New Directions In Analytical Political Economy

Yoram Barzel, Douglas W. Allen

New Directions In Analytical Political Economy:

New Directions in Agrarian Political Economy Ryan Isakson, 2017-10-02 How relevant are the classic theories of agrarian change in the contemporary context This volume explores this question by focusing upon the defining features of agrarian transformation in the 21st century the financialization of food and agriculture the blurring of rural and urban livelihoods through migration and other economic activities forest transition climate change rural indebtedness the co evolution of social policy and moral economies and changing property relations Combined the eleven contributions to this collection provide a broad overview of agrarian studies over the past four decades and identify the contemporary frontiers of agrarian political economy In this path breaking collection the authors show how new iterations of long evident processes continue to catch peasants and smallholders in the crosshairs of crises and how many manage to face these challenges developing new sources and sites of livelihood production This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies

Analytical Political Economy Roberto Veneziani, Luca Zamparelli, 2018-06-11 Offering a unique picture of recent developments in a range of non conventional theoretical approaches in economics this book introduces readers to the study of Analytical Political Economy and the changes within the subject Includes a wide range of topics and theoretical approaches that are critically and thoroughly reviewed Contributions within the book are written according to the highest standards of rigor and clarity that characterize academic work Provides comprehensive and well organized surveys of cutting edge empirical and theoretical work covering an exceptionally wide range of areas and fields Topics include macroeconomic theories of growth and distribution agent based and stock flow consistent models financialization and Marxian price and value theory Investigates exploitation theory trade theory the role of expectations and animal spirits on macroeconomic performance as well as empirical research in Marxian economics

Interactions in Analytical Political Economy Mark Setterfield, 2019-07-23 In this interactive collection of essays many of the leading proponents of analytical political economy examine major macroeconomic issues through the integration of mathematical analysis and non neoclassical economic theory The topics covered include the macroeconomics of the labor market open economy issues economic growth and macroeconomic policy The chapter comment reply format of the book creates a genuine dialogue on each theme and evokes a sense of unfolding debate which draws the reader into the discussion

New Directions In Comparative Politics, Third Edition Howard Wiarda, 2019-03-06 This text sees the new diversity of approaches as healthy and invigorating The diversity in comparative politics over the past two decades has been reflected in prior editions of this book

New Directions in Analytical Political Economy Amitava Krishna Dutt, 1994 New Directions in Analytical Political Economy brings together an important collection of economic research by scholars from a wide range of non neoclassical research traditions This book provides a flavour of recent research in non neoclassical economic theory drawing on classical Marxian post Keynesian and Kaleckian structuralist evolutionary and institutional

approaches using mathematical analysis The papers deal with a variety of themes including unemployment financial crises and business cycles technological change and long run growth value prices and pricing and international terms of trade the role of agriculture foreign exchange and fiscal constraint on growth hyperinflation and wage indexation and stability in mixed economies The contributors base their analysis on the structure history and institutions at hand and not just on ever more elaborate optimizing principles as is fashionable in mainstream economics However they do not turn their backs on mainstream concepts and methods using formal mathematical models to conduct their analysis in a rigorous way Combining a broad approach to economics with mathematically based analysis this important new book will be welcomed by economists wanting to go beyond the boundaries of neoclassical economics without losing the rigour of modern economic theory

New Directions In Comparative Politics Howard J. Wiarda, 2018-03-09 As must reading for anyone interested in comparative politics this text is designed to address the theoretical developments and approaches important to the comparative study of political systems today These include developmentalism dependency theory corporatism state society relations political economy public policy analysis indigenous theories of change rational choice and the new institutionalism This text sees the new diversity of approaches as healthy and invigorating The diversity in comparative politics over the past two decades has been reflected in prior editions of this book Whereas these separate approaches once may have been regarded as fragmentary now scholars have come to regard the diverse lines of inquiry as lending complimentary tools of analysis to our complex modern world The emerging methods of comparative study often provide causeways between previous islands of theory In this new edition all the main approaches to comparative politics are represented in chapter length treatment Several contributors revisit the topics they addressed in the prior editions e g Tony Smith on dependency analysis Lawrence Graham on public policy and Joel Migdal on state society relations Most significantly the third edition introduces readers to new provocative analyses such as Paul Adams on corporatism Anthony Gill on political economy Ronald Inglehart on political culture Gerardo Munck on rational choice A H Somjee on indigenous theory and Frank L Wilson on the new institutionalism Introductory and concluding essays by editor Howard J Wiarda integrate the book placing the different approaches in perspective *Turbulence and New Directions in Global Political Economy* J. Busumtwi-Sam, L.

Dobuzinskis, 2002-11-26 James Busumtwi Sam and Laurent Dobuzinskis have assembled a leading team of experts in the field to examine how phenomena associated with globalization impact on political economy in theory and in practice The volume employs a variety of theoretical and analytical approaches to examine the very changeable nature of the global political economy in terms of academic analysis policy and practice New Directions in Trade Theory James Levinsohn, Alan V. Deardorff, Robert Mitchell Stern, 1995 Develops ideas and offers new approaches to the topic of trade theory *Rethinking Economic Development, Growth, and Institutions* Jaime Ros, 2013-09 Presents the contributions that early development theory can make to growth economics in answering why some countries are richer than others and why some economies

grow faster than others Markets, Unemployment and Economic Policy Philip Arestis, Gabriel Palma, Malcolm Sawyer, 2005-10-19 In this volume more than 40 leading economists pay tribute to and critically evaluate Geoff Harcourt's work Contributors include Tony Atkinson Tony Lawson Edward Nell and Ian Steedman *Non-natural Social Science* Neil De Marchi, 1993 Published in 1989 Philip Mirowski's *More Heat Than Light* Economics as Social Physics Physics as Nature's Economics offered a challenge to historians of economics that could not be ignored Neo-classical economics he said adopted certain analytical tools of mid-nineteenth century physics simply substituting utility for energy and in so doing chose a natural world model which denied that economic knowledge might be essentially social and cultural The essays in this collection represent the first collective effort to respond to Mirowski's challenge by examining and assessing the Mirowski enterprise In addition to questioning the veracity of the connection between physics and economics the contributors consider the far-reaching implications of Mirowski's thesis for the history of economics Mirowski shows that economic texts must be viewed in their relation to texts outside the field of economics and offers an alternative reading of economic texts as social and cultural inscriptions As historians of economics respond to Mirowski's challenge the style and direction of their work will be changed Ultimately a careful assessment of *More Heat Than Light* may introduce historians of economics to recognize that the discipline of economics may not be the most appropriate category from which to proceed Contributors Jack Birner Marcel Boumans A W Coats Avi J Cohen I Bernard Cohen Neil de Marchi Steve Fuller Clifford G Gaddy Wade Hands Albert Jolink Arjo Klammer Robert Leonard Philip Mirowski Theodore M Porter Margaret Schabas E Roy Weintraub Encyclopedia of Political Economy Phillip O'Hara, 1999-02-04 This groundbreaking Encyclopedia is the very first fully refereed A-Z compendium of the main principles concepts problems institutions schools and policies associated with political economy Based on developments in political economy since the 1960s it is designed to provide a comprehensive introduction to the field as well as being an authority **Development and Growth in the Mexican Economy** Juan Carlos Moreno-Brid, Jaime Ros, 2009-04-23 This book is the first comprehensive and systematic English language treatment of Mexico's economic history to appear in nearly forty years Drawing on several years of in-depth research Juan Carlos Moreno-Brid and Jaime Ros two of the foremost experts on the Mexican economy examine Mexico's current development policies and problems from a historical perspective They review long-term trends in the Mexican economy and analyze past episodes of radical shifts in development strategy and in the role of markets and the state This book provides an overview of Mexico's economic development since Independence that compares the successive periods of stagnation and growth that alternately have characterized Mexico's economic history It gives special attention to developments since 1940 and it presents a re-evaluation of Mexico's development policies during the State-led industrialization period from 1940 to 1982 as well as during the more recent market reform process This reevaluation is critical of the dominant trend in economic literature and is revisionist in arguing that in particular the market reforms undertaken by successive Mexican governments since 1983 have not addressed

the fundamental obstacles to economic growth Development and Growth in the Mexican Economy also details the country's pioneering role in launching NAFTA its membership in the OECD and its radical macroeconomic reforms Carefully argued and meticulously researched the book presents a wide ranging authoritative study that not only pinpoints problems but also suggests solutions for removing obstacles to economic stability and pointing the Mexican economy toward the road to recovery

Microeconomics, Macroeconomics and Economic Policy P. Arestis, 2011-07-26 Microeconomics

Macroeconomics and Economic Policy are at the core of research and study in economics The essays in this volume have been specifically commissioned and brought together to celebrate the work of Malcolm Sawyer who has made substantial contributions in these areas

Rethinking Capitalist Development Tracy Mott, Nina Shapiro, 2004-10-28 This collection honours the work of the eminent economist Josef Steindl Steindl's work is illuminated through a critical appraisal of its central constructs with a focus on its relevance to current economic conditions This collection charts the thinking of one of the leading economic theorists of the twentieth century

21st Century Keynesian Economics P. Arestis, Malcolm Sawyer, 2015-12-11 The current global financial and economic crisis has called for the revival of Keynesian theory This sixth volume in the International Papers in Political Economy IPPE series focuses on twenty first century Keynesian economics in terms of both theory and application

Economic Analysis of Property Rights Yoram Barzel, Douglas W.

Allen, 2023-08-31 Economic property rights are the fundamental unit of economic analysis necessary to resource allocation organizations and institutions

Letter to the Queen Manfred J. Holler, 2010

Business Cycles: Theory and Empirical Methods Willi Semmler, 2012-12-06 In macrodynamics and business cycle analysis we find nowadays a variety of approaches elaborating frameworks for studying the fluctuations in economic and financial data These approaches are viewed from Keynesian monetarist and rational expectations standpoints There are now also numerous empirical methods for the testing of nonlinear data generating mechanisms This volume brings together a selection of contributions on theories of the business cycle and new empirical methods and synthesizes the new results The volume i gives an overview of current models and modern concepts and tools for analyzing the business cycle ii demonstrates where possible the relation of those models to the history of business cycle analysis and iii presents current work surveys and original work on new empirical methods of studying cycle generating mechanisms

Computable, Constructive and Behavioural Economic Dynamics Stefano Zambelli, 2010-02-25 The book contains thirty original articles dealing with important aspects of theoretical as well as applied economic theory While the principal focus is on the computational and algorithmic nature of economic dynamics individual as well as collective decision process and rational behavior some contributions emphasize also the importance of classical recursion theory and constructive mathematics for dynamical systems business cycles theories growth theories and others are in the area of history of thought methodology and behavioural economics The contributors range from Nobel Laureates to the promising new generation of innovative thinkers This volume is also a Festschrift in honour of Professor Kumaraswamy

Vela Velupillai the founder of Computable Economics a growing field of research where important results stemming from classical recursion theory and constructive mathematics are applied to economic theory The aim and hope is to provide new tools for economic modelling This book will be of particular appeal to postgraduate students and scholars in one or more of the following fields computable economics business cycles macroeconomics growth theories methodology behavioural economics financial economics experimental and agent based economics It might be also of importance to those interested on the general theme of algorithmic foundations for social sciences
