literature today is dominated by the gothic mode and it is in children s gothic fictions that we find the implications of cultural change most radically questioned and explored This collection of essays looks at what is happening in the children s Gothic now when traditional monsters have become the heroes when new monsters have come into play when globalisation brings Harry Potter into China and yaoguai into the children s Gothic and when childhood itself and children s literature as a genre can no longer be thought of as an uncontested space apart from the debates and power struggles of an adult domain We look in detail at series such as The Mortal Instruments Twilight Chaos Walking The Power of Five Skulduggery Pleasant and Cirque du Freak at novels about witches and novels about changelings at the Gothic in China Japan and Oceania and at authors including Celia Rees Frances Hardinge Alan Garner and Laini Taylor amongst many others At a time when the energies and anxieties of children s novels can barely be contained anymore within the genre of children s literature spilling over into YA and adult literature we need to pay attention Weird things are happening and they matter **New Directions**

**The Gutenberg Revolution** Richard Abel, 2017-07-12 One of the most puzzling lapses in accounts of the rise of the West following the decline of the Roman Empire is the casual way historians have dealt with Gutenberg s invention of printing The cultural achievements that followed the fifteenth century when the West moved from relative backwardness to remarkable robust cultural achievement would have been impossible without Gutenberg s gift and its subsequent widespread adoption across most of the world Richard Abel follows the radical cultural impact of the printing revolution from the eighth century to the Renaissance addressing the viability of the new Christian Classical culture Although this culture proved too fragile to endure those who salvaged it managed to preserve elements of the Classical substance together with the Bible and all the

writings of the Church Fathers The cultural upsurge of the Renaissance fourteenth to seventeenth centuries which resulted in part from Gutenberg's invention is a major focus of this book Abel aims to delineate how the cultural revolution was shaped by the invention of printing He evaluates its impact on the rapid reorientation and acceleration of the cultural evolution in the West This book provides insight into the history of the printed word the roots of modern day mass book production and the promise of the electronic revolution It is an essential work in the history of ideas **Modern**
