Religion in Essence and Manifestation Gerardus Van der Leeuw, 2014-07-14 In this book van der Leeuw discusses the horizontal path to God and the vertical paths descending from God and ascending to Him If God Himself appears it is in a totally different manner which results not in intelligible utterance but in proclamation and it is with this that theology has to deal Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Love identifies man with God and God with man consequently it identifies man with man faith separates God from man consequently it separates man from man for God is nothing else than the idea of the species invested with a mystical form the separation of God from man is therefore the separation of man from man the unloosening of the social bond By faith religion places itself in contradiction with morality with reason with the unsophisticated sense of truth in man by love it opposes itself again to this contradiction Faith isolates God it makes him a particular distinct being love universalises it makes God a common being the love of whom is one with the love of man Faith produces in man an inward disunion a disunion with himself and by consequence an outward disunion also but love heals the wounds which are made by faith in the heart of man Faith makes belief in its God a law love is freedom it condemns not even the *The Essence Of Religion* Subhash C.
