Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology s universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl s project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy s progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of

Husserl's thought are here exfoliated. Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated. Phenomenology's geographic spread is reviewed. We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences. Lastly the phenomenological project's new horizons on the plane of life are limned. Horizons with so powerful a draw that they may be said not to beckon but to summon. Here is the movement's vanguard. This collection has 71 entries. Each entry is followed by a relevant bibliography. There is a helpful Glossary of Terms and an Index of Names. **Traces of Understanding** Patrick L. Bourgeois, Frank Schalow, 1990

Theological Fringes of Phenomenology Joseph Rivera, Joseph O'Leary, 2023-09-22 This book focuses on the relationships between phenomenology and theology which have been varied and complex but seem currently in an inconclusive and loosely defined state. Methodological rigor is not much in evidence and the two disciplines continue to defy any authoritative synthesis. While both disciplines grapple with questions concerning the fundamental structures of human experience their relationship is troubled by the elusive roles of Revelation and faith which threaten the scientific autonomy of philosophy on one side and disable theologians for consistent philosophical discourse on the other. This volume revisits that conundrum from various perspectives as it at once reprimates some of the most vibrant points of encounter and opens possibilities for new beginnings. It begins with the theological musings into which leading phenomenologists have been drawn from the start with special reference to Husserl, Heidegger and Michel Henry as well as backward glances to Fichte, Schelling and Blondel. A second section takes up specific theological themes and examines how phenomenological approaches can refine thinking on them. These include the Incarnation, the Resurrection, the Eucharist, Grace and Prayer. A dialogue between phenomenology and classical theologians is staged in the third section. Augustine, Pseudo-Dionysius, Eckhart and Karl Rahner. The closing section ranges more widely discussing atheism, non-realist theology and Hinduism from phenomenological angles and showing how these topics too come within the ambit of theology. *Wittgenstein and Interreligious Disagreement* Gorazd Andrejč, 2016-08-04 This book critically examines three distinct interpretations of Ludwig Wittgenstein: those of George Lindbeck, David Tracy and David Burrell while paying special attention to the topic of interreligious disagreement. In theological and philosophical work on interreligious communication, Ludwig Wittgenstein has been interpreted in very different, sometimes contradicting ways. This is partly due to the nature of Wittgenstein's philosophical investigation which does not consist of a theory nor does it posit theses about religion but includes several varying conceptions of religion. In this volume, Gorazd Andrej illustrates how assorted uptakes of Wittgenstein's conceptions of religion and the differing theological perspectives of the authors who formulated them shape interpretations of interreligious disagreement and dialogue. Inspired by selected perspectives from Tillichian philosophical theology, the book suggests a new way of engaging both descriptive and normative aspects of Wittgenstein's conceptions of religion in the interpretation of interreligious disagreement.

Heidegger and the Emergence of the Question of Being Jesús Adrián Escudero, 2014-12-18 Heidegger and the Emergence of the Question of Being offers a new updated and comprehensive introduction to Heidegger's development and his early confrontation with philosophical tradition, theology, neo-Kantianism, vitalism, hermeneutics, and phenomenology up to the publication of *Being and Time* in 1927. The main thread is the genealogy of the question of the meaning of being. Alongside the most recent scholarly research, this book takes into account the documentary richness of Heidegger's first Freiburg 1919/1923 and Marburg 1923/1928 lectures, conferences, treatises, and letters, and addresses the thematic and methodological richness of this period of Heidegger's intellectual life and offers a coherent and unified interpretation of his earlier work. This book conveys Heidegger's thought in a well-organized, impartial manner without deviating too far from Heideggerian vocabulary. It will be invaluable for upper-level undergraduates, graduate students of philosophy studying phenomenology, continental, and German philosophy.

Jean-Luc Nancy after the Theological Turn Nikolaas Cassidy-Deketelaere, 2025-10-16 A novel and profound reading of Jean-Luc Nancy's deconstruction of Christianity in the context of French phenomenology's theological turn, this is an important contribution to continental philosophy of religion. Deftly exploring Nancy's work alongside major twentieth-century philosophers of religion, including Jean-Luc Marion, Michel Henry, Jean-Louis Chrétien, and Emmanuel Falque, Jean-Luc Nancy after the Theological Turn argues that only by turning to theology can phenomenology come into its own as philosophy. Following Derrida's treatment of Nancy, Nikolaas Cassidy-Deketelaere thinks after the theological turn by deconstructing phenomenology's inherent theological structure, which made that turn possible. Starting from the theological turn, phenomenology was structurally inclined to produce this book; it seeks to move beyond it in order to de-theologise phenomenology. This parallels Nancy's engagement with Christianity, drawing on Paul's kenosis, according to which God empties himself of his divinity in the Incarnation; he understands Christianity as deconstructing or de-theologising itself. Written in elegant and clear prose, in elaborating Nancy's little-discussed writing on Christianity, this volume clarifies the philosophical project of one of the most influential contemporary thinkers. Cassidy-Deketelaere persuasively establishes the radical significance of theology for phenomenology and explains the consequences of that relationship for the recent history of contemporary philosophy.
