Transforming Ethnopolitical Conflict Alex Austin, Martina Fischer, Norbert Ropers, 2013-04-17 Preface Confronted with a wide variety of conflicts the international community has attempted to respond through humanitarian assistance development aid crisis prevention and conflict resolution programmes To date many of these activities have exacerbated conflict dynamics as much as they have enhanced the opportunities for sustainable development and peace In an effort to understand what works lessons learned and best practices are being collected usually in the form of evaluations of individual projects or programs Although the number of studies undertaken has increased few lessons have been systematised or accumulated for broader discussion in the academic field or for practitioners use The Berghof Research Center for Constructive Conflict Management produced this Handbook in response to the contemporary challenges which have to be faced by those who are working in and on violent conflict The intention is to give an overview of recent developments in the field of conflict transformation from various perspectives from academic analysts and practitioners as well as from experts representing different areas of work inside and outside of conflict zones

Speaking of Violence Sara B. Cobb, 2013-08 In the context of ongoing or historical violence people tell stories about what happened who did what to whom and why Yet frequently the speaking of violence reproduces the social fractures and delegitimizes again those that struggle against their own marginalization This speaking of violence deepens conflict and all too often perpetuates cycles of violence Alternatively sometimes people do not speak of the violence and it is erased buried with the bodies that bear it witness This reduces the capacity of the public to address issues emerging in the aftermath of violence and repression This book takes the notion of narrative as foundational to conflict analysis and resolution Distinct from conflict theories that rely on accounts of attitudes or perceptions in the heads of individuals this narrative perspective presumes that meaning structured and organized as narrative processes is the location for both analysis of conflict as well as intervention But meaning is political in that not all stories can be told or the way they are told delegitimizes and erases others Thus the critical narrative theory outlined in this book offers a normative approach to narrative assessment and intervention It provides a way of evaluating narrative and designing better formed stories better in that they are generative of sustainable relations creating legitimacy for all parties In so doing they function aesthetically and ethically to support the emergence of new histories and new futures Indeed critical narrative theory offers a new lens for enabling people to speak of violence in ways that undermine the intractability of conflict

and a material contextual component which anchors the argument in the interlocutors cultural and factual common ground The AMT explains how these components differ and how they are intertwined within each single argument This model is introduced in Part II of the book following a careful reconstruction of the enormously rich tradition of studies on inference in argumentation from the antiquity to contemporary authors without neglecting medieval and post medieval contributions The AMT is a contemporary model grounded in a dialogue with such tradition whose crucial aspects are illuminated in this book
