geopolitical context and the ways this context frames our knowledge about Asia highlighting previously neglected cause effect relations It also examines how various knowledge institutions promote and shape Asian Studies The authors seek to explain why Asian Studies and its subfields developed in the way they did and what the implications of these transformations might be on intellectual and political understandings of Asia The book not only builds on the current debates on the decolonization and de imperialization of knowledge about Asia it also proposes a more multifaceted view rather than just examining the impact of the West on the framing of Asian Studies *Southeast Asian Studies* Cynthia Chou,Vincent

The Futility of Law and Development Jedidiah J. Kroncke, 2016-01-18 For all the attention paid to the Founder Fathers in contemporary American debates it has almost been wholly forgotten how deeply they embraced an ambitious and intellectually profound valuation of foreign legal experience Jedidiah Kroncke uses the Founders' serious engagement with and often admiration for Chinese law in the Revolutionary era to begin his history of how America lost this Founding commitment to legal cosmopolitanism and developed a contemporary legal culture both parochial in its resistance to engaging foreign legal experience and universalist in its messianic desire to export American law abroad Kroncke reveals how the underappreciated but central role of Sino American relations in this decline over two centuries significantly reshaped in the early 20th century as American lawyer missionaries helped inspire the first modern projects of American humanitarian internationalism through legal development Often forgotten today after the rise of the Chinese Communist Party in 1949 the Sino American relationship in the early 20th century was a key crucible for articulating this vision as Americans first imagined waves of Americanization abroad in the wake of China's 1911 Republican revolution Drawing in historical threads from religious legal and foreign policy work the book demonstrates how American comparative law ultimately became a marginalized practice in this process The marginalization belies its central place in earlier eras of American political and legal reform In doing so the book reveals how the cosmopolitan dynamism so prevalent at the Founding is a lost virtue that today comprises a serious challenge to American legal culture and its capacity for legal innovation in the face of an increasingly competitive and multi polar 21st century Once again America's relationship with China presents a critical opportunity to recapture this lost virtue and stimulate the searching cosmopolitanism that helped forge the original foundations of American democracy **The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes** Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic

regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives

The Far East and Australasia 2003 Europa Publications,2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume Asian Development William E. James,Seiji Naya,Gerald M. Meier,1989 While the world s attention has been focused on the spectacular economic success of Japan and Korea the less developed countries of Asia have often been neglected Asian Development closes the gap In nontechnical style and with minimal mathematics it presents an in depth perspective on the economic development of fourteen countries in East Southeast and South Asia Asian Development is mainly a story of success Though some problems remain Asian countries have shown remarkable resilience in responding to sharp changes in the international economy oil shocks world recession and inflation exchange rate and interest rate fluctuations and rapid technological change The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies Looking back they comment In the past growth of the United States and Japan pulled up the growth rates of the smaller economies in the region Looking forward they predict In the future increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies

The New Institutional Economics and Third World Development John Harriss,Janet Hunter,Colin M. Lewis,1995 A major contribution to an area of debate still in its formative phase It offers new perspectives on both the micro foundations of economics and the long run dynamics of economic development
