufacturers around the globe Despite the application of technology and increasingly efficient solutions to the movement of freight constraint points and conditions obstructing smooth operations and sustainability have developed These difficulties affect both the environment and economic growth Examining the issues from four critical perspectives intermodality e commerce and technology logistics and sustainability Globalized Freight Transport captures the concern for the viability of freight systems and the ways they are impacting the global economy This cutting edge study will be of great interest to students and scholars of transportation as well as to public sector policymakers and private sector managers

Transport Planning David Banister, 2002 Transport is central to many of the current planning and policy debates Completely revised and restructured the new edition of Transport Planning describes the evolution of transport policies and planning linking the past with the contemporary and future debates It is divided into two main parts A Retrospective Analysis describes the recent past and how the current situation in research and practice on transport planning has developed Evidence is taken from Great Britain and the United States illustrating the similarities in thinking across transport planning and evaluation There is a review of the radical policy alternative presented by the market approach to transport provision and a complementary new chapter on events since 1997 with the difficulties of finding the means to introduce the social market The first part ends with a discussion on the limitations of transport planning in terms of both its theoretical foundations and of the approaches currently being used The second part of the book begins with a Comparative Analysis of experience in three European countries Germany France and the Netherlands and the United States It covers both transport planning and evaluation where difference approaches have been developed in response to national policy issues and the different cultural and analytical traditions This experience provides a useful context for interpreting the new agenda in the UK This is followed by a Prospective Analysis of the key issues facing transport planners in the twenty first century including the need to replace existing infrastructure to build new infrastructure and to ensure the optimal use of existing infrastructure All these issues will necessitate different analytical approaches particularly where new forms of financing are required and as the new

political relationships between the state and market are stabilised Some form of strategic vision is required together with a planning framework within which the market can operate

Transport Projects, Programmes and Policies John Nellthorp, Peter Mackie, 2017-11-30 This title was first published in 2003 The European Union is constantly struggling to find effective ways to plan major transport infrastructure developments at a European level This is a critical factor in the emerging debates surrounding the absorption of the accession states into the EU but it is essential for these states that their economic competitiveness is supported by appropriate and effective transport infrastructure It is therefore crucial to find innovative approaches to the infrastructure itself how it is financed and the ways in which proper evaluation procedures are implemented to select which policies programmes and projects should be supported This informative volume brings together leading international specialists in economic evaluation applied within the transport sector Their contributions encompass all the main levels at which transport planning is typically conceptualized strategic regional policy programme and project planning It therefore examines how coherent economic evaluation practice can be developed and applied not only across different physical scales but also across national borders

Spatial Dynamics, Networks and Modelling Reggiani, A. Nijkamp, P., 2006 the editors have done an excellent job in bringing together a comprehensive collection of cutting edge research findings on network theory Sierdjan Koster European Spatial Research and Policy

A Decision Support System for Intermodal Transport Policy Cathy Macharis, E. Pekin, A. Caris, B. Jourquin, 2008 In this informative and well researched account the new developments in intermodal transport are discussed and special attention is given to evaluation models and policy measures in this field Describing the three core models that have been either developed or enhanced to create an overall assessment framework for intermodal transport policies in Belgium a multimodal freight model NODUS a discrete event simulation model of the inland waterway network and its terminals SIMBA and a Location Analysis Model for Belgian Intermodal Terminals LAMBIT this record analyzes the effectiveness and sustainability of policy measures in terms of modal shift external costs and capacity restrictions associated with the freight infrastructure network

The Economic Effects of Air Transport Market Liberalisation Eyden Samunderu, 2024-09-19 This book rigorously examines the air transport market liberalisation process on the African continent and presents key highlights challenges and impediments to embracing an open skies market environment in Africa It focuses on the economic impact of air transport liberalisation policy constraints challenges of harmonisation and regional economic integration and its impact on air transport development employing a quantitative assessment based on the Air Transport Liberalisation Index ALI to evaluate how an open skies policy would change the competitive dynamics of air transport in Africa Adopting a two tier gravity model the book explores how demand and route networks would be impacted by the deregulation of the air transport market The book also applies a historical perspective by evaluating the initial ratification of the Yamoussoukro Declaration 1999 which acted as a catalyst for Africa s 2063 regional agenda focused on establishing the Single African Air Transport Market SAATM The book also

provides a comprehensive analysis of the African Continental Free Trade Area AfCFTA exploring its multifaceted impacts on Africa's single market from economic regulatory and sustainability perspectives This includes an introduction to the AfCFTA highlighting its inception as a major step towards continental economic integration aimed at enhancing intra African trade promoting sustainable development and fostering industrial diversification It then examines the capacity and competency building of African aviation personnel Training gaps and skills are extensively evaluated to ensure that the African region is prepared for the new competitive equilibrium post SAATM The book also raises critical questions regarding the status of the African air transport market Firstly with the introduction of an open skies policy in Africa will the national flag carriers be able to compete under the new market dynamics Will the SAATM become a game changer in paving the way for the privatisation of some of Africa's poor performing airlines Will the SAATM create a competitive market and a shift in airfares How will policymakers deal with the excessive aviation taxes fees and charges that make airfares in Africa the highest in the world What will the economic benefits be for signatory states that embrace the SAATM Will there be a significant growth trajectory in terms of air travel demand This book is intended for researchers studying air transport economics in developing markets graduate students with a primary focus on air transport development senior policymakers and professionals at governmental agencies and industry practitioners who want to expand their understanding of the dynamics shaping Africa's air transport landscape

ECMT Round Tables Transport and Economic Development European Conference of Ministers of Transport, 2002-09-18 The linkage between transport and economic development is a highly contentious issue which has generated considerable debate This Round Table set out to clarify this issue by analysing the arguments for and against the presumed linkage between transport infrastructure and economic development Managing the Fundamental Drivers of Transport Demand European Conference of Ministers of Transport, 2003-03-21 This proceedings reviews the key determinants of transport demand both inside and outside the field of traditional transport Ministry responsibilities and identifies measures for influencing these key factors

The Economics of Airport Operations James Peoples, John Bitzan, 2017-10-03 This volume examines the role that airports play in economic development and land values the regulation and economic efficiency of airports airport pricing and competition and the role played by airports in influencing airline operations and networks

Air Transport Provision in Remoter Regions Svein Bråthen, 2016-03-23 This book stems from a series of biennial conferences devoted to issues affecting air transport provision in remoter regions that have been organized by the Centre for Air Transport in Remoter Regions at Cranfield University The primary aim of the conferences has been to provide an opportunity for those responsible for operating managing regulating and financing air transport services and associated infrastructure in these areas to be informed of the latest best practice initiatives to contrast different policy approaches and to debate potential solutions to perennial problems Remoter regions has been a neglected area of air transport as much of the focus of public and media attention is on the larger airlines airports and aircraft While the number

of large airports in the world is in the hundreds there are many thousands of smaller airports providing communities all over the globe with vital air links More often than not these services and the airports to which they are operated are loss making and require subsidies to sustain them There are therefore many more interested parties involved in both providing and deciding issues relating to the provision of air transport in these situations most especially central regional and local governments who are charged with financing these activities The book contains 17 chapters from experts in remote region air transport within the following 5 sections Key economic and socio economic issues Subvention mechanisms Route development initiatives Infrastructure provision Issues affecting the provision of air services in remoter regions

Globalization and Regional Economic Modeling Russel Cooper,Kieran Donaghy,Geoffrey Hewings,2007-09-23

Globalization is affecting regional economies in a broad spectrum of aspects from labor market conditions and development policies to climate change To understand better how this works we need both conceptual and methodological contributions We need new schemes to organize our thinking direct our attention and frame thought experiments on the basis of which guidance may be offered And we need methodological innovations that enable us to carry out studies and thought experiments at levels of spatial and temporal resolution and formal complexity adequate to capture and account for the phenomena that characterize globalization The chapters of this volume written by an international cast of eminent regional scientists represent contributions of both types in many cases introducing and demonstrating the use of new tools for analyzing and understanding enormous changes underway in regional economies around the world *Cumulated Index to the Books* ,1999 European Access ,2000 IATSS Research Kokusai Kōtsū Anzen Gakkai,2000
