New Essays In Metaphysics:

Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017-12-01 Idealism is a family of metaphysical views each of which gives priority to the mental. The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world. Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades. This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism. The various essays explain, attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism. Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics. This volume aims to spark a revival of serious philosophical interest in metaphysical idealism.

New Essays in Metaphysics Robert Cummings Neville, 1986-11-15 This volume displays fifteen of the many lively options in the field of metaphysics. The authors, having finished their formal education in the 1960s or later, belong to the generation of philosophers whose rebellion was against those who thought they saw metaphysics in the grand sense to be *passé* or impossible. The authors also share a commitment to the importance of metaphysics for the social and cultural life of our time. Despite the diversity of argued opinions on the fundamental array of metaphysical topics, these essays display the zest of a reborn enterprise at once appropriating a rich and honorable past and moving into new areas only recently thought illegitimate for philosophy.

Non-being Sara Bernstein, Tyron Goldschmidt, 2021 Nonexistence is ubiquitous yet mysterious. This volume explores some of the most puzzling questions about non-being and nonexistence from metaphysics to ethics and beyond. The contributors offer answers from diverse philosophical perspectives drawing on analytic, continental, Buddhist and Jewish philosophical traditions.

Metametaphysics David Chalmers, David Manley, Ryan Wasserman, 2009-02-19 Metaphysics asks questions about existence: for example, do numbers really exist? Metametaphysics asks questions about metaphysics: for example, do its questions have determinate answers? If so, are these answers deep and important, or are they merely a matter of how we use words? What is the proper methodology for their resolution? These questions have received a heightened degree of attention lately with new varieties of ontological deflationism and pluralism challenging the kind of realism that has become orthodoxy in contemporary analytic metaphysics. This volume concerns the status and ambitions of metaphysics as a discipline. It brings together many of the central figures in the debate with their most recent work on the semantics, epistemology and methodology of metaphysics.

Metaphysics and the Philosophy of Science Matthew Slater, Zanja Yudell, 2017-02-01 The question of the proper role of metaphysics in philosophy of science is both significant and contentious. The last few decades have seen considerable engagement with philosophical projects aptly

described as the metaphysics of science inquiries into natural laws and properties natural kinds causal relations and dispositions At the same time many metaphysicians have begun moving in the direction of more scientifically informed scientific or naturalistic metaphysics And yet many philosophers of science retain a deep suspicion about the significance of metaphysical investigations into science This volume of new essays explores a broadly methodological question what role should metaphysics play in our philosophizing about science These new essays written by leading philosophers of science address this question both through ground level investigations of particular issues in the metaphysics of science and by more general methodological inquiry From Truth to Reality, 2009 Reason, Metaphysics, and Mind Kelly James Clark, Michael Rea, 2012-02-09 In May 2010 philosophers family and friends gathered at the University of Notre Dame to celebrate the career and retirement of Alvin Plantinga widely recognized as one of the world's leading figures in metaphysics epistemology and the philosophy of religion Plantinga has earned particular respect within the community of Christian philosophers for the pivotal role that he played in the recent renewal and development of philosophy of religion and philosophical theology Each of the essays in this volume engages with some particular aspect of Plantinga's views on metaphysics epistemology or philosophy of religion Contributors include Michael Bergman Ernest Sosa Trenton Merricks Richard Otte Peter VanInwagen Thomas P Flint Eleonore Stump Dean Zimmerman and Nicholas Wolterstorff The volume also includes responses to each essay by Bas van Fraassen Stephen Wykstra David VanderLaan Robin Collins Raymond VanArragon E J Coffman Thomas Crisp and Donald Smith **God and Meaning** Joshua W. Seachris, Stewart Goetz, 2016-09-08 Over the past decade there has been a growing interest among analytic philosophers in the topic of life's meaning What is striking about this surge of work is that nearly all of it is by naturalists theorizing from non theistic starting points This book answers the need for a theistic philosophical perspective on the meaning of life Bringing together some of the leading thinkers in analytic philosophy of religion and theology *God and Meaning* touches on important issues in metaphysics epistemology ethics philosophy of religion and biblical theology that intersect with life's meaning In particular What does the question What is the meaning of life mean How can we know if life has meaning and what that meaning is Might God enhance life's meaningfulness in some ways but detract from it in others Is the most meaningful life one of perfect happiness What is the relationship between eternity and life's meaning How does the Old Testament book of Ecclesiastes illumine the topic Should we hope that a kind of transcendent meaning exists Presenting a state of the art assessment of current philosophical positions on these and many other questions *God and Meaning* is an invaluable resource for all students and scholars of the philosophy of religion Metametaphysics and the Sciences Frode Kjosavik, Camilla Serck-Hanssen, 2019-10-17 This collection addresses metaphysical issues at the intersection between philosophy and science A unique feature is the way in which it is guided both by history of philosophy by interaction between philosophy and science and by methodological awareness In asking how metaphysics is possible in an age of science the contributors draw on

philosophical tools provided by three great thinkers who were fully conversant with and actively engaged with the sciences of their day Kant Husserl and Frege Part I sets out frameworks for scientifically informed metaphysics in accordance with the meta metaphysics outlined by these three self reflective philosophers Part II explores the domain for co existent metaphysics and science Constraints on ambitious critical metaphysics are laid down in close consideration of logic meta theory and specific conditions for science Part III exemplifies the role of language and science in contemporary metaphysics Quine s pursuit of truth is analysed Cantor s absolute infinitude is reconstrued in modal terms and sense is made of Weyl s take on the relationship between mathematics and empirical aspects of physics With chapters by leading scholars **Metametaphysics and the Sciences** is an in depth resource for researchers and advanced students working within metaphysics philosophy of science and the history of philosophy **Contemporary Kantian Metaphysics** R. Baiasu,G. Bird,A. Moore,2012-02-07

Responding to growing interest in the Kantian tradition and in issues concerning space and time this volume offers an insightful and original contribution to the literature by bringing together analytical and phenomenological approaches in a productive exchange on topical issues such as action perception the body and cognition and its limits **The Metaphysics of Historical Jesus Research** Jonathan Rowlands,2015-10-15 In this book Rowlands interrogates the theological and philosophical foundations of the Quest for the historical Jesus from Reimarus to the present day culminating in a call for greater metaphysical transparency and diversity in the discipline This multidisciplinary approach to historical Jesus research drawing on historiography sociology philosophy and theology makes a significant and original contribution to the field Part I outlines the implicit role of metaphysical presuppositions in historical methodology by examining the concept of an historiographical worldview Part II provides an overview of the Quest for the historical Jesus demonstrating that the disparate historiographical worldviews operative in the Quest evidence a particular shared characteristic in that they might accurately be described as secular Rowlands study concludes with a call for a greater plurality and openness regarding the philosophical and theological presuppositions at work in historical Jesus research **The Metaphysics of Historical Jesus Research** is of interest to students and scholars working on New Testament studies and historical Jesus research **A Moral Ontology for a Theistic Ethic** Frank G. Kirkpatrick,2017-11-22 This title was first published in 2003 This book develops a moral ontology for a theistic ethic that engages the work of contemporary moral and political philosophers and reaffirms the relevance of a theistic tradition of God s relation to the world reflected in the fundamental teachings of Judaism Christianity and Islam Drawing on recent thought in the non religious fields of psychology and political and moral philosophy which build around the concept of human flourishing in community Kirkpatrick argues that a theistic ethic need not be the captive of parochial or sectarian theological camps He proposes a common or universal ethic that transcends the fashionable ethnocentric incommensurate differences in morality alleged by many post modern deconstructionists In the wake of ethnic religious strife post September 11th 2001 this book argues for a common morality built on the inclusivity of love community

and justice that can transcend sectarian and parochial boundaries **Biological Essentialism** Michael Devitt, 2023 The consensus in philosophy of biology is that biological essences such as the essences of species are wholly relational Michael Devitt argues that they are at least partly intrinsic He further argues that an individual is essentially a member of its species He concludes by considering whether race is biologically real Interpreting Neville J. Harley Chapman, Nancy Frankenberry, Nancy K. Frankenberry, 1999-05-13 Distinguished scholars provide the first book length consideration of the work of philosopher and theologian Robert Cummings Neville including a response from Neville himself *Realism in Religion* Robert Cummings Neville, **The Philosopher's Plant** Michael Marder, 2014-11-11 Despite their conceptual allergy to vegetal life philosophers have used germination growth blossoming fruition reproduction and decay as illustrations of abstract concepts mentioned plants in passing as the natural backdrops for dialogues letters and other compositions spun elaborate allegories out of flowers trees and even grass and recommended appropriate medicinal dietary and aesthetic approaches to select species of plants In this book Michael Marder illuminates the vegetal centerpieces and hidden kernels that have powered theoretical discourse for centuries Choosing twelve botanical specimens that correspond to twelve significant philosophers he recasts the development of philosophy through the evolution of human and plant relations A philosophical history for the postmetaphysical age The Philosopher's Plant reclaims the organic heritage of human thought With the help of vegetal images examples and metaphors the book clears a path through philosophy's tangled roots and dense undergrowth opening up the discipline to all readers **Neo-Aristotelian Perspectives in Metaphysics** Daniel D. Novotný, Lukáš Novák, 2014-04-16 This volume re-examines some of the major themes at the intersection of traditional and contemporary metaphysics The book uses as a point of departure Francisco Suárez's *Metaphysical Disputations* published in 1597 Minimalist metaphysics in empiricist pragmatist clothing have today become mainstream in analytic philosophy Independently of this development the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics The book brings together leading contemporary metaphysicians to investigate the viability of a neo-Aristotelian metaphysics

Idealism and the Harmony of Thought and Reality Thomas Hofweber, 2023 Do human beings have a special place in reality Thomas Hofweber argues that we are special because there is an intimate connection between our human minds and reality itself His form of idealism holds that our minds constrain but do not construct reality which is the totality of facts things taken to be completely independent of us **Rethinking Metaphysics** Amie Thomasson, 2025-04-18 In *Rethinking Metaphysics* Amie Thomasson aims to change how we think about metaphysics what it can do and why it matters Traditional metaphysics has aimed to discover deep truths about the world But this has led to rivalries with science epistemological mysteries and a despairing scepticism about how we could gain knowledge in metaphysics Thomasson argues that the problems with prior approaches to metaphysics arise from a problematic assumption that all discourse functions in the same

way Drawing on work in linguistics she shows how to develop a richer view of linguistic functions that enables us to see why this assumption leads us astray By better understanding the plurality of linguistic functions she argues we can also disentangle ourselves from many old metaphysical problems including problems about properties numbers morality and modality In place of the traditional model we should think of metaphysics as work in conceptual engineering including both a reverse engineering project aimed at understanding how various parts of our language and conceptual scheme work and what functions they serve and a constructive engineering project that investigates what concepts and language we should use and how we should use them Rethinking metaphysics as conceptual engineering in this way enables us to avoid the problems of traditional metaphysics while also demonstrating the perennial importance of metaphysics to human life
