New Horizons in Sperm Cell Research □□□□, 1987 **The Fallopian Tubes** Ronald H.F. Hunter, 2012-12-06 This monograph has been written in the hope that it will prove of value to medical students and clinicians to Honours undergraduates in appropriate branches of the natural sciences and to reproductive biologists in general It would be pleasing if the text also caught the attention of veterinary undergraduates since there is much information bearing on reproduction in domestic animals First and foremost however the intended audience is a medical one for scientific studies of human reproduction have been catalyzed by the intense interest in procedures of fertilization in vitro Some would judge that this very activity has narrowed our view of physiological events occurring within the Fallopian tubes The present work may therefore serve as a useful counterbalance to the overwhelming series of publications on procedures of in vitro fertilization and offer opportunities to those in the clinical field for extending their knowledge of the scientific background to much of the current work **Gametes - The Spermatozoon** Jurgis Gediminas Grudzinskas, J. L. Yovich, 1995-09-07 This is detailed comprehensive and timely account of the spermatozoon and its reproductive function The Evolutionary Biology of the Bivalvia Elizabeth Harper, John David Taylor, J. Alistair Crame, 2000 Bivalves are key components of recent marine and freshwater ecosystems and have been so for most of the Phanerozoic Their rich and long fossil record combined with their abundance and diversity in modern seas has made bivalves the ideal subject of palaeobiological and evolutionary studies Despite this however topics such as the early evolution of the class relationships between various taxa and the life habits of some key extinct forms have remained remarkably unclear This volume integrates palaeontological and zoological approaches and sheds new light on the course of bivalve evolution **Vajikarana : Sexology in Ayurveda** Prof. Dr. Pandurang Kulkarni, Dr. Swapnil Daspute, Prof. Dr. Abhinandan Muke, Prof. Dr. Atul Rakshe, Dr. Raturaj Kadam Patil, 2020-10-04 Sex is one of basic desire in animal kingdom Every body should take care of own body mind and soul Food is very important Ayurveda has used it as Rasayana rejuvenator of body and mind Food and plants are used as aphrodisiacs meaning Vajikarana This is very important branch of Ayurveda Various sexual problems related to Males are described with remedies **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1990 *Reproduction in Domestic Animals* Perry T. environment Organized into five sections and written by experts in their respective fields Biological Research in Aquatic Sciences covers topics including cryobiology spermatology climate change migration of aquatic species and plankton in aquatic ecosystems This book will help researchers and interested readers better understand current trends in biological research regarding aquatic science Current Catalog National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965-70 *Aquatic Oligochaetes* Brenda M. Healy,Trefor B. Reynoldson,Kathryn A. Coates,2012-12-06 The book contains papers on the biology of aquatic oligochaetes and some related groups They cover a wide range of topics including phylogeny taxonomy geographic distribution freshwater and marine ecology population dynamics histology and ultrastructure physiology and behaviour The wide scope is in line with recent trends in annelid research with less emphasis on pollution studies and faunistics and a renewed interest in experimental biology using new techniques *Insect Reproduction* S. R. Leather,2018-01-18 This book consisting of ten review chapters contributed by leading workers in their respective fields from around the world covers the whole subject of insect reproduction It begins with the basic physiological questions of insect reproduction moves on to discuss the new advances seen in the fields of behavioural and ecological mechanisms and culminates by examining the recent work on evolutionary biology and its application in the field Each chapter although including a brief review of the basic seminal work focuses mainly on the advances made within the last ten years and highlights those areas in which the respective authors see the greatest scope for further important advances

Novel Insights into Sperm Function and Selection: from Basic Research to Clinical Application Kun Li,Tao Luo,Rossella Cannarella,2023-10-25 Molecular Techniques in Taxonomy Godfrey M. Hewitt,Andrew W.B. Johnston,J.Peter W. Young,2013-06-29 Taxonomy is fundamental to understanding the variety of life forms and exciting expansions in molecular biology are revolutionising the obtained data This volume reviews the major molecular biological techniques that are applied in taxonomy The chapters are arranged in three main sections 1 Overviews of important topics in molecular taxonomy 2 Case studies of the successful application of molecular methods to taxonomic and evolutionary questions 3 Protocols for a range of generally applicable methods The described techniques include DNA DNA hybridization DNA fingerprinting RFLP analysis and PCR sequencing **Echinodermata** Valeria Matranga,2005-10-24 Members of the phylum Echinodermata are among the most familiar marine invertebrates Forms such as the sea star have become virtually a symbol of sea life Used in ancient oriental medicine as a source of bioactive compounds sea cucumbers sea stars and sea urchins are now used for the extraction and purification of cytotoxic haemolytic antiviral antifungal antifouling antimicrobial and even anti tumoural activities In addition of the five extant classes sea urchins and sea cucumbers are important economic resources for current fishery and aquaculture Molecular and cell biological techniques described in this book are on the one hand indicative of the improvements made over the years and on the other stress the need of their further exploitation for the sustainable production of bioactive compounds and their application in biomedicine **Controls of Sperm Motility** Claude
