The Pivot of Civilization in Historical Perspective Margaret Sanger,2003-09 Today s heated debates over social issues such as abortion birth control ethnicity immigration race religion sexual behavior and welfare did not begin in the 1960s They began in the last years of the nineteenth century and reached their zenith in the 1920s when this book sold over 200 000 copies Here is all the text of Margaret Sanger s 1922 best seller along with 31 chapters by her contemporaries to set what she advocated in historical perspective This is not history told after the fire and passion have died out These are words spoken in the heat of battle at a time when Sanger and others believed that the fate of civilization depended on their ideas winning acceptance here and around the world Ecocriticism and Chinese Literature Riccardo Moratto,Nicoletta Pesaro,Di-kai Chao,2022-03-10 Focusing on ecocritical aspects throughout Chinese literature particularly modern and contemporary Chinese literature the contributors to this book examine the environmental and ecological dimensions of notions such as qing and jing Chinese modern and contemporary environmental writing offers a unique aesthetic perspective toward the natural world Such a perspective is mainly ecological and allows human subjects to take a benign and nonutilitarian attitude toward nature The contributors to this book demonstrate how Chinese literary ecology tends toward an ecological systemic holism from which all human behaviors should be closely examined They do so by examining a range of writers and genres including Liu Cixin s science fiction Wu Ming yi s environmental fiction and Zhang Chengzhi s historical narratives This book provides valuable insights for scholars and students looking to understand how Chinese literature conceptualizes the relationship between humanity and nature as well as our role and position within the natural realm The Imminent Collapse of America and of the Whole Western Civilization Angelo Bertolo,2012-09-25 In the 5000 years of the history that we know great empires grew and fell according to certain patterns that repeat themselves like laws of nature The USA rose and grew to prominence in the world reached its zenith in 1945 with the military victory and with the atom bomb but is not destined to stay there forever The book tries to draw the attention to the signs of decadence that match the patterns of the decadence of previous empires in history and the patterns of growth of progress in other cultural milieus very few pundits in America and in the western media in general seem to be aware of this fact The birth rates keep diminishing in America and are very low in Europe In other civilisations the birth rates have been high and those countries

count more in the world today politically and economically than a few generations ago In addition the irrational and passionate attitude of those peoples including the aggressive suicidal attitude with religious and political connotations is a sign of progress for them Those people who are in favour of family planning programs and of a more relaxed morality are acting against the general interests of their countries

OUR MISSION IN THESE SIX BOOKS

- 1 Growing Decline in World Peace We started our long journey in these six Books with an expression of concern over the growing decline in world peace Our Mission throughout our Six Books had therefore focused on our views on how the state of World Peace can be advanced
- 2 Enhancing unity between Christianity and Secularity We expressed at the beginning of our first Book that one major source of the growing decline in world peace is the on going wars and crises between the Religious and Secular worlds of today This source of global crises had been acknowledged in a recent conference of global Religious Leaders held in Assisi at the invitation of Pope Benedict XVI The Conference participants resolved unanimously to address this source of crises in world peace Global Secular Leaders had also expressed much concern on the growing decline in world peace They did so again at the last meeting of the United Nations General Assembly in New York
- 3 Our Mission to contribute to Pope Benedict XVI's New Evangelization In our view the recent launching of the New Evangelization by Pope Benedict XVI reflected in part the resolution of Religious Leaders in the Assisi Conference to find ways of addressing the growing decline in world peace due partly to Religious conflicts with Secularity across the world The Pope called on all Lay members of the Catholic Church and Christians in general to contribute to the success of the Popes New Evangelization PCNE As we expressed throughout our six books our mission in these Books is to respond to the call by Pope Benedict XVI
- 4 Military and Secular Perspectives on the Religious and Secular Peace We stated clearly from the start that our contribution would reflect on the military and secular aspects of the growing conflicts between Christianity and Secularity using the global experience in both sectors by our Author throughout his career We had to take these perspectives because we must identify the source leadership and strategies in the wars and conflicts between the Religious and Secular worlds Unless we know the leaders in the conflicts and their missions we cannot achieve any progress in resolving these wars and crises and enhance the level of world peace
- 5 My Background A few words of introduction on my background may enable the Reader understand my perspectives in these Books I started the project of writing the Books because I am convinced that I can contribute to the PCNE by bringing my African background in Nigeria education at the London School of Economics and exposure to global secular governance through my position as a former Economic Adviser with The U K Government and a Senior Economist at The World Bank

The Formation of Islamic Law Wael B. Hallaq,2016-12-05 The fourteen studies included in this volume have been chosen to serve several purposes simultaneously At a basic level they aim to provide a general if not wholly systematic coverage of the emergence and evolution of law during the first three and a half centuries of Islam On another level they reflect the different and at times widely divergent scholarly approaches to this subject matter These two levels combined will offer a useful account of the rise of Islamic law not only for students in this field but also for Islamicists who are not specialists in matters of law comparative legal historians and others At the same time however and as the Introduction to the work argues this collection of distinguished contributions illustrates both the achievements and the shortcomings of paradigmatic scholarship on the formative period of Islamic law

The Life Cycle of Civilizations Stephen Blaha,2002 This book is an expanded version of The Rhythms of History the book that made macro History into a semi quantitative Science New features include 1 an

appendix showing how the history of Mayan civilization conforms to the book's Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas Guatemala 2 an appendix on the sub Saharan African civilization Great Zimbabwe showing it fits the theory 3 a comparison of the theory with Toynbee's observations showing the many new features resulting from a quantitative theory 4 numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century 5 a chapter describing the potentially disturbing implications of patterns in civilizations Are we free and the implications for the Philosophy of History and 6 expanded comments in many sections such as the sections on the future of Humanity the role of China and the Islamic West conflict The book begins with a hard hitting tell it like it is chapter on the current international situation with statements such as The United States and Western civilization is now engaged in a small Vietnam style war on a global scale at the time of this writing This war is still in the early stages of development The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire the First Century AD had for the future of Rome They may be a premonition of things to come not necessarily soon but perhaps in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world's climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today's civilizations including

the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world s civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations
