Murrell, Jr., 2017-09-25 Responding to a need for greater cultural competence in the preparation and development of teachers in diverse public school settings this book investigates the critical developmental and social processes mediating students academic identities in those settings posing the greatest challenges to their school achievement and personal development It provides an accessible practice oriented culturally responsive framework for teachers in American schools Murrell proposes a situated mediated identity theory that emphasizes examining not just the child not just the school environment but also the child in context as the unit of analysis to understand how both mutually constitute each other in the social and cultural practices of schooling He then develops this theory into an applied psychology of identity and agency development among children and youth as well as their teachers striving together for academic achievement in diverse school settings For researchers professionals and students in multicultural education educational and developmental psychology social and cultural foundations of education and teacher education Murrell s cultural practices approach builds on current thinking about multicultural teacher preparation and provides the practice component underpinning theories about cultural competence *It Takes a Child to Raise a Parent* Janis Clark Johnston, 2013-04-04 While advice abounds from a variety of sources before parents embark on their parenting journeys the only parent preparation we actually receive comes from our family and peer stories Yet most adults do not realize that in day to day challenges of guiding our children something interesting happens As we steer our children through life we reopen our own childhood roads Just when our child most needs us we become needy ourselves as adults and parents we find that we have unresolved raising issues basic needs that were not met in our childhoods Our needs and memories echo and influence many of the parenting decisions we make even though we re unaware of those influences at times

Fortunately children help parents reach their needs as much as their parents help them fulfill their own. Our child ends up guiding us by connecting us to some earlier time in our life when we encountered distress. We dredge up a lesson and we adapt by adhering to or changing the story that we tell ourselves about who we are. We re-negotiate the five basic needs that surface from our childhood memories as our youngsters pass through each of the developmental phases. The self-aware parent focuses on creative problem solving by focusing on one interaction at a time. It Takes a Child to Raise a Parent offers an exploration of how our own childhood memories and needs influence and shape our parenting decisions in our adult lives. Offering tips, stories from a variety of families and step-by-step exercises, Janis Johnston helps parents better understand and grasp the tools necessary to face parenting challenges head-on and to explore new ways of understanding ourselves, our children, and our family interactions. Expectant parents and current parents interested in understanding their own personality development as well as the many moods of childhood and their own children will find clear guidelines for understanding their roles in their children's lives as well as concrete suggestions for how to navigate the choppy waters of raising children.

Breaking the Cycle Nancy Brown Diggs, 2013-10-09. Breaking the Cycle tells the inspiring story of young people whom many would write off as a lost cause but who, thanks to a remarkable school, are headed for success. We learn about their world from teens like Shawna, the daughter of a crack-addicted mother, or Andre, the only one in his family not on drugs, or Daron, kicked out of his home by an abusive father. Challenged by the pernicious factors of their environment—drugs, violence, fatherless homes, and poor educational backgrounds—students at the Dayton Early College Academy are nevertheless beating the odds. All are headed for college, from which the vast majority will graduate. The book reveals how this school is succeeding when so many fail. It conveys the hopeful message that others can replicate much of what DECA does and save a generation mired in despair. America's failure to educate its urban children is evidenced by our woeful statistics. If it is possible to turn around this bleak picture, and it is, this is a story well worth telling. And this is what Breaking the Cycle aims to do. For more information on the book, including interviews with the author, please check out www.nancybdiggs.com. Sports Donald L. Deardorff, 2000-09-30. This guide to the available literature on sports in American culture during the last two decades of the 20th century is a companion to Jack Higg's Sports: A Reference Guide. Greenwood, 1982. The types of individual or team sports included in this volume include those that are viewed as physical contests engaged in for physical, emotional, spiritual, or psychological fulfillment. With a focus on books alone, chapters review the available literature regarding sports and each concludes with a bibliography. Academic journals likely to contain articles on the topics discussed are listed at the end of each chapter. Twelve chapters discuss sports and American history, business and law, education, ethnicity and race, gender, literature, philosophy and religion, popular culture, psychology, science and technology, sociology, and world history. This reference and guide to further research will appeal to scholars of popular culture and sports. An index and two appendixes are included: one listing important dates in American sports from 1980 through 2000 and one listing sports halls of fame, museums, periodicals.
