are experiencing a technological revolution that goes well beyond anything that has existed since the invention of printing. Not surprisingly the digital library with all that it portends for the future of the book and the periodical but also with all that it implies for the kinds of information that will be collected and disseminated will necessarily preoccupy those responsible for libraries in the new century. Everything from copyright access and cost to the nature of the reading public itself is now up for re examination. Books Bricks and Bytes brings together an extraordinary array of authors at the cutting edge of these concerns not only within the United States but experts drawn from Germany France Russia the United Kingdom Brazil and India. James H Billington discusses the Library of Congress in the information age. Ann S Okerson outlines two models for securing scholarly information. Donald S Lamm discusses the shaky partnership of publishers and librarians in this new environment. Klaus Dieter Lehmann provides a framework for maintaining the intellectual heritage of the past in a digitized future. Each contributor shows in concrete detail and vivid illustration that the library as a world of holdings is increasingly valued as an incomparable place to access information. In his preface to the book Stephen Graubard reminds us that whether or not one believes in the reality of the information revolution that is said to be overtaking the world it is obvious that the libraries being built today do not resemble those marble sanctuaries constructed in the Victorian age or in the early twentieth century. This is a work that shows how libraries have been transformed from refuges from the external world to places that reflect the social and intellectual values of specific societies. The idea that the library is a public trust and public resource is at the center of this unusually fine collection at the cutting edge of professional and public life.

Impressionist Subjects Tamar Katz, 2023-02-13 Exploring the intersection of ideas about woman subjectivity and literary authority *Impressionist Subjects* reveals the female subject as crucial in framing contradictions central to modernism particularly the tension between modernism s claim to timeless art and its critique of historical conditions Against the backdrop of the New Woman movement of the 1890s Tamar Katz establishes literary impressionism as integral to modernist form and to the modernist project of investigating the nature and function of subjectivity Focusing on a duality common to impressionism and contemporary ideas of feminine subjectivity Katz shows how the New Woman reconciled the paradox of a subject at once immersed in the world and securely enclosed in a mysterious interiority Book chapters feature discussion of modernists including Walter Pater George Egerton Sarah Grand Henry James Joseph Conrad Ford Madox Ford Dorothy Richardson and Virginia Woolf Sophisticated and tightly argued *Impressionist Subjects* is a substantial contribution to the reassessment and expansion of the modernist fiction canon
