shaping ideas about modernity This new image making and reproduction technology empowered Italy's cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress

Italian Architecture 1965-1970 Marco Dezzi Bardeschi, 1973

Suspending Modernity: The Architecture of Franco Albini Kay Bea Jones, 2016-04-01 Franco Albini's works of architecture and design produced between 1930 and 1977 have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement A chorus of Italian voices has sung his praises none more eloquently than his protégé Renzo

Piano Kay Bea Jones illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design He collaborated for over 25 years with Franca Helg and at a time when professional male female partnerships were virtually unknown His museums and installation motifs changed the way Italians displayed historic artifacts He composed novel suspension structures for dwellings shops galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities He explored new fabrication technologies from the scale of furniture to wide span steel structures yet he never abandoned the rigors of craft and detail in favor of mass production Suspending Modernity follows the evolution of Albini's most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period
