Kritz,1995 Foreword Nelson Mandela      **The Politics Of Democratization** Edward Friedman,2019-06-26

This collection explores democratic transitions in East Asia arguing against the standard wisdom that European or Christian value systems and socioeconomic forces are essential for democracy to succeed. Instead, the contributors convincingly illustrate that political institutions which can be built anywhere by skilled coalitions have the most profound and lasting influence on a stable democratic system. Indeed, the East Asian experience reveals truths about Western democratization that are obscured by popular Western mythologies. This partnership of U.S. and Asian scholars has given us the first systematic effort to bring East Asia into the democratization debate in a way that compels one to rethink the politics of democratization everywhere. The book therefore is a crucial contribution for all those interested in the broader issues of transition.

**Reflections on the Constitutionalisation of International Economic Law**, 2013-12-09. This book collects a large number of essays written in honour of Professor Ernst Ulrich Petersmann by his friends, colleagues, and former students. The respective contributions cover the fields of international economic law, international constitutional law, transnational constitutionalism, EU law, and human rights. The broad thematic scope of this book mirrors the extremely large field of interests of the jubilarian. Paying tribute to a particular trait of Professor Petersmann's character, who was always both a dogmatic thinker and a curious researcher, the authors try to cover both structural issues of law as well as most recent developments, in particular in the field of international economic law. Construing the constitution of international economic law in both senses of this activity was an aim throughout Professor Petersmann's academic career, and this goal stands also at the heart of this book. *Monthly Catalogue, United States Public Documents*, 1995. **Feminism Counts**

Christina Hughes, Rachel Cohen, 2013-09-13. This is an important and timely text that provides a unique overview of contemporary quantitative approaches to gender research. The contributors are internationally recognised researchers from the UK, USA, and Sweden who occupy a range of disciplinary locations including historical demography, sociology, and policy studies. Their research includes explorations of heterosexual and same-sex violence, media responses to feminist research, data sources for the study of inequalities, approaches for analysing global and local demographic change, and intersectional concerns in respect of work and employment. Through detailed, sophisticated, and thoughtful considerations of the place of quantification within gender studies and the place of feminist approaches to quantification, each contributor overturns the stereotype that quantitative research is antithetical to feminism by demonstrating its importance for challenging continuing global inequalities associated with gendered outcomes. An introductory chapter illustrates the significance of geography and discipline in the take-up of methodological preferences. **Feminism Counts: Quantitative Methods and Researching Gender**

makes an important contribution to the ways in which feminists respond to contemporary methodological and interdisciplinary challenges and is essential reading for all research students in gender studies This book was originally published as a special issue of the International Journal of Social Research Methodology
