New Forms:

Stable Klingen Vectors and Paramodular Newforms Jennifer Johnson-Leung, Brooks Roberts, Ralf Schmidt, 2023-12-27 This book describes a novel approach to the study of Siegel modular forms of degree two with paramodular level. It introduces the family of stable Klingen congruence subgroups of $\mathrm{GSp}\ 4$ and uses this family to obtain new relations between the Hecke eigenvalues and Fourier coefficients of paramodular newforms, revealing a fundamental dichotomy for paramodular representations. Among other important results, it includes a complete description of the vectors fixed by these congruence subgroups in all irreducible representations of $\mathrm{GSp}\ 4$ over a nonarchimedean local field. Siegel paramodular forms have connections with the theory of automorphic representations and the Langlands program, Galois representations, the arithmetic of abelian surfaces, and algorithmic number theory. Providing a useful standard source on the subject, the book will be of interest to graduate students and researchers working in the above fields.

Toward an Ecological Society Murray Bookchin, 2024-03-05 Visionary essays from a founder of the modern ecology movement. In this collection of essays, Murray Bookchin's vision for an ecological society remains central as he addresses questions of urbanism and city planning, technology, self-management, energy, utopianism, and more. Throughout, he opposes efforts to reduce ecology to a toothless environmentalism, a task as vital today as when these essays were first published. Written between 1969 and 1979, the essays in this collection represent a fascinating and fertile period in Bookchin's life. Coming out of the unfulfilled promise of the sixties and trying to develop a revolutionary critique of social life that avoided the pitfalls of Marxism, he was entering his creative intellectual peak. He was laying the foundations of a truly social ecology, a society based on decentralization, interdependence, democratic self-management, mutual aid, and solidarity. Presented with clarity and fervor, these key works contain the kernels of concerns that would occupy him until his death in 2006. This edition also includes a new foreword by Dan Chodorkoff, someone who was with Bookchin at the founding of his Institute for Social Ecology and who understands his work better than anyone.

On the Origin of Species By Means of Natural Selection Charles Darwin, 2019-03-04 *On the Origin of Species By Means of Natural Selection* by Charles Darwin is a seminal anthology that reshapes our understanding of life through its comprehensive investigation of evolution and natural selection. The principal story, *On the Origin of Species*, unveils the intricate mechanisms of natural selection, challenging the conventional beliefs of species creation. Darwin meticulously examines the rich biological diversity and the subtle forces of variation, both domesticated and wild, that influence the survival and evolution of species. This narrative presents a thorough analysis of the struggle for existence and the concept of the survival of the fittest, providing an in-depth look at adaptation and competition in nature. Darwin's exploration extends to hybridism, instinct, and the imperfections within the geological record, presenting an interconnected view of all living organisms. This anthology remains a pivotal piece for anyone interested in the subjects of evolution and natural selection, offering a timeless reflection on humanity's place in the natural world. Whether you're an expert in biology

or a curious reader On the Origin of Species By Means of Natural Selection presents an essential perspective on the evolutionary processes that continue to shape life on Earth inviting readers to delve into the profound story of life's origins and its ongoing transformation This anthology is a must read for those seeking a deeper understanding of the natural world and our shared heritage as it challenges us to reconsider our role in the ever evolving tapestry of life APRO Technical Research Note United States. Post-Political and its Discontents Japhy Wilson,2015-04-29 Our age is celebrated as the triumph of liberal democracy Yet it is also marked by a narrowing of party differences a decline in voter participation a rise in nationalist and religious fundamentalisms and an explosion of popular protests that challenge technocratic governance and the power of markets in the name of democracy itself This book seeks to make sense of this situation by critically engaging with the influential theory of the post political developed by Chantal Mouffe Jacques Ranciere Slavoj Zizek and others Through a multi dimensional and fiercely contested assessment of contemporary depoliticization The Post Political and Its Discontents urges us to confront the closure of our political horizons and to re imagine the possibility of emancipatory change

Islamic Movements of Europe Frank Peter, Rafael Ortega, 2014-09-08 Islam in Europe and Islamophobia are subjects of vital global importance which currently preoccupy policy makers and academics alike Through the examination of various European Muslim groups and institutions that have branched off from Islamic movements including the Muslim Brotherhood Hizb ut Tahrir and Jama'at al Islami this book outlines the configuration of social political and religious processes that have given rise to new kinds of European Muslim organisations The authors offer a new perspective on these Muslim groups and seek to reclaim them from the often highly charged public debates by placing them within the context of their origins as politicised religious movements on the one hand and their ongoing incorporation into European societal structures on the other They also consider the relationship of these organisations to their parent movements and examine the presence of Islam in European education and higher education institutions Taking into account the connection between Islamic movements and the perceived surge of Islamophobia in Europe this book does not debate the question of whether these groups fit into normative or cultural structures of European nation states but rather examines how these structures have changed through their interaction with these groups and the growing Muslim population within Europe It does not consider political Islam as the antithesis to a refined notion of secularism but as a form of public religion which contributes to the ever changing structure of Europe's secular regimes Featuring the work of more than 40 scholars from around the world this is the comprehensive guide to Islamic movements in Europe offering original definitive perspectives on Muslims and Islam in Europe today It will be essential reading for policy makers political commentators and scholars alike

On Niebuhr Langdon Gilkey, 2001 As the eminent theologian Langdon Gilkey demonstrates in this book Niebuhr was able to provide such a persuasive answer because his social understanding was a theological understanding one accomplished by viewing human being in relation to God as well as in its political and economic relations This Biblical understanding of human nature while acknowledging the often deep ambiguity and hypocrisy of the real historical world also revealed a divine hand guiding that history To Niebuhr it is God's participation in history that gives it meaning and a promise of fulfillment and presents believers with the possibility of a social realism that maintains its moral nerve rather than succumbing to cynicism or despair
